

- My name is Carole Shorney and I am Secretary of a group called SE Essex Organic Gardeners, affiliated to Garden Organic and the Soil Association.
- • I am truly appalled to read of yet another reckless, hugely expensive and climate-changing 'consultation' - has the Conservative Party any commonsense whatsoever?
- This is the reason why we need to stay within the EU, in order to abide by their wildlife directives.
- Expansion of emission from the aviation sector is not only incompatible with the UK's 2008 Climate Change Act, the report from the IPCC makes it clear that policymakers need to reduce emissions from all sectors as a matter of urgency. There is no room left to expand polluting activities like aviation. The Airport's Commission says it exists to promote "sustainable aviation" but the science makes it absolutely clear that the only sustainable option left is a sustained reduction in emissions from the aviation sector.
