

**FOI Release**  
***Information released under the Freedom of Information Act***

**Title:** Trade mark registration stats

**Date of release:** 19 September 2014

**Information request:**

1. How many trade marks are registered in the UK?
2. How many Community trade marks are registered?
3. How many proprietors (i.e. trade mark owners) are there in the UK? This is on the basis that one proprietor may have registered several trade marks.

**Information released:**

1. There are 501,336 UK trade mark registrations to date.
2. We do not hold Community trade mark figures. You would have to obtain them from OHIM.
3. There are 217497 Owners recorded against the registered (in force) trade marks. However, this comes with a caveat. Owners may have more than 1 'Client ID' record held with the IPO and of course some may have multiple registrations.
