

Notice of variation and consolidation with introductory note

The Environmental Permitting (England & Wales) Regulations 2010

Bernard Matthews Foods Limited

Wreningham Poultry Unit
Glebe Farm
Wymondham Road
Wreningham
Norwich
Norfolk
NR16 1AY

Permit number
EPR/YP3134LU

Variation number
EPR/ YP3134LU/V005

Wreningham Poultry Unit

Permit number EPR/YP3134LU

Introductory note

This introductory note does not form a part of the permit

The following notice gives notice of the variation and consolidation of an environmental permit.

Wreningham Poultry Unit is located approximately 12 km to the south west of Norwich, in Norfolk and is approximately centred on National Grid Reference TM 14000 99775.

This variation authorises the following changes:

To permit the operator to rear 790,000 broiler chickens for meat production, when not rearing the permitted 275,000 turkeys. There is no change to the installation boundary or infrastructure of the housing as a result of this increase. However, the installation boundary has been amended to exclude a residential property previously included in error.

In addition, the inclusion of nine 215 kilowatt biomass boilers (aggregated net thermal rated input of 1935 kilowatts) to assist the heating of the poultry houses. The biomass boilers will only burn biomass fuel not comprising waste or animal carcasses. The biomass boilers replace the liquid petroleum gas (LPG) burners which were providing heat to the poultry houses. The LPG burners will be retained on site as back up to the boilers.

This consolidated variation incorporates the changes required by the Industrial Emissions Directive. This includes the amendment of the wording of several permit conditions. This also includes the addition of a condition relating to a requirement for routine monitoring, and an associated reporting condition.

There are no other changes as a result of this variation. The main features of the installation remain as follows:

Wreningham Poultry Unit is one of Bernard Matthews Foods Limited turkey rearing installations completed in the 1980s. The installation is surrounded by farmland. There is one Special Area of Conservation (SAC) within 10km of the installation, known as the Norfolk Valley Fens, approximately 4.6km from the installation. There are two Sites of Special Scientific Interest (SSSIs) within 5km, the nearest being Lower Wood, Ashwell Thorpe approximately 1.2km from the installation. There are also 7 Local Wildlife Sites (LWS) and 3 Ancient Woodlands within 2km of the installation.

Bernard Matthews Foods Limited operates this poultry unit which has a capacity for either 275,000 turkeys or 790,000 broiler chickens reared for meat production.

Turkeys are placed in the unit at day old and housed for approximately 21-22 weeks. When turkeys are not stocked, broiler chickens are brought on to the installation at a day old and reared to approximately 6 weeks of age.

There are 26 rearing houses. These are ventilated by roof inlets and side extraction fans. Natural mortalities and culled birds are removed daily and taken for rendering by a contractor. Yard surface water and some roof water from the poultry houses drains to a drainage system within the installation, which ultimately drains to the River Tiffey. In addition roof water from some of the poultry houses drains to grassed areas surrounding the poultry housing. At the end of the growing cycle the houses are emptied of litter and washed and disinfected. The wash water is collected in internal sumps before disposal. Spent litter is either landspread on third party arable land, or taken to an electricity generating station for burning.

The schedules specify the changes made to the original permit.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application EPR/YP3134LU/A001	Duly made 29/01/07	Application for an intensive farming poultry installation permit.
Schedule 4 Notice requested 15/05/07	30/05/07	Response received
Request for Information 15/05/07	29/05/07	Response received
Schedule 4 Notice requested 05/06/07	18/06/07	Response received
Permit determined EPR/YP3134LU	07/02/08	Permit issued to Bernard Matthews Foods Limited
Agency variation reference LET/MGJ (EPR/YP3134LU/V002)	08/08/08	Agency variation issued to amend improvement conditions IC4 and IC5 relating to ammonia emission reduction plans (ERPs)
Agency variation application EPR/YP3134LU/V003	Duly made 26/05/10	Agency variation to remove improvement conditions IC4 and IC5
Agency variation EPR/YP3134LU/V003	11/06/10	Varied permit issued
Variation application EPR/YP3134LU/V004	Duly made 22/10/10	Application to vary the permit to increase livestock numbers to 250,000 turkeys.
Variation determined EPR/YP3134LU/V004	24/11/10	Varied permit issued

