FOI Release Information released under the Freedom of Information Act

Title: Trade mark statistics

Date of release: 5 June 2013

Information request:

- 1. No. of registered trade marks in UK in 1972, 1982, 1992, 2002 and 2012.
- 2. No. of references to the ECJ from the UK in trade mark cases since 1994.
- 3. No. of trade mark agents in the UK in 1972 and 2012.

Information released:

Please find attached tables of new trade mark registrations for the years 1972, 1982 and 1992. The figure for 2002 and 2012 are available online at: http://www.ipo.gov.uk/about-facts0304.pdf (pages 31 to 33). The figure for 2012 is at: http://www.ipo.gov.uk/about-facts1112.pdf (pages 19 to 22).

Please note that by 1992 registration of service marks had been introduced and these are listed separately below the figures for trade marks. The distinction was removed in 1994 when the term 'service mark' disappeared from UK trade marks law.

Please note also that the figures for marks protected under the Madrid Protocol were also published in 2002 and 2012, listed separately.

I regret that we do not hold information on how many trade mark cases have been referred to the ECJ because the referrals are not made by the IPO. I suggest that the Treasury Solicitor's Department may be able to help you, or failing that, the Ministry of Justice court records department.

I regret that we do not hold a complete list of UK trade mark agents for 1972 or 2012. We only keep a list of the main agents we are in contact with. You may be able to get this information from the agents' professional bodies, ITMA http://www.itma.org.uk/ or CIPA http://www.cipa.org.uk/pages/home.

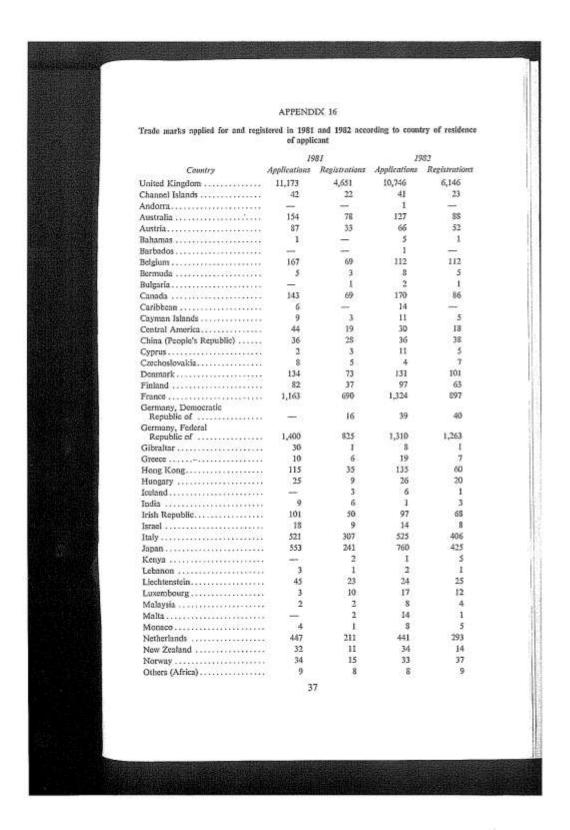

We are still looking into the possibility of obtaining figures of trade marks in force for 1992, 2002 and 2012. It won't be possible to do so before 1992 because of the absence of computerised records, and may not be possible for the later dates.

[PTO]

Outputs

A total of 36,657 cases were examined, decreasing the backlog of unexamined cases from 13,219 in 1992 12,907 in 1993. Registrations decreased from 35,137 in 1992 to 32,934 in 1993. Details of marks advertise and registered by classifications are as follows:

		7,701	6,430	6,287	7.019	

Further information - sent 26 July 2013:

Please note that the figures I sent you are for registrations for classes of goods (from 1994 onwards).

Before 1994 each trade mark application could only be filed for one class of goods or services. After 31 October 1994 applicants could file trade marks in multiple classes, each class of goods being paid for with a separate fee. These are the figures which I understand are counted in the figures for registration.

I have figures for marks registered from a database search for years 1992, 2002 and 2012. These are figures for actual registrations, including multiclass applications, not just for individual classes

As you may note, the figure for 1992 does not match that published in the Annual Report, which it should as these were for single class registrations recorded prior to the introduction of multiclass applications in 1994. This suggests that some of the other data may be inaccurate also.

Registered in the year 1/1 to 31/12 - a count of the register history entries for "Trade Mark Registered" in the year.

1992; 34657 2002; 23671 2012; 33198

The figures for trade marks in force for each of those years are as follows:

Cases with a status of 'registered' on 31 December 1992: 347785, 2002: 454095, 2012: 462451

Again, they may not be entirely accurate, but they give a broad indication of the state of the register.
