

22 November 2016

Year: 2016 Week: 46

## Syndromic surveillance national summary:

### Reporting week: 14 to 20 November 2016

During week 46 there were further increases in seasonal respiratory conditions, including bronchitis/bronchiolitis in young infants, in line with RSV activity.

Vomiting and gastroenteritis remain above seasonally expected levels, with levels highest in children aged <15 years.

## Remote Health Advice:

There were small decreases in NHS 111 calls for diarrhoea and vomiting during week 46, however levels remain above those expected for the time of year (figures 7 and 8).

NHS 111 calls for cough and difficulty breathing continued to increase, with difficulty breathing calls increasing slightly above baseline levels (figures 4 and 5).

## GP In Hours:

During week 46 there have been further increases in GP consultations for a range of respiratory conditions, with lower respiratory tract infection and severe asthma being above seasonal baselines (figures 5 and 10).

There were also further increases in vomiting consultations in week 46, with rates highest in the under 5 years age groups (figures 8 and 8a).

## Syndromic surveillance summary notes

- Key messages are provided from each individual system.
- The different syndromic surveillance systems in operation within PHE access data from different areas of the national health care system.
- Each system is able to monitor a different selection of syndromic indicators based upon a different case mix of patients.
- Access to the full version of each syndromic surveillance bulletin is available through the Syndromic Surveillance website found at: (<https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses>); reports will be made available on Thursday afternoons.
- Further weekly and annual reports are available from the RCGP Research and Surveillance web pages: <http://www.rcgp.org.uk/clinical-and-research/our-programmes/research-and-surveillance-centre.aspx>

## Syndromic surveillance systems

### Remote Health Advice

*A remote health advice syndromic surveillance system that monitors syndromic calls from remote health advice services e.g. NHS 111 each day across England*

### GP In-Hours Syndromic Surveillance System

*A large UK-based general practitioner surveillance system monitoring daily consultations for a range of clinical syndromic indicators*

### Emergency Department Syndromic Surveillance System (EDSSS)

*A sentinel ED network across England monitoring daily attendances and presenting symptoms/diagnoses*

### GP Out-of-Hours Syndromic Surveillance System (GPOOHS)

*A syndromic surveillance system monitoring daily GP out-of hours activity and unscheduled care across England using a range of clinical syndromic indicators*

### RCGP Weekly Returns Service (RCGP WRS)

*A sentinel GP surveillance network covering England and Wales monitoring weekly consultations for a range of clinical indicators. This surveillance system is coordinated by the RCGP Research and Surveillance Centre*

## Acknowledgements:

We thank and acknowledge the contribution of all data providers including:

- NHS 111 and HSCIC
- Participating EDSSS emergency departments
- College of Emergency Medicine
- Advanced Health & Care and the participating OOH service providers
- QSurveillance®; University of Nottingham; EMIS/EMIS practices; ClinRisk®
- TPP, ResearchOne and participating SystmOne GP practices
