

UK SLAUGHTER STATISTICS

The latest National Statistics produced by Defra on UK slaughterings of cattle, sheep and pigs were released on 23 May 2013 according to the arrangements approved by the UK Statistics Authority.

This monthly notice will be updated at 09:30 on 20 June 2013.

Contents

Section 1	UK slaughter numbers	page 2
Section 2	UK average dressed carcase weights	page 2
Section 3	UK home-killed meat production	page 3
Section 4	UK average weekly slaughter estimates	page 3 to 4
Section 5	UK slaughterings by country	page 5
Section 6	Methodology, notes and revisions policy	page 6

Key points

This release shows the latest monthly information on the slaughtering of cattle, sheep and pigs. It also includes dressed carcase weight and meat production information. The key results for **April 2013** are given below:

- **Cattle:** UK prime cattle slaughterings were 0.8 per cent lower than in April 2012 at 191 thousand head. Beef and veal production was 83 thousand tonnes, 1.9 per cent lower than in April 2012.
- **Sheep:** UK clean sheep slaughterings were 6.0 per cent higher than in April 2012 at 1.0 million head. Mutton and lamb production was 24 thousand tonnes, 4.0 per cent higher than in April 2012.
- **Pigs:** UK clean pig slaughterings were 1.3 per cent higher than in April 2012 at 946 thousand head. Pigmeat production was 78 thousand tonnes, 2.5 per cent higher than in April 2012.

This notice and additional tables providing longer term trends of slaughterings, meat production and supplies are available to download at: <https://www.gov.uk/government/publications/cattle-sheep-and-pig-slaughter>

Section 1: UK monthly slaughter estimates

This table shows monthly estimates of the number of cattle, sheep and pigs slaughtered for meat for human consumption in the United Kingdom. The survey is run according to statistical, rather than calendar months, the number of weeks in the statistical month is specified below.

Table 1: UK monthly slaughter estimates

Thousand Head

United Kingdom	February 2013 4 weeks	March 2013 4 weeks	April 2013 5 weeks
Steers	76	72	94
Heifers	61	56	71
Young Bulls	19	19	27
Cows and Adult Bulls	49	42	54
Calves	9	10	8
Other Sheep and Lambs	897	896	1000
Ewes and Rams	159	150	178
Clean Pigs	786	767	946
Sows and Boars	20	21	25

Section 2: UK average dressed carcass weights

This table shows the monthly average dressed carcass weight of livestock slaughtered for meat for human consumption in the United Kingdom.

Table 2: UK average dressed carcass weights

Kilogramme

United Kingdom	February 2013	March 2013	April 2013
Steers	364.9	366.6	366.4
Heifers	317.5	317.4	316.2
Young Bulls	331.4	332.2	337.7
Cows and Adult Bulls	308.9	306.1	305.7
Calves	37.4	34.1	44.4
Other Sheep and Lambs	19.1	19.1	19.3
Ewes and Rams	25.8	25.6	25.4
Clean Pigs	79.8	79.2	79.0
Sows and Boars	145.8	140.2	143.0

Section 3: UK monthly home-killed production of meat

This table shows the monthly volumes of meat produced in the United Kingdom. Data is shown according to statistical, rather than calendar months, number of weeks in statistical month as specified.

Table 3: UK monthly home-killed production of meat

Thousand Tonnes

United Kingdom	February 2013 4 weeks	March 2013 4 weeks	April 2013 5 weeks
Beef	69	64	83
Mutton and Lamb	21	21	24
Pigmeat	66	64	78

Section 4: UK average weekly slaughterings

This following table shows the average weekly slaughter figures for the last thirteen months. The monthly slaughter figures in section one are affected by the number of weeks in the statistical month. To get a clearer measure of trends weekly averages are calculated by dividing the number of livestock slaughtered each month by the number of weeks in the statistical month.

Longer term trends can be seen in the charts following this table.

Table 4: UK average weekly slaughterings

Thousand Head

United Kingdom	2012					2013							
	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr

