

Universal Credit aims to reduce poverty, by making work pay, and to help claimants and their families to become more independent.

Universal Credit was introduced in April 2013 in certain pathfinder areas of North West England. Since October 2013, it has progressively been rolled out to other areas. It is now available in all Jobcentre Plus offices to single claimants, and is being expanded across the country to include all claimant types via the full service.

Main story

The number of people on Universal Credit as of 14 July 2016 was 303,839. The number of people in employment is currently 120,700 (40 per cent).

303,839 claimants

July 2016

The number of people on Universal Credit rose to 303,839 in July 2016. This is an eight per cent increase from last month.

Starts at 37,640

July 2016

The number of starts made to Universal Credit was 37,640 in July 2016. Starts made has risen this month.

The figures in this chart have been standardised, so may not match figures in the document. Please see the Background Information and Methodology document for more detail.

Claims remain high

Up to 4 August 2016

683,964 claims have been made for Universal Credit up to 4 August 2016. 56,805 claims have been made for Universal Credit in the last four weeks at an average of 14,201 per week.

This month's release includes a breakdown showing the number of people on Universal Credit by conditionality regime, as at the count date, 14 July 2016. These figures are not the same as the employment breakdown, which shows whether an individual has had earnings during their assessment period. The two breakdowns should only be used together with caution.

What you need to know

This summary contains statistics on Universal Credit covering the period to 4 August 2016 (for claims made) and 14 July 2016 (for starts and people receiving Universal Credit). Universal Credit is available in all Jobcentre Plus Offices to single claimants and is being expanded to all claimant types across the country via the full service. Please note we do not currently include statistics covering all of the full service.

Universal Credit aims to reduce poverty, by making work pay, and to help claimants and their families to become more independent. It also aims to simplify the benefits system by providing a single payment based upon the circumstances of the household. Support for housing costs, children and childcare costs are integrated in the new benefit. It also provides additions for disabled people and carers.

The following benefits will be replaced as Universal Credit rolls out.

- Income-based Jobseeker's Allowance
- Income-related Employment and Support Allowance
- Income Support
- Working Tax Credit
- Child Tax Credit
- Housing Benefit

The main features of Universal Credit are:

- Universal Credit is available to people who are in work and on a low income, as well as to those who are out-of-work.
- Most people will apply online and manage their claim through an online account.
- Universal Credit will be responsive – as people on low incomes move in and out of work, they will get on-going support.
- Most claimants on low incomes will still be paid Universal Credit when they first start a new job or increase their part-time hours.
- Claimants will receive a single monthly household payment, paid into a bank account in the same way as a monthly salary; support with housing costs will usually go direct to the claimant as part of their monthly payment.

This report contains three measures. **Claims** made counts the number of applications submitted for Universal Credit. Some of these people will go on to **Start** receiving Universal Credit. **People on Universal Credit** includes all those who have started and are still on Universal Credit at the count date (second Thursday of the month). Some people will have their claim terminated either at the request of the individual or if their entitlement to Universal Credit ends. See the Background Information and Methodology document for more detail on the definitions used in this publication.

Claiming Universal Credit

The number of claims made remains high

New claims per week and day in the last year to Thursday 4 August 2016

The total number of claims made for Universal Credit in the last four weeks is 56,805, with an average of 14,201 claims per week, compared to an average of 14,540 claims in the previous four weeks.

Generally, more claims are made for Universal Credit on weekdays, compared to weekends.

Claims made for Universal Credit reached a daily peak of 3,466 on 13 June 2016, and a weekly peak of 15,201 on the week ending 30 June 2016.

The total number of claims made for Universal Credit has risen to 683,964, as all Jobcentre Plus offices are now accepting claims from single claimants for Universal Credit.

See **Table 1.1** for summary statistics and [Stat-Xplore](#) for the complete data series.

How people claim Universal Credit

People will usually make a claim for Universal Credit online, during which initial claim verification will take place. After making a claim, an initial interview will take place with the claimant at which the eligibility for Universal Credit will be confirmed, and the claimant will accept a [Claimant Commitment](#). At this point, a claimant will be recorded as starting Universal Credit. Users should note that the statistics on claims made are three weeks more up-to-date than statistics on starts and people on Universal Credit. Not all people who make a claim for Universal Credit will go on to start. The statistics for claims and starts used in this publication include all claims and starts to Universal Credit.

