### Key points

This release provides information on the number and types of qualifications available for study in England, Wales and Northern Ireland over the academic year 2014/15 by recognised awarding organisations. The key findings are:

- Just under 16 million certificates were awarded in 2014/15 – 4% fewer than in 2013/14. The fall was driven primarily by changes in school entry patterns and accountability frameworks.
- The number of awarding organisations recognised by Ofqual fell to 163 – three fewer than a year earlier.
- The number of available qualifications decreased by 2% compared to 2013/14 to just over 24,500, of which about 14,400 had an award made.
- Twenty awarding organisations accounted for 90% of all certificates awarded during the academic year. Pearson Education Ltd awarded nearly one-quarter (24%) of all certificates.
- More certificates were awarded in the science and mathematics sector subject area than any other in 2014/15 (21% of all certificates awarded).
- For GCSE, AS and A level more certificates were awarded in the science and mathematics sector subject area (37%) than any other area in 2014/15 while for qualifications other than GCSE, AS and A level, more certificates were awarded in the preparation for life and work sector subject area (30%) than in any other area.

## Introduction

Ofqual regulates qualifications, exams and assessments in England. Ofqual's objectives include securing the standards of and promoting public confidence in regulated qualifications.

This report is produced annually and in a similar format year on year, so that readers can see developments and trends. It is based primarily on information that Ofqual holds or collects from awarding organisations and the Joint Council for Qualifications (JCQ). The data in this release covers England, Wales and Northern Ireland.

We will consider over the next year how we can develop and improve this report in future years. In particular, we want to change the way we report on qualification types in the light of the removal of the Qualifications and Credit Framework (QCF) rules. We think there are, in any case, more useful ways of classifying qualifications for reporting purposes. We would welcome views on these issues.

A glossary of terms is available towards the end of this release.

## Key statistics

The number of awarding organisations regulated by Ofqual fell to 163 in 2014/15, from 166 the previous year.

The number of available qualifications in 2014/15 decreased by 2% (from 24,965 in 2013/14 to 24,520). Most available qualifications have been developed to meet the design requirements of the QCF<sup>1</sup> and their number increased by 7% (from 19,474 in the previous year to 20,771). In the majority of cases, the number of other types of qualifications decreased.

The number of certificates awarded in 2014/15 fell by 4% to just under 16 million. There were more than 14,000 qualifications with at least one certificate awarded, representing 59% of available qualifications (which is six percentage points higher than the previous year).

Overall market shares are well established and the number of certificates awarded is concentrated in a small number of qualifications. For GCSE, AS and A level, 90% of certificates were awarded in just one-third of the available qualifications. For vocational qualifications and academic qualifications other than GCSE, AS and A level, 90% of certificates were awarded in around one-fifth of the available qualifications.

Ninety per cent of certificates were awarded by 20 awarding organisations. Pearson Education Ltd. (Pearson) have the largest market share and awarded nearly one-quarter of all certificates (24%); last year the figure was 26%.

The number of certificates awarded in the largest sector subject area (science and mathematics) decreased by 1% to 3.1 million. Preparation for life and work is the second-largest sector subject area, with over 2.6 million certificates awarded. This sector area saw a decrease of 7% in the number of certificates awarded (from 2.8 million to 2.6 million).

The GCSE, AS and A level market shares of the five awarding organisations that offer these qualifications remained largely unchanged compared to the previous year, based on the proportion of certificates awarded.

---

<sup>1</sup> The Qualifications and Credit Framework was a set of regulatory rules for designing credit-based qualifications, which most current vocational qualifications were designed to meet. The rules were withdrawn on 1 October 2015.

## External drivers

### Interests of users of qualifications

The development and take-up of qualifications is influenced by a range of factors. There is a complex and dynamic relationship between those providing qualifications (awarding organisations), purchasers (schools, colleges and training providers), students, and 'end users' (employers and further and higher education providers). Government reforms of qualifications, performance measures, public funding policies and other requirements will all have a significant impact on many of these relationships.

All users of qualifications respond to incentives, many of which come into play as a result of government policy changes:

- Awarding organisations respond to market demand for their qualifications and to incentives to develop and deliver new qualifications to meet government policy requirements, to withdraw qualifications that are no longer in line with Government policy, and to meet changing skills requirements.
- In deciding what to offer, schools and colleges are increasingly influenced by accountability measures and funding considerations, as well as student needs and institutional priorities, with decisions often balanced against practical delivery considerations such as availability of staff and student numbers. They may be informed by support groups and networks that help them to navigate the system, which can lead to changes to the qualifications on offer.
- Students generally want to study qualifications that will best help them progress in work or in higher or further education. Sometimes these relationships are very direct, for example, many licence to practise schemes depend on gaining a regulated qualification.
- Awarding organisations respond to feedback from employers and from schools, colleges and universities about whether their qualifications assess the knowledge, skills and understanding that they value, to the required standard.

### Change that will impact on the market in England

#### GCSE, AS and A level reform

A comprehensive reform programme of GCSE, AS and A levels has been taking place in England. In September 2015, three GCSE (graded 9 to 1) and 13 AS and A level subjects were taught for the first time in schools in England. The AS and A levels were also decoupled, meaning that the AS results (to first be issued in summer 2016 for these thirteen subjects) will no longer count towards A levels in the way that they have before.

Throughout the early part of 2015, the exam boards held marketing and ‘prepare to teach’ events about these reformed qualifications, which could have affected schools’ and colleges’ selection of specifications. This might also have had an impact on entry patterns for the relevant GCSE, AS and A level qualifications. Any changes in specification selection and entry will be seen in future issues of this report after reformed qualifications have started to be awarded (i.e. from summer 2016 onwards for AS and summer 2017 onwards for A level and GCSE).

Reform of further GCSE, AS and A level subjects is continuing, with first teaching of additional subjects starting in September 2016 and 2017.

