## Innovate UK

Notes on our internal research:

- The data provided is based on the 'lead applicant' (who submitted the Innovate UK application). This is not necessarily someone who has been involved in the preparation of the application or who will be involved in the day-to-day delivery or supervision of the project.
- The data has been analysed by manually allocating 'female' or 'male' to applicants based on convention assessment of their name. Where there is ambiguity in the gender of the applicant, that application has been included in the analysis
- We acknowledge data collection of our applicants at Innovate UK could be improved and are putting in place steps to do this.
- The data included within this report is not a comprehensive analysis of all competitions run by Innovate UK, those not present within the report include (but are not limited to), SMART, KTP and legacy competitions.
