BACKGROUND AND NOTES FOR GUIDANCE

A programme of inspections of GMP Compliance monitoring for UK contract GMP Quality Control Testing Laboratories has been in place since 2005. These laboratories perform quality control testing for products that are manufactured in accordance with EU GMP and as a result are inspected against EU GMP as they apply to a contract laboratory.

Contract laboratories do not hold their own licence, but are named by manufacturing and product licence holders as a contract laboratory performing quality control testing on their behalf. It is acknowledged that there are a number of manufacturing licence and manufacturing authorisation holders that also offer contract quality control testing to GMP; these sites are not captured within this list.

This document does not include NHS laboratories.

The inspection cycle for UK contract GMP Laboratories is within a 3 year period. All laboratories listed within this document have been issued with a GMP certificate.

For further information and guidance to UK manufacturer's licence and manufacturer's authorisation (for investigational medicinal products) holders on the use of stand alone contract laboratories.