### **School performance measures**

In 2014, the Department for Education announced that international GCSEs in English, English literature and mathematics would no longer be included in performance tables from 2017. Although they were approved for funding for use in UK state schools from September 2015, the Department for Education made the decision to exclude them from the performance tables. This change is likely to affect the take up of international GCSEs (reported as Level 1/Level 2 certificates in our statistics) from the 2016/17 academic year onwards.

### **Funding changes for 16 to 19 year-olds**

From 2014/15, all students aged 16 to 18 starting, or who have already started, a new study programme of 150 hours or more, and who do not hold a GCSE grade A\*-C or equivalent qualification in maths and/or in English, are required to study these subjects as part of their study programme in each academic year. The Education Funding Agency published additional funding regulations as a result of this new requirement<sup>2</sup>.

This is likely to have affected the entries and certification volumes for GCSE English and maths qualifications.

### **Public funding changes by the Skills Funding Agency (SFA)<sup>3</sup>**

The SFA is responsible for public funding of qualifications for students over the age of 19 in England. In the last few years, the funding rules for vocational qualifications aimed at students who are over 19 years of age have seen a number of changes that are likely to have had some effect on the number of certificates awarded each year. The SFA introduced new business rules<sup>4</sup> in September 2013 to target funding at qualifications that most closely align with the Government’s skills policy. A particular aspect of these rules was the withdrawal of funding for qualifications with low enrolment. The funding rule changes for 2014/15 included a requirement that qualifications designed for adult learners have at least 15 credits and have clear

---

<sup>2</sup> <https://www.gov.uk/guidance/16-to-19-education-funding-guidance>

<sup>3</sup> The Skills Funding Agency funds skills training for further education in England. It supports over 1,000 colleges, private training organisations and employers with more than £4 billion of funding each year.

<sup>4</sup> Skills Funding Statement 2013–2016: <https://www.gov.uk/guidance/sfa-funding-rules>

outcomes for progression to employment or the next level of learning. New funding rules<sup>5</sup> have been introduced during 2015/16. However, it is too early to find any visible impact of the new rules on the statistics reported in this bulletin.

### **School performance tables<sup>6</sup>**

There has been a considerable change in the way that qualifications are used in schools following the Wolf Report<sup>7</sup>. In 2013, any qualification on the section 96<sup>8</sup> funding list could count towards the school and college performance tables at key stage 4 and key stage 5. Since 2014, only a small number of non-GCSEs or A levels have been included in performance tables. This is likely to have led to changes in schools' and colleges' curriculum and qualifications choices, away from qualifications that are not included in performance tables.

Moreover, qualifications in these tables were previously weighted; larger qualifications gained a higher rating and could be worth more than one qualification in the performance table. This is no longer the case and all qualifications now count as one qualification, making larger qualifications less attractive. Examples of declines in numbers of certifications for some qualifications as a result of these changes can be seen in these statistics.

---

<sup>5</sup>[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/414800/Funding\\_Rules\\_v2\\_summary\\_of\\_changes\\_March\\_2015.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/414800/Funding_Rules_v2_summary_of_changes_March_2015.pdf)

<sup>6</sup> The key government benchmark for the attainment of Key Stage 4 pupils (aged 15 to 16) is the percentage of pupils gaining the equivalent of at least five A\* to C GCSE passes, including English and mathematics. In the tables, vocational qualifications such as BTECs and NVQs are given equivalency scores to GCSEs.

<sup>7</sup> Review of Vocational Education – The Wolf Report (March 2011) considered how the Department for Education can improve vocational education for 14 to 19 year olds:  
[www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/180504/DFE-00031-2011.pdf](http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/180504/DFE-00031-2011.pdf)

<sup>8</sup> Where section 96 approval has been awarded to a qualification, it enables that qualification to be taught in funded institutions, such as maintained schools, academies and post-16 institutions, and for public funds to be used for these courses and qualifications.

## Awarding organisations

Any organisation that wants to offer regulated qualifications in England has to be recognised by Ofqual<sup>9</sup>. Since July 2011, any new awarding organisation needs to meet Ofqual's *Criteria for Recognition*<sup>10</sup> and, once recognised, all awarding organisations need to continue to meet their Conditions of Recognition, including Ofqual's *General Conditions of Recognition*.<sup>11</sup>

### Number of recognised awarding organisations

Figure 1 shows changes in the number of recognised awarding organisations over the past 11 years. The number of recognised awarding organisations in 2014/15 has decreased by 2% from the previous year (from 166 to 163). This has happened as organisations were re-structuring, merging with other recognised organisations or ceasing to offer qualifications.

**Figure 1:** The number of awarding organisations recognised to deliver regulated qualifications on 30 September each year, 2005 to 2015

Source: Ofqual

<sup>9</sup> Similar arrangements apply in Wales and Northern Ireland with their regulators (Qualification Wales and CCEA Accreditation).

<sup>10</sup> [www.gov.uk/government/publications/criteria-for-recognition](http://www.gov.uk/government/publications/criteria-for-recognition)

<sup>11</sup> <https://www.gov.uk/government/publications/general-conditions-of-recognition>

## Regulated qualifications

Figure 2 shows the change in the number of available regulated qualifications over the past five years.

The number of available<sup>12</sup> qualifications in 2014/15 decreased slightly to 24,520 from 24,965 available qualifications in 2013/14 (2% decrease). Overall, the number of available qualifications has increased by 36% since 2010/11 (from 18,095 to 24,520). This increase is likely to have been due to the re-development of existing qualifications as a result of QCF policy and GQ reform, rather than the introduction of new qualifications. Available qualifications are recorded on the Register of Regulated Qualifications<sup>13</sup> (referred to as the Register).

**Figure 2:** Number of available regulated qualifications from 2010/11 to 2014/15

Source: Ofqual's Regulated Qualification Activity Database and JCQ data

<sup>12</sup> Qualifications are available until they pass their certification end date or if they have made an award in the academic year being considered.

<sup>13</sup> <http://register.ofqual.gov.uk>

## Trends in the number of qualifications by qualification type

Table 1 shows the change in the number of available qualifications for each qualification type in 2014/15 compared with the previous year.