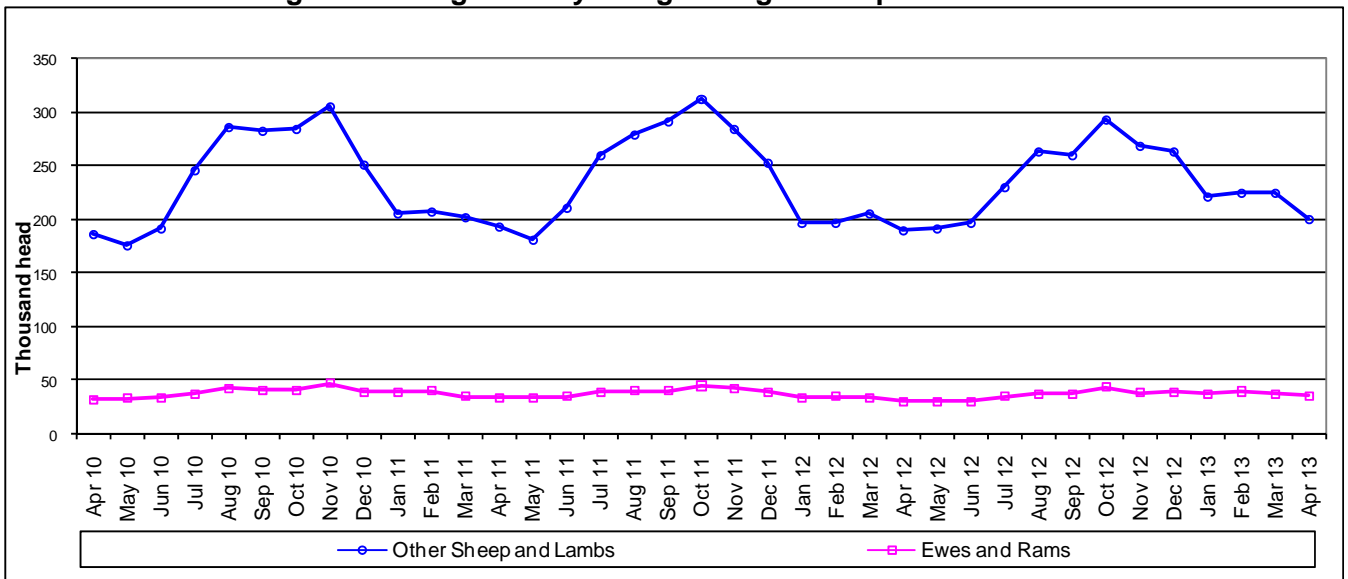

Chart 4:3 United Kingdom average weekly slaughtering - Pigs

Section 5: UK slaughterings by country

This table shows monthly estimates of the number of cattle, sheep and pigs slaughtered for meat in England and Wales, Scotland, Great Britain and Northern Ireland. Data are shown in statistical months, rather than calendar months. The totals for the countries may not add up to the Great Britain totals or the United Kingdom totals in section one, due to rounding.

Table 5: UK slaughterings by country

Thousand Head

	February 2013 4 weeks	March 2013 4 weeks	April 2013 5 weeks
England & Wales			
Steers	46	45	57
Heifers	36	33	41
Young Bulls	12	13	17
Cows and Adult Bulls	36	31	40

Sows and Boars	0	0	0

Section 6: Methodology, Notes and Revisions Policy

1. The information in this notice is used by the UK government and the EU as evidence for assessing market conditions and evaluating agricultural policy. The slaughter statistics are also required by the EU under Regulation (EC) No 1165/2008. Other users include the food and farming industry, academia and the general public. Contact details are available on the front page of this notice, for you to send feedback or ask questions about the information provided.
2. Defra runs a monthly survey of registered England and Wales slaughterhouses. It is a statutory survey of 106 respondents that collects information on livestock slaughter numbers and weight of meat produced. All major slaughterhouses participate in the survey and the response rate is typically 100%. These data are supplemented by administrative data for smaller slaughterhouses. Similar surveys are run by RERAD in Scotland and by DARD in Northern Ireland. The England and Wales slaughter survey accounts for around 90% of the E&W slaughterhouse throughput for each livestock type.
3. Information on the weight of meat produced from a sample of animals weighed at slaughterhouses is obtained from survey respondents, around 55 slaughterhouse respondents. From the information provided average dressed carcass weights for each animal type are primarily calculated by adding up the total weight of the meat produced and dividing by the number of animals weighed. Cold dressed carcass weights are recorded.
4. The volume of meat production is estimated from the number of all livestock slaughtered and average dressed carcass weight information collected. Home killed production includes livestock imported into the United Kingdom for slaughter.
5. The data are subject to a variety of validation checks which identify inconsistencies in the data. All data are cleaned prior to publication in discussion with the survey respondents.

Revisions Policy

6. Figures in this notice are provisional and subject to revision. We will provide information about any revisions we make to previously published information in this statistics notice and the associated datasets. Revisions could occur for various reasons, including:
 - a. if we have not received survey data from respondents we make an estimate based on their previous returns. These estimates will be replaced with actual survey data when it is received.
 - b. survey respondents occasionally supply amended figures for previous periods.
 - c. if we have not received administrative data for the smaller slaughterhouses we make an estimate based on previous data received. These estimates will be replaced with actual data when it is received.
7. **This month revisions have been made to the data from February 2013 onwards.**
