Project Plan

Based on the information provided in the Summary, use the table below to set out the Purpose, Outputs and Activities to be delivered. Give the <u>Indicator(s) of Success</u> for the Purpose, along with the Baseline information, what the target to be reached is, and when it will be delivered by, along with milestones (checkpoints) at which progress will be measured. This will allow you to monitor and measure progress throughout the Project, and provide clear evidence of the Project's success

Then list the Outputs and the Activities that will be needed to deliver them. You can, if you wish, add Indicators at the Output level.

Indicator = what will be measured (eg the number of people who will be trained; the increase in positive perceptions of an issue)

Baseline = the current status (eg no training exists; current perceptions are x% positive)

Sources = where will the information on the baseline data and targets come from (eg data from research carried out by the implementer; open source data)

Milestones = the key points at which progress will be tracked (can be specific dates/events or the regular quarterly reports – but provide indicative dates for the latter)

Target = what the project will deliver (eg 100 people trained; 50% increase in positive perceptions)

Date = the date by which the output will be delivered