The largest increases were in AS and A level qualifications (22% and 20% respectively) due to the development of new, reformed qualifications. Increases were also seen in the numbers of qualifications developed to meet the design requirements of the QCF (7%, to 20,771).

There were a number of areas where there were large decreases: diploma, occupational qualifications, principal learning, national vocational qualifications, basic skills, higher level, vocationally-related qualifications, key skills and entry level qualifications. These decreases are mainly due to the withdrawal or replacement of qualifications.

**Table 1:** The number of regulated qualifications of each type for 2013/14 and 2014/15

Qualification type	Number of qualifications available to certificate		
	2013/14	2014/15	Percentage change
GCE AS	277	338	22%
GCE A level	282	339	20%
QCF	19,474	20,771	7%
Project	17	18	6%
English for speakers of other languages	198	202	2%
Advanced extension award	1	1	0%

Table A1 in the appendix shows the number of available qualifications for each qualification type over the past five years.

## Available qualifications with certificates

Table 2 shows the change in the number of regulated qualifications of each type for which certificates were awarded in 2014/15 compared to the previous year.

Certificates were awarded in more than 14,000 qualifications in 2014/15. This corresponds to 59% of available qualifications; six percentage points higher than in the previous year. Qualifications developed to meet the design requirements of the QCF accounted for 84% of qualifications with certificates awarded.

**Table 2:** The number of regulated qualifications of each type for which certificates were awarded for 2013/14 and 2014/15

Qualification type	Number of qualifications with certificates			
	2013/14	2014/15	Percentage change	
Principal learning	5	10	100%	
Project	10	13	30%	
QCF	10,604	12,097	14%	
Other general qualification	379	420	11%	
GCE A level	249	261	5%	
Functional skills	204	209	2%

Occupational qualification	16	1	-94%	
Diploma	6	0	-100%	
<b>Total</b>	<b>13,323</b>	<b>14,413</b>	<b>8%</b>	

Source: Ofqual's Regulated Qualification Activity Database and JCQ data

Table A2 in the appendix shows the number of regulated qualifications of each type for which certificates were awarded over the past five years.

## Trends in certificates – qualifications with low take-up

Table 3 shows that in 2014/15, relatively few non GCSE, AS, and A level qualifications had large numbers of certificates awarded. CIEH Level 2 Award in Food Safety in Catering (QCF) and Cambridge International Level 1/Level 2 Certificate in First Language English were the two qualifications that had certification numbers higher than 100,000. The CIEH qualification has consistently been the qualification with the most certificates awarded in qualifications other than GCSE, AS, and A level in recent years.

There were over 23,000 qualifications other than GCSE, AS, and A level. Fifty-eight per cent of these had certificates awarded. Only 10% (2,220 qualifications) had more than 500 certificates awarded.

For GCSE, AS, and A level, over 1,200 qualifications were available on the Register for 2014/15. Seventy-six per cent of these had certificates awarded and 55% (667 qualifications) had more than 500 certificates awarded. Of the 288 qualifications with no certificates, 156 (54%) were reformed qualifications which were first available for teaching in September 2015 and therefore had not yet had any awards.

**Table 3:** Number of qualifications by number of certificates awarded in 2014/15

Number of certificates	Qualifications other than GCSE, AS and A level		GCSE, AS and A level qualifications	
	Number of qualifications	Proportion (%)	Number of qualifications	Proportion (%)
More than 100,000	2	0%	8	1%
50,000 - 99,999	14	0%	18	1%
10,000 - 49,999	104	0%	133	11%
5,000 - 9,999	179	1%	111	9%
1,000 - 4,999	1,077	5%	289	24%
500 - 999	860	4%	108	9%
250 - 499	1,143	5%	74	6%
100 - 249	1,825	8%	62	5%
50 - 99	1,588	7%	32	3%
10 - 49	3,632	16%	66	5%
1 - 9	3,056	13%	32	3%
Zero	9,819	42%	288	24%
<b>Total</b>	<b>23,299</b>	<b>100%</b>	<b>1,221</b>	<b>100%</b>

Source: Ofqual's Regulated Qualification Activity Database and JCQ data

Note: 'Qualifications' includes all subjects and variants offered in the year or part of the year, by all awarding organisations.

Table 4 shows the number of qualifications accounting for 25, 50, 75, 90, and 100% of the certificates awarded for each of GCSE, AS, and A level qualifications and other qualifications.

A high proportion of certificates were awarded in relatively few qualifications. For qualifications other than GCSE, AS, and A level, 2% of qualifications (238 qualifications) accounted for half of the number of certificates awarded. For GCSE, AS, and A level qualifications, 5% of qualifications (45 qualifications) accounted for half the number of the certificates awarded.

**Table 4:** Cumulative number of qualifications accounting for percentages of total certificates awarded in 2014/15

Percentage of certificates	Qualifications other than GCSE and A level		GCSE, AS and A level qualifications	
	Number of qualifications	Proportion (%)	Number of qualifications	Proportion (%)
25%	40	0~%	9	1%
50%	238	2%	45	5%
75%	927	7%	134	14%
90%	2,398	18%	290	31%
100%	13,480	100%	933	100%

*Source: Ofqual's Regulated Qualification Activity Database and JCQ data*

Note: 'Qualifications' includes all subjects and variants offered in the year or part of the year, by all awarding organisations.

## Certificates awarded for all qualifications

### Overall picture

Figure 3 shows the total numbers of certificates awarded in the past five years. Between 2010/11 and 2014/15, the number of certificates awarded has fallen by 2% (from 16.3 million to 16.0 million). The number of certificates awarded fell by 4% in 2014/15 compared to the previous year (from 16.6 to 16.0 million). Change in take-up of qualifications other than GCSE, AS, and A level is the biggest factor, with numbers of certificates awarded decreasing by just over 4% (from 8.8 million to 8.4 million). This is in part caused by changes to funding and accountability measures. The number of GCSE certificates awarded decreased by just over 3% (from 5.6 million to 5.4 million).

