Subject: Infrastructure Commission call for evidence

Please accept below comments on behalf of Kingspan Insulation Ltd.

The National long-term infrastructure plan needs to include a requirement for improved energy efficiency, to sit alongside a lower carbon electrically heated future; an aim to prioritise reduction in future demand through improved energy efficiency measures for buildings should be a fundamental part of any infrastructure plan.

Making buildings energy-efficient reduces energy demand, stimulates economic activity, strengthens international competitiveness and creates thousands of jobs, mostly with small local businesses. It lowers costs for businesses and householders, and reduces the burden on the NHS. Improving the energy efficiency of buildings can be more cost-effective than increasing generation and can help to safeguard Britain's energy security.

In common with responses from the UKGBC, Energy Bill Revolution and others, Kingspan Insulation Ltd call upon the National Infrastructure Commission to launch a consultation on how best to make buildings more energy efficient and on how to de-carbonise our heating infrastructure in the most cost effective way

Best regards,

Jonathan Ducker
