

**Table 1: Crosswalk of request topics**

<i>Topic</i>	<i>Requestor</i>								
	Malawi	Somalia	DRC	Ethiopia #1	Ethiopia #2	S.Sudan	Nepal	Nigeria	Avocaats San Front
<b>Capacity building/partnerships</b>									
Assessing and building capacity within local partners	✓	✓							
Communicating results			✓						
Working with govt's (e.g. NSOs)	✓								
Enhancing govt. ownership of indicators	✓								
Models for engaging communities (VAWC)				✓					
<b>Working with consultants</b>									
How to work with M&E consultants	✓	✓							
Required qualifications of M&E consultants		✓		✓					
Writing TORs for M&E consultants			✓	✓					
Independent evaluation, when and how	✓	✓							
Costs of M&E		✓							
<b>Multiple data sources/validation of measures</b>									
Combining data sources as a validity check	✓								
Verifying the quality of govt data		✓							
Cross-checking and validating data reports		✓							
Using existing data to populate indicators (surveys and admin data)	✓								
Mapping existing data sources				✓					
<b>Data collection techniques</b>									
Using public surveys	✓								
Using and interpreting admin data (detention/prison)	✓								
<b>Special populations</b>									

Measuring regional differences	✓			✓						
Measuring informal justice	✓									
Collecting data on vulnerable groups (women and children)		✓								
GBV	✓			✓						
Measuring the impact of legal assistance										✓
Data collection in fragile states/conflict zones		✓								

	Malawi	Somalia	DRC	Ethiopia #1	Ethiopia #2	S.Sudan	Nepal	Nigeria	Avocats San Front
--	--------	---------	-----	-------------	-------------	---------	-------	---------	-------------------

**M&E as a programming tool**

Stakeholder analysis (drivers/spoilers)				✓					
Mapping existing initiatives (donor coordination)				✓					
Linking M&E to programming		✓							
Developing logframes		✓				✓	✓		
Do data led initiatives lead to better results?		✓							
Theories of change			✓		✓				

**Summaries and checklists**

Checklists for developing measures								✓	
Off the shelf products/example indicators						✓	✓	✓	

**Indicators and measurement techniques**

Defining measures and data sources	✓								
Defining denominators	✓								
Measuring impact				✓					
Collecting baseline data	✓	✓							

**Conflict and security**

Conflict sensitivity								✓	
Evaluation of stabilization programs			✓						

**Table 2: Crosswalk of supply-side products and request topics**

	Coverage in existing products	Notes	# of mentions
<b>Capacity building/partnerships</b>			
Assessing and building capacity within local partners		SAS survey document	2
Communicating results		SAS survey document	1
Working with govt's (e.g. NSOs)		SAS	1
Enhancing Govt. ownership of ind.			1
Models for engaging communities		Theories of change and surveys	1
<b>Working with consultants</b>			
How to work with M&E consultants		SAS survey document (template)	2
Required qualifications of M&E consultants			2
Writing TORs for M&E consultants		SAS survey document	2
Independent evaluation, when and how			2
Costs of M&E		SAS survey document	1
<b>Multiple data sources/validation of measures</b>			
Combining data sources as a validity check		SAS & ICPC	1
Verifying the quality of govt data		SAS & ICPC	1
Cross-checking and validating data reports			1
Using existing data to populate indicators			1
<b>Data collection techniques</b>			
Using public surveys			1
Using and interpreting admin data		Mainly violence data	1
<b>Special populations</b>			
Measuring regional differences			2
Measuring informal justice			1
Collecting data on vulnerable groups			1
GBV		Covered in Harvard Webinar	2
Measuring the impact of legal assistance			1
Data collection in fragile states/conflict zones		Covered in various docs, but not comprehensive	1

<b>M&amp;E as a programming tool</b>			
Stakeholder analysis (drivers/spoilers)			1
Mapping existing initiatives (donor coordination)			1
Linking M&E to programming			1
Developing logframes			3
Do data-led initiatives lead to better results?			1
Theories of change			2
<b>Summaries and checklists</b>			
Checklists for developing measures			1
Off the shelf products/example indicators		ACLED and indicators of violence	3
<b>Indicators and measurement techniques</b>			
Defining measures and data sources		Mainly violence	1
Defining denominators			1
Measuring program impact		Mainly Theories of Change	1
Collecting baseline data			2
<b>Conflict and security</b>			
Conflict sensitivity			1
Evaluation of stabilization programs			1
Conflict analysis			

### **Table 3: Gap assessment**

#### **Request topics not covered**

Qualifications of M&E consultants  
Independent evaluations (when and how)  
Measuring informal justice  
Collecting data on vulnerable groups  
Measuring the impact of legal assistance  
Do data-led initiatives lead to better results?  
Defining denominators

#### **Partly covered**

Capacity building/working with National Governments  
Working with consultants  
Special populations

#### **Additional topics**

Indexing system/guide/framework to connect the various products  
Guide to levels of measurement (indicators of conflict, S&S, justice system performance, DFID programming, impact of multiple programs)  
Attribution  
Moving from Theories of Change to indicators  
Indicators used by existing initiatives  
Full range of potential data sources  
Measuring capacity of institutions  
Measuring integrity of institutions