Numbers of certificates awarded in AS and A level qualifications remained relatively stable with a decrease of less than 1% in 2014/15 compared to 2013/14. A number of factors are likely to have influenced these figures. In particular, as set out above, at GCSE, changes made to school performance tables and the structure of the qualification are likely to have been significant factors in the decrease in the number of certifications.

**Figure 3:** Number of certificates awarded, broken down into GCSE, AS and A level, and other qualifications, from 2010/11 to 2014/15

Source: Ofqual's Regulated Qualification Activity Database and JCQ data

Note: 'Other' refers to qualifications other than GCSE, AS, and A level.

## Awarding organisation share of certificates awarded

Table 5 shows the trends in the total number of certificates awarded for all qualifications for the 20 awarding organisations that reported the highest volume of certificates in 2014/15. These organisations awarded over 90% of all certificates in the past five years, both in each year and across all five years as a whole.

The five largest awarding organisations by number of certificates awarded were Pearson, AQA Education (AQA), Oxford Cambridge and RSA Examinations (OCR), City & Guilds of London Institute (City and Guilds) and WJEC-CBAC (WJEC). They have awarded around 75% of certificates in each year for the past five years. However, all five organisations awarded fewer certificates in 2014/15 than in the previous year. Amongst these organisations, OCR had the largest decrease (11%), followed by Pearson (10%), WJEC (7%), City and Guilds (5%), and AQA (less than 1%).

The number of certificates awarded by AQA, OCR, and City & Guilds has decreased over the past five years by 11%, 35%, and 10% respectively. The number of certificates awarded by Pearson and WJEC has increased by 4% and 8% respectively over the last five years.

**Table 5:** The 20 awarding organisations with the most certificates awarded in all qualifications, 2013/14 and 2014/15

Awarding organisation	Number of certificates		Percentage change
	2013/14	2014/15	
Pearson Education Ltd	4,301,000	3,872,700	-10%
AQA Education	3,546,000	3,529,800	0~%
OCR	2,003,700	1,780,200	-11%
City and Guilds of London Institute	1,398,400	1,330,900	-5%
WJEC-CBAC	1,168,800	1,088,500	-7%
Cambridge English Language Assessment	194,200	297,200	53%
Cambridge International Examinations	165,700	281,100	70%
Chartered Institute of Environmental Health	304,800	279,200	-8%
Highfield Awarding Body for Compliance	256,500	272,400	6%
NCFE	302,600	270,900	-10%
Associated Board of the Royal Schools of Music	267,200	255,100	-5%
Council for the Curriculum, Examinations and Assessment	241,600	239,700	-1%
Trinity College London	170,600	181,300	6%
Qualsafe Awards	124,100	148,100	19%
BCS, The Chartered Institute for IT	83,000	107,900	30%
NOCN	138,900	96,100	-31%
First Aid Awards Ltd	78,300	90,400	15%
Excellence, Achievement & Learning Limited	91,300	88,400	-3%
Cskills Awards	72,900	70,300	-4%
Imperial Society of Teachers of Dancing	59,100	69,200	17%
Others	1,431,200	1,532,000	7%
<b>Total</b>	<b>16,558,200</b>	<b>15,973,600</b>	<b>-4%</b>

Source: Ofqual's Regulated Qualification Activity Database and JCQ data

Note: Pearson Education Ltd includes awards from Pearson EDI.

Eight of the 20 largest awarding organisations by number of certificates awarded reported an increase in the number of certificates awarded in 2014/15 compared to the previous year. Of these, Cambridge International Examinations showed the largest increase (70%). This is mainly due to a 66% increase in the number of certificates awarded in their Level 1/Level 2 Certificate in First Language English (from 129,900 to 215,900) and a 313% increase in the number of certificates awarded in their Level 1/Level 2 Certificate in Literature (English) (from 5,300 to 21,900).

Over the past five years, Cambridge International Examinations and First Aid Awards Ltd. showed the largest percentage increase in the number of certificates awarded, while NOCN and OCR showed the largest decreases. Table A3 in the appendix shows the number of certificates awarded in this period.

## Certificates awarded in GCSE qualifications

Figure 4 shows that shares of awarding organisations in the GCSE market have been relatively static over the past five years, although volumes have decreased. This is as expected – whilst qualifications are stable we would not expect to see large changes in GCSE, AS or A level market share. However, this might change in future years as reformed qualifications are introduced. The largest three organisations account for over 85% of all certificates awarded in England, Wales and Northern Ireland.

**Figure 4:** GCSE certificate data by awarding organisation from 2010/11 to 2014/15

Source: JCQ data

## **Certificates awarded in GCSE subjects**

Figure 5 shows the number of certificates awarded across different subjects for GCSE qualifications in 2014/15. The ten subjects with the highest number of certificates awarded remained the same as in the previous year. The order of the subjects from the highest number of certificates awarded to the lowest remains the same as in the previous year apart from science and religious studies switching places. This is due to both a slight increase in the number of science certificates awarded (5%, from 370,900 to 390,900) and a slight decrease in the number of religious studies certificates awarded (4%, from 394,200 to 379,600).

There was a considerable decrease in the number of certificates awarded in English<sup>14</sup> (19%, from 658,100 to 536,100) compared to the previous year. This is likely to reflect both the migration of students from GCSEs in English to Level 1/Level 2 certificates and reduced entry in the November 2014 series compared to November 2013. The latter was the result of the November 2013 series being the last modular series and a Government policy change stating that only a student's first entry to a GCSE examination would count in their school's performance tables. This policy change resulted in fewer students being entered in both the November and summer series.

The number of additional science certificates awarded increased by 10% (from 321,000 to 353,700). The increases seen in the number of science and additional science certificates awarded are likely to be the result of science qualifications changing from modular to linear specifications. This change has meant that candidates are now more likely to certificate in these qualifications in year 11 rather than in earlier school years.

The number of certificates awarded in mathematics decreased by 7% (from 854,400 to 792,400). As with English, this is likely to be due to reduced entry in non-summer series in 2014/15 compared to 2013/14. In the 2014/15 academic year the January and March series were removed and the November series was available only to students who were resitting qualifications.