Status log of the permit

Description	Date	Comments
Variation application EPR/YP3134LU/V005	Duly made 09/07/14	Application to vary the permit to allow the stocking of 790,000 broiler chickens when turkeys are not stocked , install 9 biomass boilers and update the permit to include the requirements of IED.
Additional information received	25/07/14	Clarification on broiler operating techniques, installation boundary, livestock crops and site drainage (including a revised site drainage plan).
Additional information received	28/07/14	Further clarification on installation boundary and site drainage.
Variation determined EPR/YP3134LU/V005 (billing reference EP3337VU)	03/09/14	Varied and consolidated permit issued.

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2010

The Environment Agency in exercise of its powers under regulation 18 and 20 of the Environmental Permitting (England and Wales) Regulations 2010 varies and consolidates

permit number
EPR/YP3134LU

issued to:

Bernard Matthews Foods Limited (“the operator”),
whose registered office is

Great Witchingham Hall
Great Witchingham
Norwich
Norfolk
NR9 5QD

company registration number 01831006

to operate an installation at

Glebe Farm
Wymondham Road
Wreningham
Norfolk
Norwich
NR16 1AY

to the extent set out in the schedules.

The notice shall take effect from 03/09/14.

Name	Date
Anne Nightingale	03/09/2014

Authorised on behalf of the Environment Agency

Schedule 1

All conditions have been varied by the consolidated permit as a result of an application made by the operator, and meet the requirements of the Industrial Emissions Directive.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document.

Permit

The Environmental Permitting (England and Wales) Regulations 2010

Permit number
EPR/YP3134LU

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/YP3134LU authorising,

Bernard Matthews Foods Limited (“the operator”),
whose registered office is

Great Witchingham Hall
Great Witchingham
Norwich
Norfolk
NR9 5QD

company registration number 01831006
to operate an installation at

Glebe Farm
Wymondham Road
Wreningham
Norfolk
Norwich
NR16 1AY

to the extent authorised by and subject to the conditions of this permit.

Name	Date
Anne Nightingale	03/09/2014

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

1.1.1 The operator shall manage and operate the activities:

- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
- (b) using sufficient competent persons and resources.

1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.

1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

1.2.1 The operator shall:

- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
- (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
- (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

1.3.1 The operator shall:

- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
- (b) maintain records of raw materials and water used in the activities;
- (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
- (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

1.4.1 The operator shall take appropriate measures to ensure that:

- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and

- (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.
- 1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 (a) The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.
- (b) If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 2.3.2 The operator shall maintain and implement a system to record the number of animal places and animal movements.
- 2.3.3 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.4 The operator shall take appropriate measures in off-site disposal or recovery of solid manure or slurry to prevent, or where this is not practicable to minimise, pollution.
- 2.3.5 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
- (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and

(e) the waste code of the waste.

2.3.6 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.

2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

3 Emissions and monitoring

3.1 Emissions to water, air or land

3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1, S3.2 and S3.3.

3.1.2 The limits given in schedule 3 shall not be exceeded.

3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination

3.2 Emissions of substances not controlled by emission limits

3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

3.2.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
- (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.5 Monitoring

3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:

- (a) point source emissions specified in tables S3.1, S3.2 and S3.3;

3.6 Pests

3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.6.2 The operator shall:

- (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

4.1.1 All records required to be made by this permit shall:

- (a) be legible;
- (b) be made as soon as reasonably practicable;
- (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
- (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:

- (i) off-site environmental effects; and
- (ii) matters which affect the condition of the land and groundwater.

4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency

4.2.2 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

- 4.3.1 (a) In the event that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
- (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) in the event of a breach of any permit condition the operator must immediately—
- (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) in the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and

- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and
- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.3.7 Where the operator has entered into a climate change agreement with the Government, the Environment Agency shall be notified within one month of:

- (a) a decision by the Secretary of State not to re-certify the agreement;
- (b) a decision by either the operator or the Secretary of State to terminate the agreement; and
- (c) any subsequent decision by the Secretary of State to re-certify such an agreement.

4.4 Interpretation

4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.

4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "without delay", in which case it may be provided by telephone.

