Notes: - Value cells are shaded where the England value can be benchmarked against a goal.

- In the change columns, prev refers to the change in England value compared to the previous data point; base refers to the change in England value compared to the baseline value.

- Changes are only shown if they are statistically significant. An upwards arrow represents a significant increase in the indicator value, a downwards arrow represents a significant decrease. A sidewards arrow is displayed if there has been no significant change.

- The arrows are coloured green and red for those indicators where a change can be described as improving or worsening respectively