Starts to Universal Credit

More 16-24 year olds made a start to Universal Credit in July

Number of starts to Universal Credit in July by age and gender

There has been an increase in the proportion of starts made from 16-24 year olds this month, rising to 51 per cent of total starts. This increase can be seen in both males and females. The rise in the proportion of starts made from 16-24 year olds seems to be a seasonal trend.

Since February 2016 the proportion of starts to Universal Credit from males has slowly decreased. 63 per cent of starts made to Universal Credit in July 2016 were from males, and 37 per cent from females, while in February 2016, 69 per cent of starts were from males and 31% from females.

The total number of starts that have been made to Universal Credit in the month up to 14 July 2016 was 37,640. The total number of starts that have been made since Universal Credit began is 424,513.

In the past month, there have been more starts to Universal Credit at Hull Britannia House Jobcentre Plus office than any other (274 people starting).

Oldham Jobcentre Plus office still has the highest cumulative number of starts of any Jobcentre Plus office (7,800).

Regionally the North West saw the most starts this month, closely followed by Central England. As Universal Credit is available to a wider group of people in the North West, the age and gender profile of claimants is different to the other regions. For example 55 per cent of starts from the North West are from males compared to 65 per cent from Central England. Additionally 43 per cent of starts from the North West are from 16-24 year olds compared to 54 per cent from Central England.

Please note the figures for the latest month (July 2016) are provisional (p) and will be finalised in the next release. See the Background Information and Methodology document for more details. See **table 2.1** for summary statistics and [Stat-Xplore](#) for the complete data series.

People on Universal Credit

Almost two-thirds of people on Universal Credit in the searching for work conditionality regime

The number of people on Universal Credit, by conditionality regime, age group and gender, July 2016

There were 303,839 people on Universal Credit as of 14 July 2016. This represents an increase of eight per cent when compared to the number of people on Universal Credit in June 2016.

In July 2016, there were more males on Universal Credit than females (66 per cent compared to 34 per cent). Males aged 25-49 made up 33 per cent of the total Universal Credit figure.

On the 14 July 2016, 64 per cent of people on Universal Credit were in the Searching for Work conditionality regime. Searching for Work is the largest conditionality regime for both genders and all age groups, followed by Working – No Requirements.

Please note that the conditionality breakdown measures what regime an individual is in on the count date. This may not be representative of an individual’s entire assessment period. Conditionality regime figures are not the same as the employment breakdown, which shows whether an individual has had earnings during their assessment period. The two breakdowns should only be used together with caution.

Two fifths of people on Universal Credit are in employment

Percentage of people on Universal Credit who are in employment, July 2016

Of the people on Universal Credit in July 2016, 40 per cent (120,700) were in employment and 60 per cent (183,144) were not in employment.

