

River Thames – lock restriction

Grafton Lock

Friday 11 April 2014 until further notice

Repairs to head sluice

The casting on one of the head lock gate paddle boxes at Grafton Lock has fractured. The lock is still operational with only one sluice on the head gates. It will therefore be slower than usual when filling.

Materials have been ordered to manufacture a replacement which will be fitted as soon as possible.

We apologise for any inconvenience this restriction causes and thank you for your patience during this time.

Matt Carter
