Sore throat no trend above baseline levels
Diarrhoea no trend above baseline levels
Vomiting no trend above baseline levels
Eye problems no trend above baseline levels
Heatstroke decreasing similar to baseline levels

*Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

Data summary:

Year	Week	Total calls
2016	35	220,585

X Public Health England

06 September 2016

1: Total calls.

The total number of syndromic calls recorded each day by NHS 111.

Remote Health Advice

06 September 2016	Year: 2016 Week: 35
Introduction to charts:	 Weekends and bank holidays are marked by vertical grey lines (bank holidays darker grey). A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified. Baselines are constructed using historical data, including data from both NHS111 and the NHS Direct syndromic system (which was replaced by NHS 111 data in September 2013). Seasonal trends reflect the average over past years, with levels adjusted to reflect differences between NHS 111 and NHS Direct data. This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins. NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.
Notes and further information:	Further information about NHS 111 can be found at: http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance: https://www.gov.uk/government/collections/syndromic-surveillance-systems- and-analyses
