Explanatory Note

This document contains details of the amendments that comprise Additional Provision 5 (AP5) and require additional powers under the Bill. Each page makes reference to a specific amendment and contains the following:

1. Constituency
2. AP ES reference no.
This is the number that has been used in the ES. The ES may indicate a higher number of changes than referred to in this document. This is due to the fact that some of the changes do not require additional powers under the Bill and therefore form part of the Supplementary Environmental Statement (SES).
3. Location and associated map
This describes the general location of each change, including details of the Local Authority and/or Parish affected.
4. Description of the amendment
Provides details as to what the additional powers are required for.
5. The reason for the amendment
This is categorised as either an improvement to the design by the promoter or in response to a landowner or petitioner request.
6. The number of affected landowners
This provides the number of landowners already affected by the Bill and those newly affected as a result of the amendment. Affected land means land where a new interest in the land is being acquired; it does not relate to changed environmental impacts.
7. Parliamentary plan
Shows an extract of the draft Parliamentary plan or plans affected by the amendment. Where additional land is affected by the amendment it is coloured purple. The different shades of purple indicate the different land parcels affected. The land parcels are created according to the powers sought and land ownership.
