

08 May 2014

# Cereals usage by Millers, Brewers, Distillers and Maltsters UK - March 2014

This statistical release contains information on the use of cereal grain, flour production and stocks of cereal by these cereal processors on a monthly and crop year basis (July to June) and includes use of wheat for starch and bioethanol production. The Oatmeal Millers data is now collected and reported on a quarterly basis.

The results for the usage of wheat, barley and brewers and maltsters are released monthly and will next be updated at 9:30am on 05 June 2014.

The Oatmillers survey will be updated quarterly, the next update will be at 09:30 on 07th August 2014.

## **Contents**

#### Wheat Usage Statistics

# Key Points for Wheat & Barley in March 2014 compared with March 2013:

## Wheat Usage:

- The total amount of wheat milled was 561 thousand tonnes, down 5%.
- The total amount of home grown wheat milled was 466 thousand tonnes, up 20%.
- The total amount of imported wheat milled was 95 thousand tonnes, down 53%. The poorer
  quality 2012 UK crop has meant greater use of imported wheat, however, since November 2013
  millers have started to revert back to using a greater proportion of home grown wheat
  from the better quality 2013 wheat crop
- Brewers, maltsters and distillers total wheat usage was 72 thousand tonnes, down 11%,

## Barley Usage:

• Brewers, maltsters and distillers total barley usage was 169 thousand tonnes, up 5%.

#### Key Points for Oats usage in January to March 2014 compared with January to March 2013 :

• The total amount of oats milled was 134 thousand tonnes, up 4%.

#### **Data, Notes and Revisions**

Oats: Please note there has been a small amount of estimation this month

Flour Milling & Brewers: Please note final annual survey data has now been added to replace estimated annual data.

**General:** This statistical notice includes final 2013 data for those smaller mills which are only surveyed annually (please refer to the methodology). This statistical notice includes revisions to previous months data.

The latest version of this notice and historic datasets are available at: https://www.gov.uk/government/publications/cereal-usage

Closing Stocks	793.0	821.5	+3.6	793.0	821.5	+3.6

The crop year begins in July each year.

The crop year begins in July each year.

There have been revisions made to historic annual data from 2008 to 2011.

# OATS USAGE BY THE OATMILLING INDUSTRY

UK Jan - Mar 2014

Table 6 : Oats milled

**Thousand Tonnes** 

	Qu	Quarterly period			Crop-year to date			
	2013	2014		2011/12	2012/13			
	13 weeks to	13 weeks to	%	26 weeks to	26 weeks to	%		
	30 March 2013	29 March 2014	change	30 March 2013	29 March 2014	change		
OATS								
Total Milled	129.1	134.3	+4.0	363.8	384.1	+5.6		
Gross Production of which:	75.8	78.8	+4.0	218.9	226.3	+3.4		
Oat Flakes & Rolled Oats	52.8	54.0	+2.2	149.8	156.0	+4.1		
Oat Flour & Other Cuts (including Groats)	22.9	24.8	+8.0	69.1	70.3	+1.8		
Closing Stocks	11.1	19.0	+72.1	11.1	19.0	+72.1		

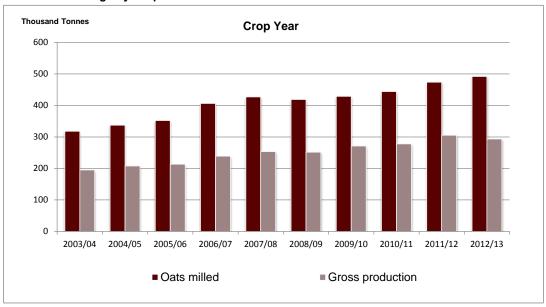

#### Please note:

Oats figures for total milled and closing stocks incorporate DEFRA estimates with the survey data and are subject to future revisions. **Notes** 

The crop year begins in July each year.

The difference between oats milled and gross production is accounted for by losses in the production process and by-products.

#### **User Statement**

I ne information in this notice is used by the UK government and the EU as evidence for assessing market conditions and evaluating agricultural policy including regular market management activities eg import tariffs. A key use is for the construction of the UK forecast cereals balance sheet which is published on the Home Grown Cereal Authority website at the link provided below, This is updated regularly during the year and includes more detailed contextural commentary.

http://www.hgca.com/content.output/99/99/Markets/Markets/Supply%20and%20Demand.mspx

Other users include the food, feed and farming industry, academia and the general public. Contact details are available on the front page of this notice, for you to send feedback or ask questions about the information provided.

## **Statistical Release History**

This combined statistical release shows usage and stocks statistics on a monthly basis for wheat, barley and maize and quarterly data for oats. Historical data can be viewed in the online dataset, along with the most recently published statistical release through the following link: <a href="https://www.gov.uk/government/publications/cereal-usage">https://www.gov.uk/government/publications/cereal-usage</a>

## Publications you may also be interested in:

Cereal Stocks: https://www.gov.uk/government/publications/cereal-stocks

Animal Feed Production: https://www.gov.uk/government/publications/animal-feed-production Agriculture in the UK: https://www.gov.uk/government/collections/agriculture-in-the-united-kingdom

## **Survey Methodologies**

These compulsory surveys, the Wheat Milled and Flour Production, the Cereal Usage by the Brewers, Maltsters and Distillers and the Oatmeal Millers collect data under the Statistics of Trade Act 1947. The data reported in this statistical release are from survey returns of all of the major users of wheat, barley and oats in the UK.

Companies for the Wheat Milled and Flour Production and the Cereal Usage by the Brewers, Maltsters and Distillers are contacted monthly or annually and their usage, stock and sales statistics are recorded. Most companies are sampled monthly, but smaller companies are sampled annually. Estimates for the smaller companies that are not part of the monthly survey are made and included in the published figures. This reduces the chance of a large change in the crop-year to date totals when the actual annual returns are incorporated into the data. For both the Brewers, Maltsters and Distillers and the Wheat Milled and Flour Production Surveys the smaller companies account for less than 5% of the total production.

Companies for the Oatmeal Millers survey are contacted quarterly and data are published quarterly. All known companies are sampled quarterly.

Totals for the current crop year to date are shown (July to June) as well as for the most recent month/quarter.

## **Accuracy and Reliability of the Results**

The accuracy of the survey results is very high because a census is carried out of all companies and the typical response rate is 100% per year. However in a particular month it is possible that estimates for a small number of individual companies may need to be used which will be subsequently revised when actual data are received. Occasionally data is not published when it fails strict disclosure and dominance checks. This ensures that statistics cannot be traced back to a particular company. For the Wheat Milled and Flour Production Survey, since October 1999, self raising flour has only been used by a minority of companies so is no longer displayed. For the Cereals Usage by the Brewers, Maltsters and Distillers, maize has only been used by a small number of companies and therefore has not been published. The data for each individual return are subject to a variety of validation checks such as comparison against previous months/quarters, cross checks on stocks and totals and extraction rates and data trends which identify any inconsistencies in the data. These would then be verified with the relevant survey respondent and any incorrect figures would be amended prior to publication.

# **Revisions Policy**

Figures in this notice are provisional and subject to revision. We will provide information about any revisions we make to previously published information in this statistics notice, and the associated datasets. Revisions could occur for various reasons, including:

- a. if we have not received survey data from respondents we make an estimate based on their previous returns applying any particular trend in the data, as appropriate. These estimates will be replaced with actual survey data when it is received.
- b. when survey respondents occasionally supply amended figures for previous periods.
- c. revising previous estimated data for smaller companies with actual survey data on an annual basis.
