

Monthly UK Sea Fisheries Landings: February 2014

Key points

- During early 2014 extreme weather had an impact on the English fishing fleet, particularly those on the South Coast. Overall landings of demersal and shellfish species for the year to February are lower than seen in the same period in 2013. However the average price of fish landed has increased by 19 per cent for demersal fish and by 10 per cent for shellfish. This is likely a result of the limited supply of these species.
- The total quantity of **landings into the UK by UK vessels** for the period January to February 2014 has increased by 16 per cent compared with the same period in 2013. This increase was driven by an increase in landings of pelagic species during this time.
- The average price for **landings into the UK by UK vessels** for the period January to February 2014 has increased by 5 per cent compared with the same period last year.
- Landings by **UK vessels into the UK** accounted for 90 per cent of all landings into the UK during February.
- **Landings abroad by UK vessels** accounted for 43 per cent of all landings by UK vessels during February.

Excel versions of the following tables, along with an excel file containing the underlying data are available at:

<http://www.marinemanagement.org.uk/fisheries/statistics/monthly.htm>

Background

This notice provides an overview of the weight and value of landings by UK vessels into the UK and abroad, and by foreign vessels into the UK. The data are based on those landings data to date that have been fully validated. Final figures for the year will be provided in our annual UK Sea Fisheries Statistics publication, released in September.

Comparisons of monthly data should be made with care due to timing lags in the data.

The contents of this report have recently been revised following a user consultation in early 2014. We welcome any further comments or suggestions on this release. Please contact the MMO Statistics team if you have any questions, queries or comments on this release:

Email: Statistics@marinemanagement.org.uk

Telephone: 0207 979 8503

Revisions Policy

Revisions to previously published figures for individual months are not provided in this release. However, the figures in this month's release and the accompanying dataset are the latest currently available.

Explanatory Notes

1. Quantities are shown in terms of the live weight of the fish caught.
2. The values shown are based on information from first-hand sales of fish to all outlets, i.e. for human consumption as well as other uses, such as fishmeal and animal feed.
3. The calculation of average prices excludes landings with zero value to better reflect the price of the fish.
4. Other demersal species, as shown in the Tables, includes fish roes and livers.
5. Landings data for UK vessels landing in to the UK includes figures for the Isle of Man.
6. The ports covered in this publication represent those ports which were identified as the top 20 UK ports in terms of quantity landed or the top 20 UK ports in terms of value of landings, in the most recent annual publication. UK Sea Fisheries Statistics 2012
<http://www.marinemanagement.org.uk/fisheries/statistics/annual.htm>
7. Landings by foreign vessels into the UK do not include carrier landings. These are however included in our annual publication (see link above).
8. Details of the methodology can be found at
<http://www.marinemanagement.org.uk/fisheries/statistics/monthly.htm>
9. Data are based on landings data to date which have been fully validated. The summary tables include a year on year comparison of cumulative landings up to and including the latest month. However, the later year's figures will be less

complete due to delays in getting all landings data onto the system, and this will have an effect on the percentage change figures shown. Whilst the size of this effect varies by species, a rough guide is that at the total levels, the percentage change shown could be out by up to 5 percentage points, based on analysis of the Monthly Returns published throughout 2013.

10. The following symbols apply throughout:

- means "nil"