---

<sup>14</sup> English includes qualifications in English and English language.

**Figure 5:** Number of GCSE certificates awarded for the ten subjects with the most certificates for 2014/15<sup>15</sup>

Source: JCQ data

Note: In 2014/15, there were 1.7 million certificates awarded in other GCSE subjects.

<sup>15</sup> As above.

## Distribution of GCSE qualifications across awarding organisations

Table 6 highlights the variability of GCSE subject market share between awarding organisations. Table A4 in the appendix shows the 20 GCSE qualifications with the most certificates during the 2014/15 academic year.

**Table 6:** The distribution of certificates awarded by awarding organisation for all GCSE subjects in 2014/15

## Certificates awarded in AS and A level qualifications

All A levels taken in England, Wales and Northern Ireland during the 2014/15 academic year were made up of advanced subsidiary (AS) units and A2 units<sup>16</sup>. This section shows data and trends in the distribution of certificates awarded for AS and A levels across awarding organisations. It also highlights high-volume AS and A level qualifications for 2014/15.

### Certificates awarded in AS qualifications

Figure 6 shows that, as with GCSEs and as expected, changes in market share across awarding organisations over the past five years have been small.

AQA has the highest market share in 2014/15 at 44% – similar to its GCSE share. The three largest organisations account for almost 90% of all certificates awarded for AS qualifications.

**Figure 6:** AS certificate data by awarding organisation from 2010/11 to 2014/15

Source: JCQ data

<sup>16</sup> Under the A level reforms in England, AS qualifications will be stand-alone qualifications and will no longer contribute to A levels. This change is being introduced gradually by subject from the 2015/16 academic year.

### Certificates awarded in AS subjects

Figure 7 shows the number of certificates awarded by subject for AS qualifications in 2014/15. Table A5 in the appendix shows the 20 AS qualifications with the most certificates awarded during the academic year.

The ten largest subjects by number of certificates awarded, and their rankings by certificate, have remained largely unchanged since the previous year.

The number of certificates awarded in each of these subjects has largely remained stable from 2013/14 to 2014/15. The largest changes were decreases of 5% in English (from 129,100 to 122,600) and art and design subjects (from 63,400 to 59,900).

**Figure 7:** Number of AS certificates awarded for the ten subjects with the most certificates in 2014/15<sup>17</sup>

Source: JCQ data

Note: In 2014/15, there were 476,200 certificates awarded in other AS subjects.

<sup>17</sup> English refers to English literature, English language and English language and literature.

## Distribution of AS qualifications across awarding organisations

Table 7 highlights the variability of AS subject market share between awarding organisations.

### Certificates awarded in A level qualifications

As expected, Figure 8 shows that changes in market share across awarding organisations in A level qualifications over the past five years have been negligible. AQA consistently awarded the largest proportion of certificates over the period, with a market share of 43% in 2014/15.

**Figure 8:** A level certificate data by awarding organisation from 2010/11 to 2014/15

Source: JCQ data

### Certificates awarded in A level subjects

Figure 9 shows the number of certificates awarded by subject for A level qualifications in 2014/15. Table A6 in the appendix shows the 20 A level qualifications with the most certificates awarded during the academic year.

The ten largest subjects by number of certificates awarded, and their rankings by certificate numbers, have remained largely unchanged from the previous year. However, in reverse to 2013/14, the number of certificates awarded in 2014/15 in history was higher than in chemistry and the number awarded in geography was higher than in physics. The number of certificates awarded in each of these subjects has largely remained stable from 2013/14 to 2014/15 apart from geography and history, where the numbers have increased by 13% (32,700 to 37,000) and 7% (51,600 to 55,400) respectively. These subjects are what the Russell Group of universities refers to as ‘facilitating subjects’<sup>18</sup>, subjects that are most commonly required or preferred by universities for entrance to degree courses and this may be the reason for the increase in uptake of these subjects at A level.

**Figure 9:** Number of A level certificates for the ten subjects with the most certificates awarded in 2014/15<sup>19</sup>

Note: In 2014/15, there were 310,700 certificates awarded in other A level subjects. Source: JCQ data

<sup>18</sup> First published in 2011 in their ‘Informed Choices’ publication.

<sup>19</sup> English refers to English literature, English language and English language and literature.

## Distribution of A level qualifications across awarding organisations

## Certificates awarded in qualifications other than GCSE, AS and A level

Over the past five years, the total number of certificates awarded in qualifications other than GCSE, AS and A level has increased overall from 8 million to 8.4 million. This period has also seen large increases in the number of qualifications designed to meet the QCF requirements, in parallel with big reductions in the qualification types that they typically replaced.

However, there has been a 4% decrease in the total number of certificates awarded in qualifications other than GCSE, AS and A level compared to the previous year (from 8.8 million to 8.4 million). This is likely to be due to changes in funding and the accountability framework that reduced the number of vocational qualifications recognised in schools for performance table purposes.

### Distribution of certificates awarded for qualifications other than GCSE, AS and A level by awarding organisation

Whereas only five awarding organisations offer qualifications for GCSE, AS and A level, the market for other qualifications is spread across many awarding organisations who often specialise in particular sectors or subject areas.

Table 9 shows the change in the number of certificates awarded for the ten awarding organisations with the most certificates compared to the previous year. Pearson awarded over one-fifth of all certificates in 2014/15. The largest ten organisations, by number of certificates awarded, account for 68% of all certificates awarded. Table A7 in the appendix presents the same data but over a five-year period.