Schedule 1 - Operations

Table S1.1 activities

Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
Section 6.9 A(1)(a)(i) Rearing of poultry intensively in an installation with more than 40,000 places	The rearing of poultry in a facility with a capacity for either 275,000 turkey places or 790,000 broiler chicken places.	From receipt of birds, raw materials and fuels onto the site to removal of birds and associated wastes from site

Directly Associated Activity

Biomass Boiler	Operation of 9 Biomass Boilers with an aggregated rated thermal input not exceeding 1935 kilowatts for site heating requirements, burning biomass fuel not comprising waste or animal carcasses.	From receipt of raw materials and fuels, to release of combustion products to air and associated wastes removed from site.
----------------	--	--

Table S1.2 Operating techniques

Description	Parts	Date Received
Application EPR/YP3134LU/A001	The responses to sections B2.3.1, B2.3.2, B2.3.3, B2.6.1, B2.6.2, B2.6.3, B2.7.1 and B2.7.2 in the Application.	29/01/07
Schedule 4 Notice Request dated 15/05/07	Response to Schedule 4 detailing the installation boundary, the usage of raw materials and the presence of an oil tank within the installation.	30/05/07
Schedule 4 Notice Request dated 05/06/07	Response to Schedule 4 requesting the submission of an Assessment of Environmental Impacts.	18/06/07
Request for Information dated 15/05/07	Response to Request for Information confirming if there is an incinerator on site and confirmation of the fate of the rainwater runoff	29/05/07
Variation application EPR/YP3134LU /V005	Responses to Parts C2 and C3 of the application form and referenced supporting documentation.	09/07/14
Additional information requested 22/07/14	Response to Request for Information clarifying broiler operating techniques, installation boundary, livestock crops and site drainage (including a revised site drainage plan).	25/07/14
Additional information requested 28/07/14	Response to Request for Information further clarifying installation boundary and site drainage.	28/07/14

Table S1.3 Improvement programme requirements

Reference	Requirement	Date
IC1	<p>A written plan shall be submitted to the Agency for approval, following a review of all site drainage at the installation. The plan should take into account the appropriate measures for the management of drainage systems and run-off in S3.3 of TGN How to Comply, Version 1, and include a timetable for any improvements to the drainage system. The notification requirements of condition 2.5.2 shall be deemed to have been complied with on submission of the plan.</p> <p>The plan shall be implemented by the operator from the date of approval in writing by the Agency subject to such amendments or additions as notified by the Agency.</p>	Completed
IC2	<p>A written plan shall be submitted to the Agency for approval following a review of existing poultry housing and management practices at the installation. The plan shall take into account the appropriate measures in S6.2.1 & S6.2.2 of TGN How to Comply, Version 1. The plan shall identify measures to reduce emissions to all media, the likely cost of such measures and a proposed timetable for their implementation. The notification requirements of condition 2.5.2 shall be deemed to have been complied with on submission of the plan.</p> <p>The plan shall be implemented by the operator from the date of approval in writing by the Agency subject to such amendments or additions as notified by the Agency.</p>	Completed
IC3	<p>The Operator shall ensure that methods are implemented to prevent, or where that is not practicable minimise, the potential for diffuse pollution from the containment for foodstuff by ensuring the foodstuff storage vessels are protected from collision damage.</p>	Completed
IC4	<p>The operator shall submit a written Emission Reduction Plan to the Agency for approval containing proposals that reduce the emission from the permitted installation so that the contribution to the ammonia concentration in air at the wildlife site known as Norfolk Valley Fens (UK0012892) is no more than $0.2 \mu\text{g}/\text{m}^3$ as an annual average. The Emission Reduction Plan shall contain timescales for the implementation of the individual measures proposed which shall be by 30 October 2011 at the latest.</p>	Deleted in variation notice EPR/YP3134L U/V003 11/06/10
IC5	<p>The operator shall submit a written Emission Reduction Plan to the Agency for approval containing proposals that reduce the emission from the permitted installation so that the contribution to the ammonia concentration in air at the wildlife site known as Lower Wood (1001762) is no more than $1.5 \mu\text{g}/\text{m}^3$ as an annual average. The Emission Reduction Plan shall contain timescales for the implementation of the individual measures proposed which shall be by 30 October 2011 at the latest.</p>	Deleted in variation notice EPR/YP3134L U/V003 11/06/10

Table S2.1 Raw materials and fuels	
Raw materials and fuel description	Specification
Fuel for biomass boiler units	Biomass pellets or chips comprising only virgin timber, straw, miscanthus or a combination of these.

