Subject: Leaked Impact Study

Dear [REDACTED]

As predicted the silly season is on us and the leaked Impact Study is being widely talked about . For your interest I attach a notice that I hope will be released In Brussels later to morrow. We have deliberately not attempted to comment on some predictable and some bizarre elements in the document and have concentrated on what seems to be the core philosophical issue of country quotas . A removal has some alarming consequences which are not addressed adequately despite the somewhat surprising econometric predictions . This includes the effect of removing isoglucose quotas which occupies a low key position but could dwarf any other factor in an analysis of the market after 2015.

I am sorry to nag you again but I wondered if you had any idea yet of a possible date for a meeting between a Minister and Brussels Ambassadors. A supplementary query is the likely length of such a meeting. I ask as I wish to try and suggest a tightly focussed presentation of ACP views and would wish to link a brief with a timetable

Kind Regards

Barry
