

The table below shows estimated capacity of selected renewable technologies in 2020/21 after cost control measures are implemented, compared with the expected deployment ranges published in the 2013 EMR Delivery Plan.

Deployment is in GW, and includes delivery under Contracts for Difference, the Renewables Obligation and Investment Contracts.

**2020/21 Deployment**

	TOTAL with cost control	EMR Delivery Plan range
<b>Offshore wind*</b>	10.2	8 – 15
<b>Onshore wind</b>	12.3	11 – 13
<b>Solar</b>	5.7	2.4 – 4
<b>Biomass Conversions</b>	2.2	1.7 – 3.4

\*excludes Hornsea phase 3, capacity 320 MW as TCD is after 2020/21
