

FARM BUSINESS INCOME: England 2014/15

All Farm types:
£39,700 per farm

The improved weather led to a return to more usual cropping patterns and yields. On livestock farms this led to improve grazing conditions and productivity from the 2014 lamb crop.

The higher value of the pound against the euro led to a lower Single Payment and had a negative impact on prices as domestic production had to compete with cheaper imports and alternative suppliers for export markets.
