Data notes

- indicates that data have been suppressed to prevent disclosure of information about individual holdings, therefore totals may not necessarily agree with the sum of their components.

(1) Figures refer to commercial holdings only. Commercial holdings are those above the thresholds for the 2010 Census. Please see the metadata tab for further details.

Data source Defra June Survey of Agriculture, a large sample survey sent to a representative sample of holdings across England. As the results are based on a sample survey, they are subject to a degree of sampling error and do not take into account other sources of survey errors, such as non-response bias or administrative data errors.

For more information on this survey, please visit our website at <https://www.gov.uk/structure-of-the-agricultural-industry-survey-notes-and-guidance>

For further enquiries on this dataset, please contact: Farming Statistics, Department for Environment, Food and Rural Affairs. Tel 01904 455332, email farming-statistics@defra.gov.uk

Farm type classification

As part of the production of the holding level dataset, a farm type is assigned to each holding to indicate the main type of activity on the holding. This is done using "Standard Outputs". The Standard Output (SO) is a measure of the total value of the output costs on a farm based on standardised coefficients. Where an activity makes up more than two thirds of the SO, the holding is assigned to this main farm type. Further information can be found in https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/182206/defra-stats-foodfarm-landuselivestock-june-junemethodology-20120126.pdf
