Themes of this Symposium

Adopting project delivery behaviours that ensure safety whilst maintaining quality'.

- Learning from Experience
- Safety Culture
- Product Safety
- Recruitment/SQEP

Swiss Cheese Model

Our Enemy?

Complacency

Old Definition of complacency

from Latin complacere 'to please'

- *friendly civility; inclination to please; complaisance*

Modern Definitions of complacency

- a feeling of calm satisfaction with your own abilities or situation that *prevents you from trying harder*
- a feeling of quiet pleasure or security, often *while unaware of some potential danger, defect, or the like*

Looking to the Future - personally

I am yesterday's man

Looking to the Future – business perspective

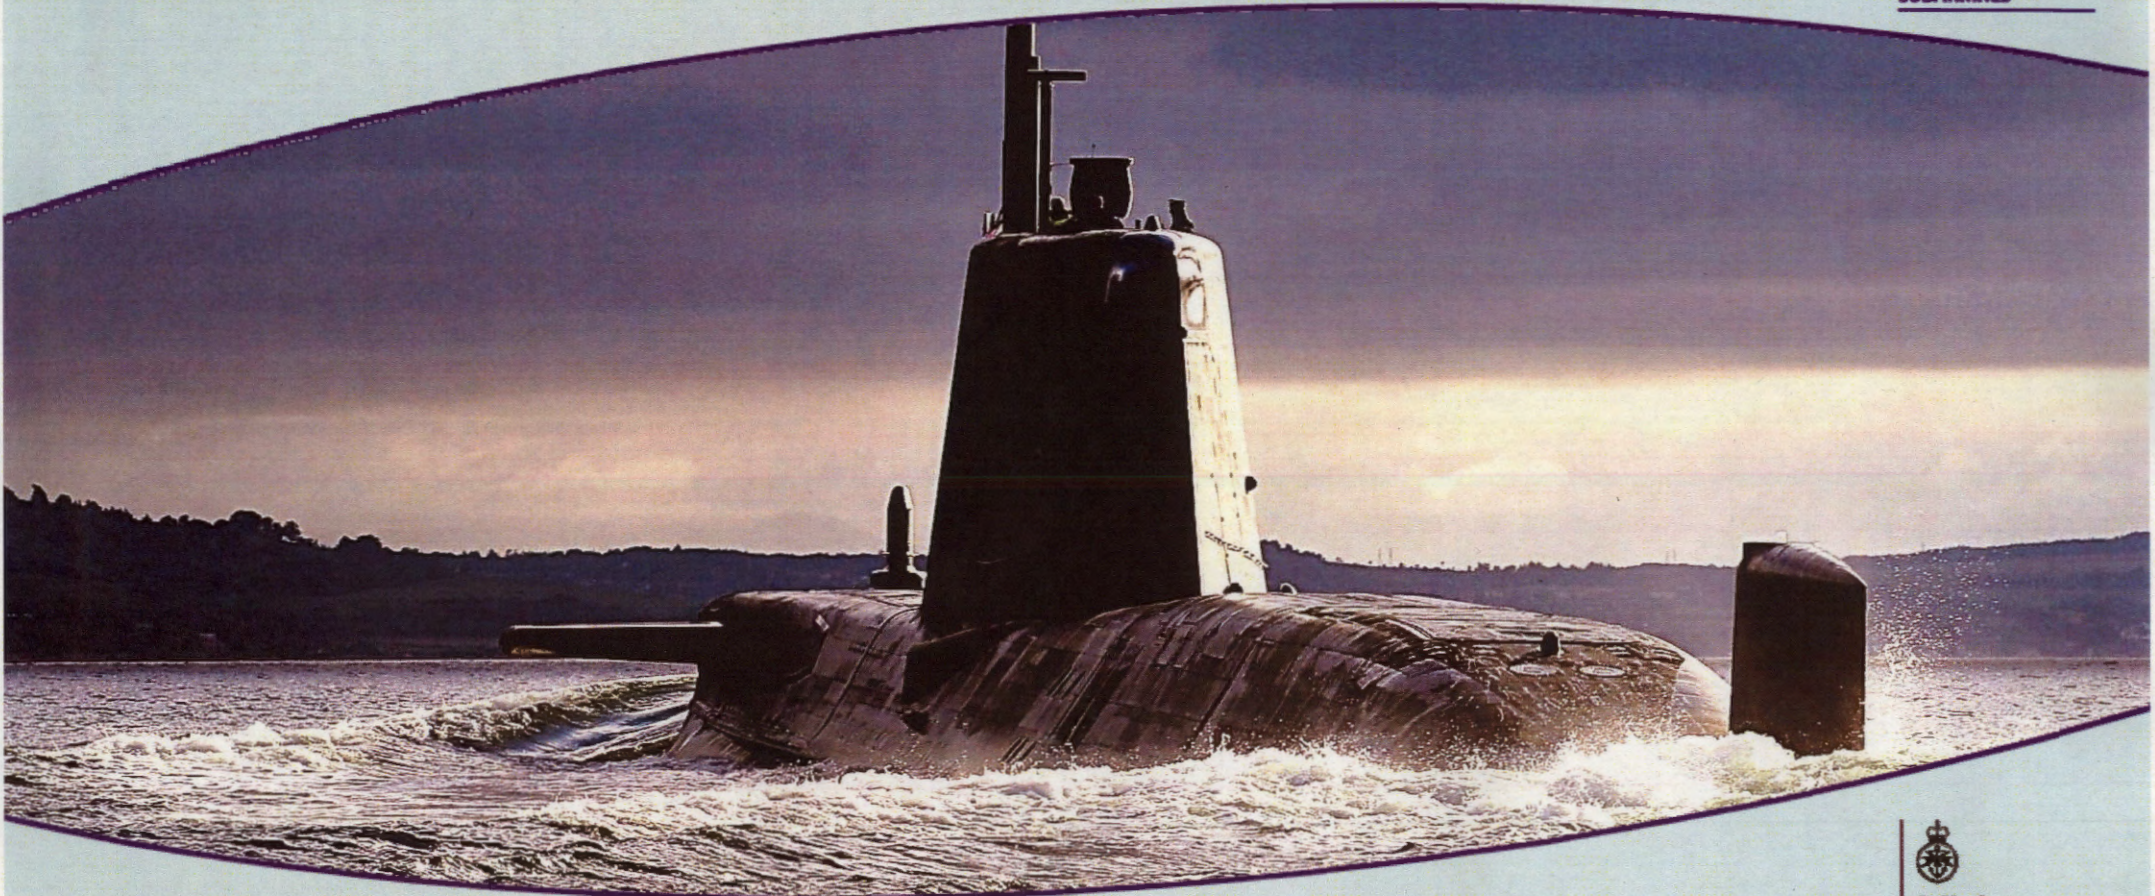

- Time of change
- GOCO or DE&S+?

Priorities for the Enterprise

- Product Safety through Quality
- Importance of Operator Safety
- Growing Safety Culture
- Resources and Skills
- Control of Organisation Change through the Material Strategy Process
