

## Apprenticeships qualification success rates 2013/2014

### Success rate and minimum standards example report layouts

Date of issue 13 November 2014

---

#### Purpose of document

1. This document provides example report layouts for the 2013/14 Apprenticeship qualification success rate and minimum standards reports. The document also contains the format of the data file that will accompany the reports.

#### Overview of the report contents

2. The 2013/14 Apprenticeship qualification success rate reports and minimum standards reports will be output in four separate .pdf files.
  - Report file 1 will contain qualification success rate and framework reports based on the overall success rate measure, reports 1 - 13.
  - Report file 2 will contain regional and local authority information based on the overall success rate measure, reports 14 - 16.
  - Report file 3 will contain qualification success rate and framework reports based on the timely success rate measure, reports 17 - 28.
  - Report file 4 will contain qualification success rate information for the Large Employer Outcome Pilot, report 29.
3. A Microsoft Excel data file will accompany the reports. The data file will contain details of each framework included in the success rate calculations. It also contains details of frameworks that are excluded from the success rate calculations because they are not funded ('Funded' is set to 0).

#### Points to note about the report layouts

4. The reports contain dummy data and the values in total lines are not the sum of the individual lines.
5. A report will not be output if there is no data for the provider, For example, the Large Employer Outcome Pilot report (report 29) is not produced if the provider has no LEOP provision.
6. Minimum standards reporting is incorporated into the qualification success rate reports.

7. Where the 'Percentage All Age Leavers Below MS Threshold' cell in the headline report is coloured red this indicates that amount of under-performing provision is greater than the minimum standards tolerance.
8. Where the 'Leavers' and 'Success Rate' cells on report 12 are coloured red this indicates that the qualification success rate for a framework is below the minimum standards threshold.
9. The minimum standards thresholds and tolerances will be published at a later date.
10. Suppression and rounding is applied to provider group and national values to protect the possible identification of individuals and to control the rigour of the statistics reported.
  - a) If the number of leavers is less than 30 the value is replaced with a dash (-)
  - b) The number of leavers values are rounded to the nearest 10
  - c) When calculating the success rate, if the number of leavers is less than 5 then the success rate is replaced with a dash (-)