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements

Emission point ref. & location	Parameter	Source	Limit (incl. unit)	Reference period	Monitoring frequency	Monitoring standard or method
Side fan outlets on poultry houses 1 - 26 as shown on the site plan in schedule 7	---	Poultry houses 1 - 26	---	---	---	---
Vent from oil tank as shown on the site plan referenced 'WRE/DR/001/A' received on 09/07/14 in support of application EPR/YP3134LU/V005	---	Oil Tank	---	---	---	---
Emissions from 9 biomass boilers as shown on the site plan referenced 'WREN-BIO-POSITIONING' received on 09/07/14 in support of application EPR/YP3134LU/V005	---	Aggregated 1935 kilowatt Biomass Boilers	---	---	---	---

Table S3.2 Point Source emissions to water (other than sewer) – emission limits and monitoring requirements

Emission point ref. & location	Parameter	Source	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Outlets to drains which ultimately feed into the River Tiffey as shown on the revised site drainage plan reference WRE/DR/001/A received 25/07/14 in support of application EPR/YP3134LU/V005	---	Roof and yard drainage serving poultry houses 5-13, 15-18 & 22-26.	---	---	---	---

Table S3.3 Point source emissions to land– emission limits and monitoring requirements

Emission point ref. & location	Parameter	Source	Limit (incl. Unit)	Reference period	Monitoring frequency	Monitoring standard or method
Grassed areas adjacent to poultry houses 1 – 21 acting as soakaways as shown on the revised site drainage plan reference WRE/DR/001/A received 25/07/14 in support of application EPR/YP3134LU/V005	---	Roof water from poultry houses 1-21	---	---	---	---

Schedule 4 - Reporting

There is no reporting under this schedule.

Schedule 5 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any activity that gives rise to an incident or accident which significantly affects or may significantly affect the environment

To be notified immediately	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a permit condition

To be notified immediately	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period
In the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment:	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B - to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the operator

Schedule 6 - Interpretation

“*accident*” means an accident that may result in pollution.

“*application*” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“*authorised officer*” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“*building*” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“*emissions to land*” includes emissions to groundwater.

“*emissions of substances not controlled by emission limits*” means emissions of substances to air, water or land from the activities, *either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission limit.* “*EP Regulations*” means The Environmental Permitting (England and Wales) Regulations SI 2010 No.675 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“*groundwater*” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“*Industrial Emissions Directive*” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions.

“*Manure and slurry*” have the following meaning:

- Manures may be either slurries or solid manures.
- Slurries consist of excreta produced by livestock whilst in a yard or building mixed with rainwater and wash water and, in some cases, waste bedding and feed. Slurries can be pumped or discharged by gravity.
- Slurry includes duck effluent, seepage from manure and wash water.
- Solid manures include farmyard manure (FYM) and comprise material from straw-based housing systems, excreta with lots of straw/sawdust/woodchips in it, or solids from mechanical separators.
- Most poultry systems produce solid manure (litter).
- Solid manure can generally be stacked.

“*virgin timber*” means timber from

- whole trees and the woody parts of trees including branches and bark derived from forestry works, woodland management, tree surgery and other similar operations (it does not include clippings or trimmings that consist primarily of foliage);
- virgin wood processing (e.g. wood offcuts, pellets, chips, shavings or sawdust from sawmills) or timber product manufacture dealing in virgin timber.

If virgin timber is mixed with waste timber or any other waste, the mixed load is classed as waste.

“SGN *How to comply – Intensive Farming*” The EPR Sector Guidance Note 6.09 for intensive pig and poultry farmers, Version 2 published January 2010.

“*Waste code*” means the six digit code referable to a type of waste in accordance with the List of Wastes (England) Regulations 2005, or List of Wastes (Wales) Regulations 2005, as appropriate, and in relation to hazardous waste, includes the asterisk.

“year” means calendar year ending 31 December.