**Table 9:** Distribution of certificates awarded in qualifications other than GCSE, AS and A level in 2014/15 by the ten largest awarding organisations (by number of certificates awarded in 2014/15)

Awarding organisation	2013/14	2014/15	Percentage change
Pearson Education Ltd	2,274,500	1,899,900	-16%
City and Guilds of London Institute	1,398,400	1,330,900	-5%
OCR	636,000	480,500	-24%
Cambridge English Language Assessment	194,200	297,200	53%
AQA Education	248,000	284,700	15%
Cambridge International Examinations	165,700	281,100	70%
Chartered Institute of Environmental Health	304,800	279,200	-8%
Highfield Awarding Body for Compliance	256,500	272,400	6%
NCFE	302,600	270,900	-10%
Associated Board of the Royal Schools of Music	267,200	255,100	-5%
Others	2,711,900	2,720,000	0~%
<b>Total</b>	<b>8,759,800</b>	<b>8,371,800</b>	<b>-4%</b>

Source: Ofqual's Regulated Qualification Activity Database

Note: Pearson Education Ltd includes awards from Pearson EDI.

Cambridge International Examinations saw a large increase (70%) compared to last year which, as previously mentioned, is mainly due to an increase in awards for their Level 1/Level 2 Certificate in First Language English (from 129,900 to 215,900) and Level 1/Level 2 Certificate in Literature (English) (from 5,300 to 21,900). Cambridge English Language Assessment also saw a large increase over the last year (53%), predominantly due to the introduction of new qualifications to the market.

The number of certificates awarded by AQA increased by 15%; this was mainly due to large increases in the number of certificates awarded in Level 1/Level 2 certificates in English literature (from 400 to 37,900) and English language (from 3,000 to 24,100).

OCR had the largest decrease in numbers of certificates awarded (24%), largely due to a reduction in the number of certificates awarded in their Level 2 National First Award in ICT (from 52,600 to 1,100) and Level 2 National Award in ICT (from 50,200 to 900). These decreases are likely to be due to changes in performance table rules which resulted in qualifications worth multiple GCSEs (such as these) having the same value as qualifications worth a single GCSE.

### Certificates by sector subject area

Table 10 shows the change in the number of certificates awarded in qualifications other than GCSE, AS and A level in 2014/15 compared to the previous year in the 15 sector subject areas.

**Table 10:** Number of certificates awarded in qualifications other than GCSE, AS and A level in each sector subject area from 2013/14 to 2014/15

Sector subject area	Number of certificates		Percentage change	
	2013/14	2014/15		
Health, Public Services and Care	1,183,200	1,188,700	0~%	
Science and Mathematics	325,700	302,900	-7%	
Agriculture, Horticulture and Animal Care	111,500	116,700	5%	
Engineering and Manufacturing Technologies	402,000	400,600	0~%	
Construction, Planning and the Built Environment	232,500	275,700	19%	
Information and Communication Technology	513,700	414,700	-19%	
Retail and Commercial Enterprise	688,300	621,300	-10%	
Leisure, Travel and Tourism	475,500	416,000	-13%	
Arts, Media and Publishing	882,700	829,900	-6%	
History, Philosophy and Theology	33,300	31,000	-7%	
Social Sciences	6,400	9,600	50%	
Languages, Literature and Culture	475,300	604,400	27%	
Education and Training	99,700	90,300	-9%	
Preparation for Life and Work	2,682,600	2,506,300	-7%	
Business, Administration, Finance and Law	697,500	563,700	-19%	
<b>Total</b>	<b>8,759,800</b>	<b>8,371,800</b>	<b>-4%</b>	

Source: Ofqual's Regulated Qualification Activity Database

The largest number of certificates awarded was in the preparation for life and work sector subject area (over 2.5 million), representing 30% of all certificates awarded. Of the 20 qualifications with the most certificates awarded, eight of them are from this sector subject area. There were just over 1 million certificates awarded in functional skills in this sector, representing 41% of all certificates awarded in this sector subject area.

Health, public services and care was the second-largest sector subject area followed by arts, media and publishing. Social sciences, language, literature and culture, and construction, planning and the built environment were the fastest growing sectors. Of these, language, literature and culture had the largest increase in terms of absolute numbers of certificates awarded (475,300 to 604,400). This was largely due to an increase in the number of certificates awarded in Cambridge International Level 1/Level 2 Certificate in First Language English (from 129,900 to 215,900).

Over the past five years, health, public services and care has seen the highest increase in the number of certificates awarded (from 793,700 to 1,188,700 – a 50% increase). Table A8 in the appendix shows the number of certificates awarded in each sector subject area during this period.

#### **Distribution of certificates awarded across awarding organisations by sector subject area for qualifications other than GCSE, AS and A level**

Although there are over 160 awarding organisations providing regulated qualifications, most of them provide qualifications in only a small number of sector subject areas.

Table 11 shows the distribution of certificates awarded in 2014/15 in qualifications other than GCSE, AS and A level across the largest five awarding organisations by sector subject area, and how this compares to the previous year.

In each sector subject area, the three largest awarding organisations by number of certificates awarded account for more than 50% of certificates (except in health, public services and care where it is 45%). The three largest awarding organisations by numbers of certificates awarded account for more than 80% of the certificates awarded in six sector subject areas.

**Table 11:** The five awarding organisations with the most certificates awarded in each sector subject area in 2014/15

Sector subject area	Awarding organisation	Number of certificates	Percentage of certificates in sector area	% change from 2013/14 to 2014/15

Note: Pearson Education Ltd includes awards from Pearson EDI.

Table 12 shows the number of awarding organisations for each sector subject area and the number of certificates awarded compared to the previous year.

Business, administration, finance and law had the largest number of awarding organisations with certificates awarded (79). Preparation for life and work, which is the largest sector subject area by certificates awarded, had 54 awarding organisations with certificates awarded.

**Table 12:** The number of awarding organisations with qualifications and with certificates awarded in each sector subject area in 2014/15

Sector subject area	Certificates	No. of awarding organisations	No. of awarding organisations with certificates	Change in number of awarding organisations with certificates 2013/14 to 2014/15

### Certificates awarded by qualification level

Qualifications in England, Wales and Northern Ireland are grouped into levels, from Entry level (1 to 3) to Level 8. Qualifications at the same level are at a broadly similar level of demand, but the size and content of the qualifications varies.<sup>20</sup>

Figure 10 shows the number of certificates awarded at each level over the past five years in qualifications other than GCSE, AS and A level. Level 2 qualification certificates (excluding Level 1/Level 2 qualifications) account for the largest number of all certificates awarded in qualifications other than GCSE, AS and A level in 2014/15 (37%).