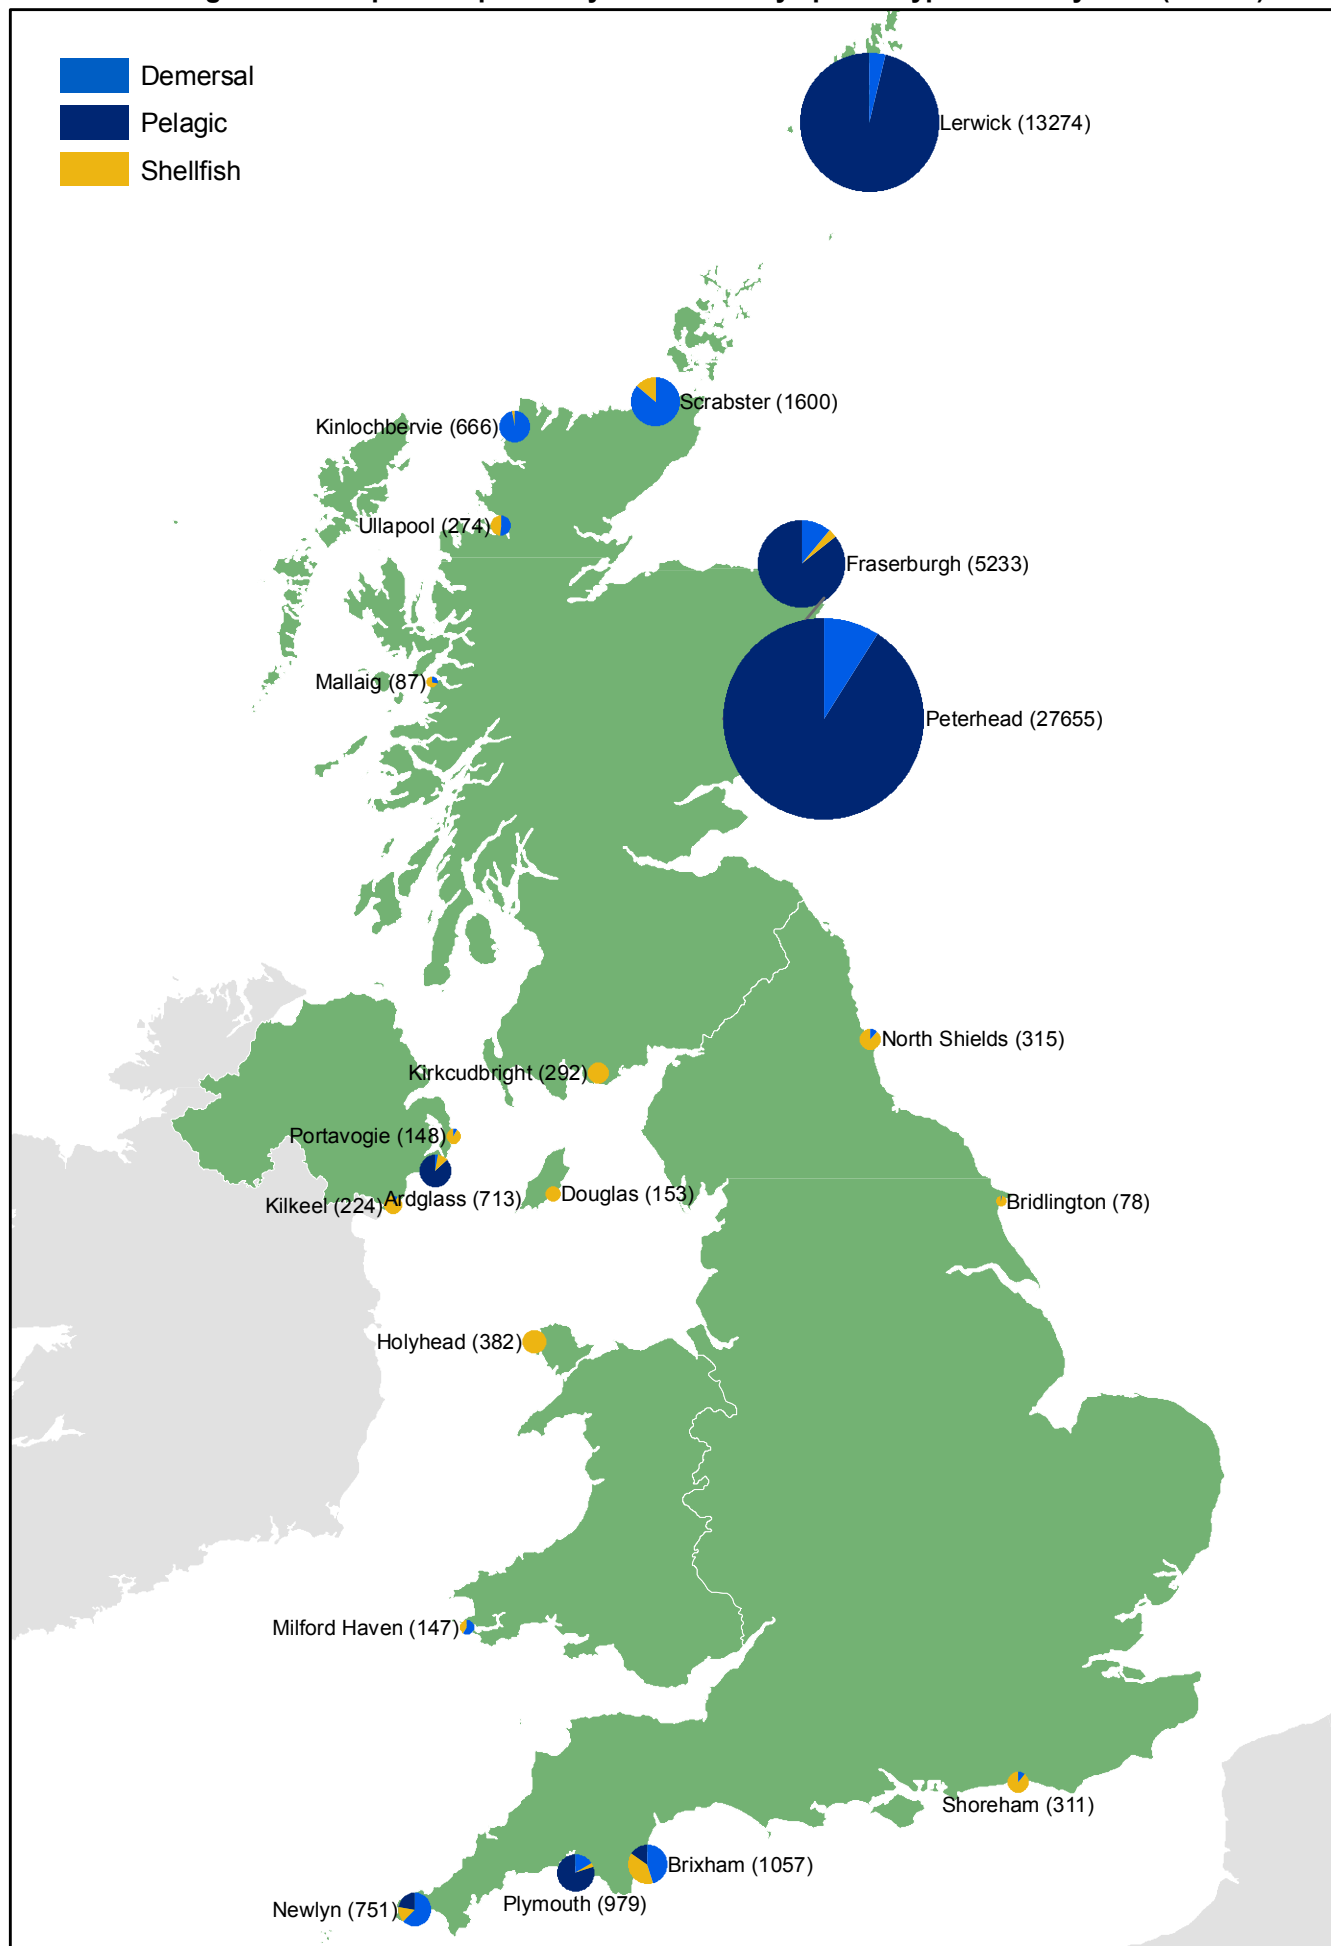

.. means "negligible" (less than half the last digit shown)

na means "not applicable"
