

## **Addendum to ACMD's report on methylphenidate-based NPS**

On 31 March 2015 the Advisory Council on the Misuse of Drugs (ACMD) provided advice to the then Minister of State for Crime Prevention, recommending a Temporary Class Drug Order (TCDO) on a number of methylphenidate-based NPS.

The ACMD recommends an amendment to the recommendation in that report, so that the control of these compounds is extended to all salts, including all stereoisomeric forms, and preparations or products.

### **Revised Paragraph 35**

The control of these compounds should extend to all salts, including all stereoisomeric forms, and preparations or products.
