

**Renewable Heat Premium Payment Scheme (RHPP) Phase 2 –
Questionnaire Two (Follow-up) Draft 3.0**

Please complete this questionnaire – your thoughts and experience are vitally important to help us better understand people's experiences of using renewable heating, and better design policies like this in the future. This is the second of two surveys that RHPP2 applicants are asked to help with as a requirement for the Renewable Heat Premium Payment.

The questionnaire should take no more than 15 minutes to complete.

The information you provide is being collected for research and statistical purposes only. Data may be shared with the UK Government, or others acting on their behalf, for the purpose of research to inform the development of Government policy. Data may be linked to other surveys or datasets and summarised results may be published, but it will not be possible to identify any person, household or address from any published data.

Where questions refer to your renewable heating technology, please answer referring to the technology installed as part of the RHPP2 scheme. If you have installed more than one technology through the scheme, the technology being discussed is detailed in the e-mail sent with this questionnaire. You will be sent a questionnaire for each technology you installed. In this questionnaire, please answer questions on 'your renewable heat technology' for one technology only, and complete a second questionnaire relating to your other installation through the scheme.

Please note that some of the questions are mandatory, and therefore must be answered before you can move onto the next question. Mandatory questions are marked as shown (*).

Information on the amount of energy used by different types of households is of great value to the government in learning from policies. Would it be OK for the Department of Energy and Climate Change (DECC) to use data from your energy supplier on the amount of electricity (and gas – for solar thermal users) used at this address to help with this analysis? All information will be anonymised and used at a summary level for research and statistical purposes only.

56) * Are you happy for DECC to obtain this information?

- ☐ Yes
- ☐ No

To obtain data for electricity, it is helpful to have your MPAN number. Your MPAN is the unique identifying number for the electricity meter at your property, often referred to as a 'Supply Number' or 'S' number. It is a 21 digit number, which should appear on your electricity bill (this is different from your customer account number). Your supply number will normally be shown on your bill using a large 'S' and a grid of numbers.

57) Please write this 21 digit number in the box below:**This box is shown in preview only.**

The following criteria must be fulfilled for this question to be shown:

- (☐ If "Please confirm the type of renewable heating technology you have installed with help from the Renewable Heat Premium Payment Scheme (RHPP)2" equals "Solar Thermal System"
- ☐ and
- ☐ If "Are you happy for DECC to obtain this information?" equals "Yes"
-)

For householders with solar thermal installations it is also helpful to obtain data for mains gas, from your MPRN number. This number is unique to your property and is sometimes called the M Number or Meter point Reference Number. It should be printed on a recent gas bill, usually on either the first page or reverse of the front page. This is different from your gas supplier account number or the meter serial number printed on the meter itself.

58) Please write this 6 to 10 digit in the box below:**59) * As part of on-going research into RHPP and other schemes to encourage renewable heat, we may wish to contact people in the future to take part in further research. Would you be willing to be contacted?**
