Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

The requirements of the Industrial Emissions Directive (IED) 2010/75/EU are given force in England through the Environmental Permitting (England and Wales) Regulations 2010 (the EPR) (as amended).

This variation notice refers to the operation of large combustion plant (LCP), as defined by articles 28 and 29 of the Industrial Emissions Directive (IED). Environmental Permit EPR/TP3935XX has been varied by the Environment Agency to facilitate the implementation of the special provisions for LCP given in the IED, by the 1 January 2016 (Article 82(3)). The IED makes special provisions for LCP under Chapter III.

This variation notice sets condition 2.1.2 into Environmental Permit EPR/TP3935XX to ensure that the site can only operate in accordance with Chapter III of the Industrial Emissions Directive. The Operator, GDF Suez Teesside Limited, must demonstrate their compliance with Chapter III of the Industrial Emissions Directive, should they wish to operate the site and must have obtained written approval from the Environment Agency before operating.

The site is operated by GDF Suez Teesside Limited and the power station consists of eight Westinghouse Gas Turbine Generator units, two Mitsubishi / Westinghouse steam turbine generator units and one GE Gas Turbine Generator unit . The plant has the capacity to produce approximately 1875MW of electrical power for the National Grid and exports sales steam to the adjacent Wilton International site. At the point of this variation being issued the listed activity has been decommissioned and dismantled, the ground has been levelled and an application for surrender has been submitted to the Environment Agency.

This introductory note also confirms the updated LCP numbers in accordance with the most recent DEFRA LCP reference numbers. The LCP references are changed as follows:

- LCP 191 is changed to LCP 161;
- LCP 192 is changed to LCP 162; and
- LCP 193 is changed to LCP 163.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