The largest increase in the number of certificates awarded compared to the previous year was in Level 1/Level 2 qualifications (including qualifications known as Level 1/Level 2 Certificates, international GCSEs or IGCSE<sup>®21</sup>, which are taken as an alternative to GCSEs), increasing by 105%.

**Figure 10:** Number of certificates awarded in qualifications other than GCSE, AS and A level by level from 2010/11 to 2014/15

Source: Ofqual's Regulated Qualification Activity Database

<sup>20</sup> Level comparisons can be found at: [www.ofqual.gov.uk/help-and-advice/comparing-qualifications](http://www.ofqual.gov.uk/help-and-advice/comparing-qualifications).

<sup>21</sup> IGCSE<sup>®</sup> is the registered trademark of Cambridge International Examinations.

### Certificates awarded by qualification type

Table 13 shows the certificates awarded in 2014/15 for all qualifications other than GCSE, AS and A level by type compared to the previous year. Table A9 in the appendix shows the number of certificates awarded over the past five years in qualifications other than GCSE, AS and A level. Definitions of qualification types are given in the glossary of terms.

**Table 13:** Number of certificates awarded in qualifications other than GCSE, AS and A level by qualification type in 2013/14 and 2014/15

Qualification type	Number of certificates		Percentage change
	2013/14	2014/15	
Advanced extension award	400	400	0%
Basic skills	4,600	100	-98%
Diploma	0~	0	0%
English for speakers of other languages	356,200	272,300	-24%
Entry level	88,800	75,000	-16%
Free standing mathematics qualification	35,800	37,300	4%
Functional skills	1,075,800	1,034,800	-4%
Higher level	5,200	9,000	73%
Key skills	122,800	99,900	-19%
National vocational qualification	7,800	2,700	-65%
Occupational qualification	100	0~	-100%
Other general qualification	943,400	1,274,700	35%
Principal learning	2,000	1,500	-25%
Project	52,900	43,800	-17%
QCF	5,884,300	5,473,100	-7%
Vocationally-related qualification	179,700	47,100	-74%
<b>Total</b>	<b>8,759,800</b>	<b>8,371,800</b>	<b>-4%</b>

Source: Ofqual's Regulated Qualification Activity Database

There has been a 4% decrease in the total number of certificates awarded in qualifications other than GCSE, AS and A level compared to the previous year. The largest increase in the absolute number of certificates awarded was in other general qualifications (35%, 943,400 to 1,274,700). This is mainly due to previously mentioned large increases in the number of Level 1/Level 2 certificates awarded.

Functional skills qualifications have replaced basic skills and key skills qualifications leading to a decrease in the number of certificates awarded in these qualifications. Vocationally-related qualifications have seen a large decrease in certificates awarded (74%, from 179,700 to 47,100) as have national vocational qualifications (65% from 7,800 to 2,700). This is due to the development and increased uptake of other alternative qualification types.

Other than the QCF 'type', which, as noted above, actually covers a wide range of different types of qualifications, this year other general qualifications has surpassed functional skills as the largest qualification type by certificates awarded.

## Background notes

The certificate data in this release covers England, Wales and Northern Ireland. It has been compiled in accordance with our statistical policies.<sup>22</sup>

### Data source

Information on qualifications is taken from Ofqual's Register of Regulated Qualifications, which contains details of recognised awarding organisations and regulated qualifications in England (Ofqual), Wales (Qualifications Wales) and Northern Ireland (CCEA Accreditation).

The Register is used by awarding organisations to submit certain qualifications for accreditation and to maintain details of those qualifications. The data submitted by the awarding organisations includes information on qualifications, covering title, type, awarding organisation, sector subject area and level. Ofqual uses the Register for regulatory activity, and it is regarded as administrative data. Ofqual cannot amend this information; it is the responsibility of the awarding organisations. Where Ofqual sees anomalies in the data it requires awarding organisations to correct their information. Available qualifications are taken from the Register and awarding bodies are asked to send the associated data on certificates awarded.

Each quarter, all recognised awarding organisations submit data to Ofqual about the number of certificates they have awarded for qualifications other than GCSE, AS and A level in England, Wales and Northern Ireland, regardless of the age of the student and the type of school or college. Certificates are counted in the quarter when the qualification was awarded. This release shows the number of awards broken down by awarding organisation, sector subject area, type of qualification, level of qualification and country. This data source has been referred to as 'Ofqual's Regulated Qualification Activity Database' throughout the report.

The number of qualifications and certificates awarded in all specifications for GCSEs, AS and A levels taken in England, Wales and Northern Ireland is sent to Ofqual annually by the Joint Council for Qualifications (JCQ), which represents the GCSE, AS and A level awarding organisations. GCSE certificates cover full course, short course, applied double and applied single awards. A level includes A level applied double award and A level applied single award. Similarly, AS includes AS applied double award and AS applied single award. The data has been cleaned to exclude candidates who achieved grade U or were absent. This data source will be referred to as 'JCQ data' throughout the report.

Subject-level analysis based on subject categories is used by the Joint Council for Qualifications when publishing exam results.

## **Limitations of data**

Certification data for qualifications other than GCSE, AS and A level is collected at the earliest point available, which is the first day of the next reporting period. This reduces the time between the activity and reporting on the activity.

Ofqual cannot guarantee that the number of certificates sent are correct, although it expects awarding organisations to send correct data. Summary data is sent to awarding organisations for checking and confirmation. The figures reported in this release reflect the certificates awarded by awarding organisations at the time of data collection.

Ofqual carries out quality assurance procedures to ensure the accuracy of the data and challenges or questions it where necessary. Publication may be deferred if the statistics are not considered fit for purpose.

## **Geographical coverage**

The certificate data in this release covers England, Wales and Northern Ireland.