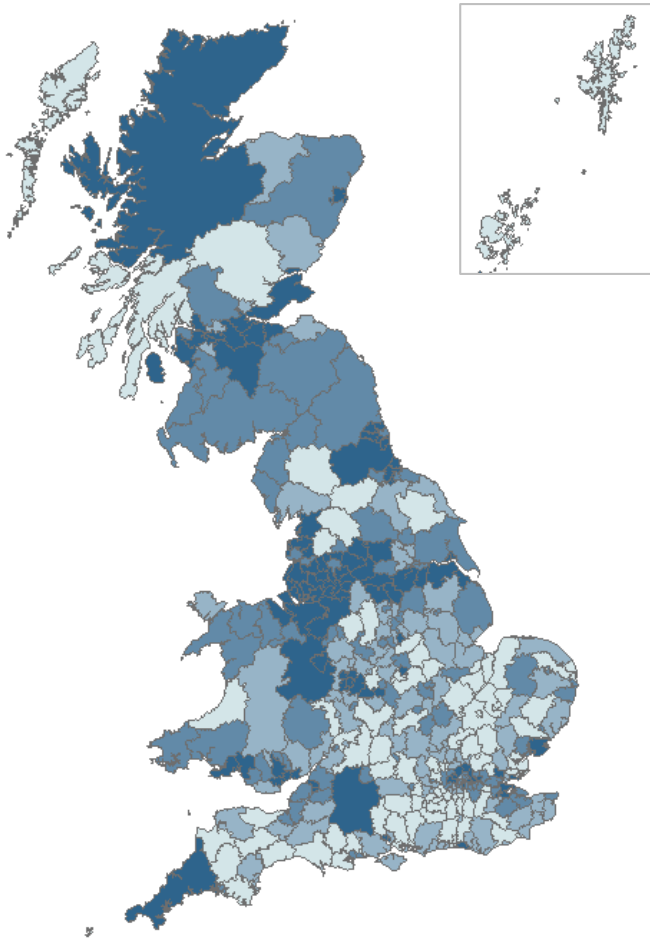

The Jobcentre Plus office with the most people on Universal Credit was Bolton, Blackhorse Street, with 3,414 Universal Credit claimants, followed by Oldham, with 3,224 (breakdowns of people on Universal Credit by Jobcentre Plus office, local authority and parliamentary constituency are available on [Stat-Xplore](#)).

See **tables 3.1-3.3** for summary statistics and [Stat-Xplore](#) for the complete data series.

Please note figures for the latest month (July 2016) are provisional (p) and will be finalised in the next release. See the Background Information and Methodology document for more details.

Where Universal Credit claimants live

The North West, where roll-out started, has the largest number of Universal Credit claimants

The adjacent map shows people on Universal Credit by local authority as at 14 July 2016.

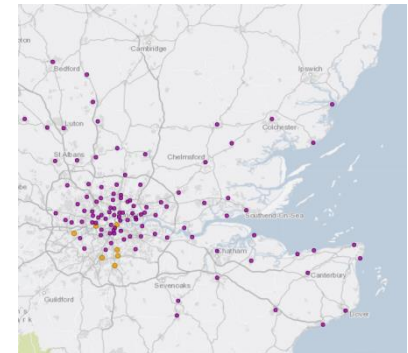

The darker areas of the map are local authorities with high levels of Universal Credit claimants, while the lighter areas are the local authorities with fewer Universal Credit claimants.

Where you live

About these statistics

These official statistics have been compiled using data from systems within local offices and records of Universal Credit benefit payments made by the Department.

This and other new data sources will, in time, allow a progressively wider range of breakdowns to be published as new IT systems are introduced. The methodology used and definitions of the official statistics may be updated within subsequent releases, along with information on the impact of any changes to the time series already released. A [strategy](#) for the release of official statistics on Universal Credit was published in September 2013 and updated in February 2016.

These statistics have been developed using guidelines set out by the UK Statistics Authority, and are new official statistics undergoing evaluation. They have, therefore, been designated as [Experimental Statistics](#). Users are invited to [comment](#) on the development and relevance of these statistics at this stage.

Universal Credit is now available in all Jobcentre Plus offices to single claimants, and is being expanded across the country to include all claimant types via the full service. See **table 4.1** for a full list of Jobcentre Plus offices by the date they implemented Universal Credit.

Further roll out

Universal Credit was introduced in April 2013 in certain pathfinder areas of North West England. Since October 2013, it has progressively been rolled out to other areas. It is now available in all Jobcentre Plus offices to single claimants.

A limited test of the full service for Universal Credit was launched in Sutton, South London, on 26 November 2014, and expanded into Croydon (10 June 2015), Southwark (4 November 2015), Purley (27 April 2016) and Thornton Heath (27 April 2016) in South London and Great Yarmouth (27 April 2016) in East Anglia. Claimants in these areas will manage their Universal Credit claim online to monitor payments, communicate with their work coach and record work search progress. Please note that this publication does not currently include statistics covering these areas.

The full service for Universal Credit was introduced into Hounslow, West London, on 27 January 2016, and Musselburgh, East Scotland, on 23 March 2016. Figures for Hounslow and Musselburgh in this publication include claimants who were on Universal Credit prior to the move to full service and some, but not all who have transferred to full service. The figures do not include claimants who have submitted a new claim via the full service. We anticipate that complete full service data will be included as quality assurance of data from the Universal Credit systems progresses.

From May 2016 Universal Credit full service began its roll out to all other Jobcentre Plus offices and expanded across the country to include all claimant types.
