

Dear Sir/Madame

With respect to your request for feedback on the four Inner Thames Estuary study outputs, published in July, in particular relating to any factual errors or new information, the members of the Heathrow Airline Community, including the three alliances operating from the airport namely STAR, oneworld and Skyteam, note the findings contained within these studies, and do not have any specific further comments to make at this stage. We have noted the comprehensive and rigorous approach being adopted by the Airport Commission and we hope that the evidence presented will enable a timely decision to be made regarding the value of this capacity option.

Please acknowledge receipt.

Best Regards