## **Revisions**

Once published, data on the number of certificates awarded for any qualification is not usually subject to revision, although subsequent releases may be revised to insert late data or to correct an error. Qualifications may also be re-categorised to a different type, level, sector subject area or awarding organisation. In some cases, data may be amended to reflect the new categorisation.

## **Completeness of the data**

All awarding organisations with regulated available qualifications in the year being reported have been included. Figures for past years include data about awarding organisations that are no longer recognised.

## **Confidentiality**

To ensure confidentiality of the raw data published online, the number of certificates awarded for qualifications other than GCSE, AS and A level has been rounded to the nearest five. If the value is less than five, it is represented as 0~ and 0 represents no certificates awarded.

## **Rounding**

Figures in the commentary and tables for the number of certificates awarded are rounded to the nearest 100 for ease of use. As a result of rounded figures, the

percentages shown in any figures may not necessarily add up to 100. The numbers of qualifications have been left as exact figures.

## Users of these statistics

These statistics are of particular interest to recognised awarding organisations who use these statistics for product development and business development strategies, and to gain insight into market share. Other users include the Department for Education and the Examination Officers' Association.

## Related statistics and publications

This statistical release presents annual data. There will be some overlap between the figures in this release and those in Ofqual's *Vocational and Other Qualifications Quarterly* publication.

A number of other statistical releases and publications relate to this one, including:

- *Statistical First Release: GCSE and Equivalent Results in England 2014/15*,<sup>23</sup> published by the Department for Education, which covers students' certificates awarded in GCSEs and equivalent regulated qualifications in schools in England at the end of Key Stage 4. The *Statistical First Release: A Level and Other Results, 2014/15*<sup>24</sup> covers certificates awarded for students aged 16 to 18 at schools and colleges in England in all Level 3 qualifications. These releases can be used to add context to the trends seen in Level 2 and Level 3 A level, AS and GCSE equivalent qualifications.
- The quarterly *Statistical First Release*,<sup>25</sup> published by the Department for Business, Innovation & Skills, reports on apprenticeship volumes that cover statistics on adult (19+) government-funded participation, certificate and success rates for further education, and apprenticeships participation and certificates awarded for all ages (16+) in England. It also shows figures on certificates awarded for vocational qualifications in the UK, as collected by Ofqual and through the National Vocational Qualifications Database.

## Useful information

A glossary of terms is available in the next section to help you interpret this release.

You can find Ofqual's publication schedule for the next releases online.<sup>26</sup>

## **Glossary of terms**

**A levels** – also known as General Certificates of Education, were available in the 2014/15 academic year as advanced level qualifications (A levels) and advanced subsidiary (AS). They are one of the main qualifications that young people use to gain entry to university.

**Accreditation** – a process by which Ofqual (or one of the other regulators) reviews and confirms that proposed qualifications meet specific criteria before they can be offered. Ofqual no longer requires all regulated qualifications to have been accredited.

**Accredited qualification** – this is an old term that was sometimes used to mean ‘regulated qualification’ (see below). Ofqual now allows awarding organisations to submit most qualifications for regulation without having to be accredited, so it is strictly incorrect to refer to regulated qualifications as accredited.

**Active qualification** – a qualification where certificates have been awarded.

**Available qualification** – a qualification eligible for an award or a qualification that has made an award even if it is no longer eligible (no longer available for students to enrol on). For the purpose of this release, a qualification is described as available until the certification end date or if an award has been certified during the reporting period.

**Awarding organisation** – an organisation recognised by Ofqual or another regulator to develop, deliver and award qualifications.

**Certificate/certification** – a formal acknowledgement of a student’s achievement. This will be any award that is not graded as U, absent or X (fail).

**Certification end date** – the last date on which a student may be issued with a certificate of achievement for the qualification.

**GCSEs** – General Certificates of Secondary Education are the main school-leaving qualifications in England, Wales and Northern Ireland. They are available in a range of subjects and can be studied alongside other qualifications. They are generally sat by 15 to 18 year olds in schools and colleges but are open to anyone who wants to gain a qualification.

**Level** – qualifications are assigned a level from Entry level, then Level 1 through to Level 8 (equivalent level of demand to a doctorate), indicating the broad level of demand of the qualification.

**National vocational qualifications (NVQs)** – work-related, competence-based qualifications that cover a broad range of industry sectors and occupations, and are delivered in a workplace setting.

**Other general qualifications** – qualifications that assess a particular subject area, such as music or art, other than GCSEs, AS and A levels. These qualifications are not directly work related but may support career development. They are often graded. The category also includes Level 1/Level 2 Certificates and IGCSE®.

**Qualifications and Credit Framework (QCF)** – a set of regulatory rules for vocational qualifications that Ofqual has withdrawn from October 2015.

**Quarter** – refers to calendar quarters. Quarter 1 (Q1) refers to January – March, quarter 2 (Q2) to April – June, quarter 3 (Q3) to July – September, and quarter 4 (Q4) to October – December.

**Recognition** – the formal process that Ofqual operates whereby applicant awarding organisations that wish to offer regulated qualifications can demonstrate that they meet the recognition criteria. The scope of recognition is the qualifications or types of qualification that the awarding organisation is recognised to offer, which may be quite narrow or very broad depending on the type of organisation and the qualifications it wishes to offer. Recognition is a robust gateway into the regulated marketplace. Only applicants who meet the criteria in full will be recognised. Recognised organisations have to meet Ofqual's Conditions of Recognition on an ongoing basis.

**Register** – the Register of Regulated Qualifications contains details of recognised awarding organisations and the regulated qualifications they offer.

**Regulated qualifications** – a qualification that is offered by a recognised awarding organisation within the scope of its recognition. Regulated qualifications must be added to the Register of qualifications and have to meet Ofqual's requirements. Some qualifications are subject to an accreditation requirement and have to be checked by the regulator before they can be offered as regulated qualifications.

**Vocationally related qualifications** – work-related, competence-based qualifications designed to give students the skills and knowledge they need to do a job. They are related to employment but, unlike NVQs, do not necessarily require a work placement.
