Syndromic Surveillance System: England

24 May 2016		Year: 2016 Wee	k: 20
In This Issue:	Key messages	Data to: 22 May 2016	
Key messages.		-	
Syndromic indicators at a glance.	NHS 111 eye problem calls in the 5-14 years age group remain elevated week 20 in line with recent tree pollen activity (figure 9a).		d in
Data summary.			
Indicators by syndrome.			
Cold/flu.			
Fever.			
Cough.			
Difficulty Breathing.			
Sore throat.			
Diarrhoea.			
Vomiting.			

Syndromic indicators at a glance:

Indicator	Trend	Level *
Cold/flu	no trend	similar to baseline levels
Fever	no trend	similar to baseline levels
Cough	decreasing	above baseline levels
Difficulty breathing	no trend	above baseline levels
Sore throat	no trend	above baseline levels
Diarrhoea	no trend	above baseline levels
Vomiting	no trend	above baseline levels
Eye problems	no trend	above baseline levels
Heatstroke	no trend	similar to baseline levels

*Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

Data summary:

Year	Week	Total calls
2016	20	213,103

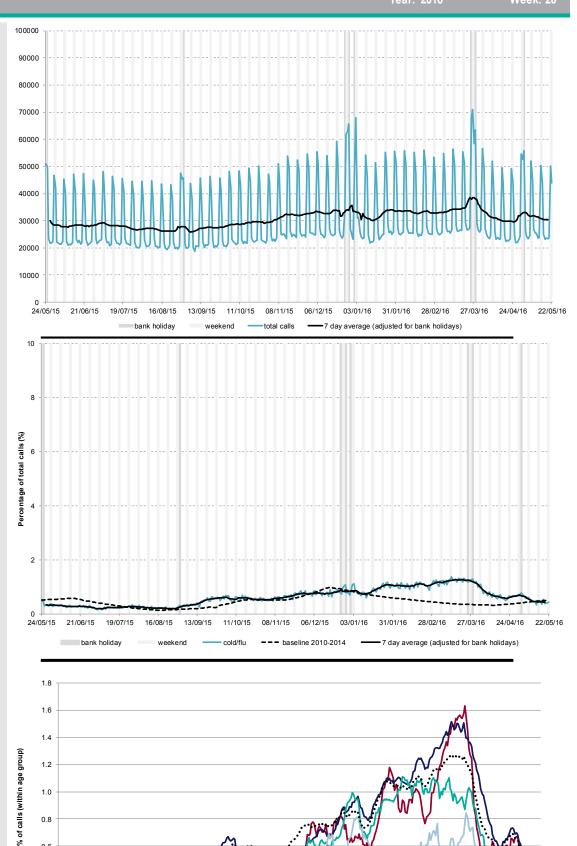

繱 Public Health England

24 May 2016

1: Total calls.

The total number of syndromic calls recorded each day by NHS 111.

4a: Cough calls by age group

Cough calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

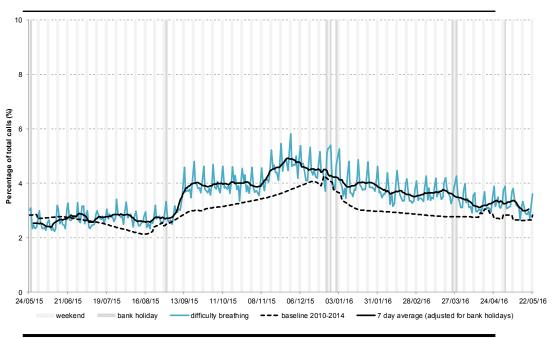

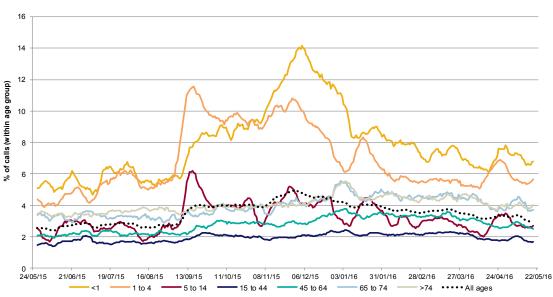

5: Difficulty breathing

Daily 'difficulty breathing' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

Difficulty breathing calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

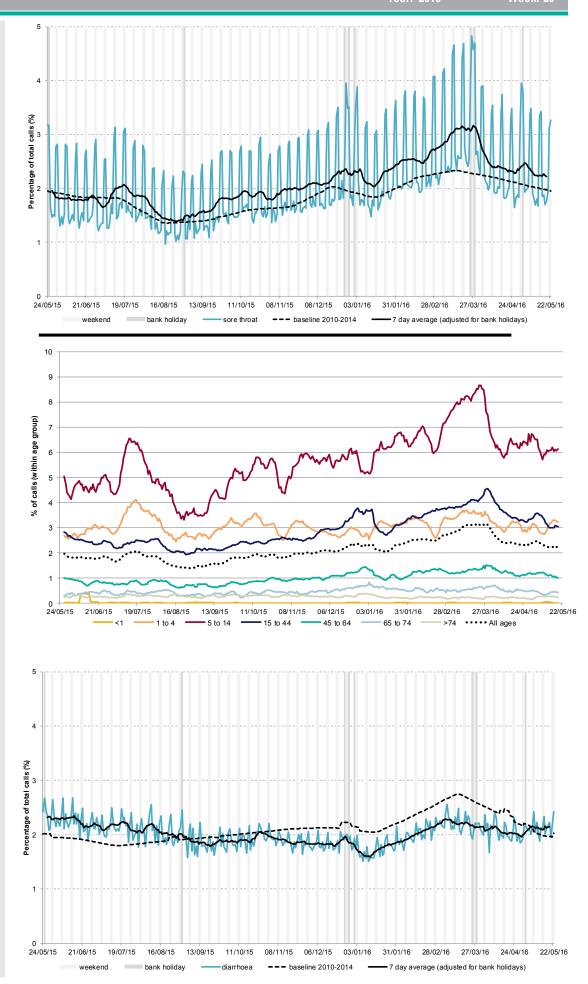

Remote Health Advice

6: Sore throat

Daily 'sore throat' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

6a: Sore throat by age group

Sore throat calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

7: Diarrhoea

Daily 'diarrhoea' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

24 May 2016	Year: 2016 Week: 20
Introduction to charts:	 Weekends and bank holidays are marked by vertical grey lines (bank holidays darker grey).
	• A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.
	 Baselines are constructed using historical data, including data from both NHS111 and the NHS Direct syndromic system (which was replaced by NHS 111 data in September 2013). Seasonal trends reflect the average over past years, with levels adjusted to reflect differences between NHS 111 and NHS Direct data.
	 This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins.
	• NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.
Notes and further	
Notes and further information:	Further information about NHS 111 can be found at:
	http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx
	The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:
