Key messages

NHS 111 calls for cold/flu remained stable during week 1 (figure 2), whilst there were further decreases in cough and difficulty breathing calls (figures 4 and 5).

There was a small increase in vomiting, particularly noted in children aged <5 years (figure 8 and 8a).

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance team will be monitoring the impact of cold weather on syndromic surveillance data during this period.

Cold weather alert level (current reporting week): Level 1– Winter preparedness http://www.metoffice.gov.uk/weather/uk/coldweatheralert/

Syndromic indicators at a glance:

Indicator	Trend	Level *
Cold/flu	No trend	Similar to baseline levels
Fever	No trend	Below baseline levels
Cough	Decreasing	Similar to baseline levels
Difficulty breathing	Decreasing	Above baseline levels
Sore throat	No trend	Above baseline levels
Diarrhoea	Decreasing	Below baseline levels
Vomiting	Increasing	Below baseline levels
Eye problems	Increasing	Above baseline levels

^{*}Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

Data summary:

Year	Week	Total calls
2016	1	228,611

12 January 2016 100000 1: Total calls. 90000 The total number of syndromic calls 80000 recorded each day by NHS 111. 70000 60000 50000 40000 30000 20000 10000 13/12/15 10/01/16 08/02/15 08/03/15 05/04/15 03/05/15 31/05/15 28/06/15 18/10/15 15/11/15 11/01/15 26/07/15 23/08/15 20/09/15 ·7 day average (adjusted for bank holidays) bank holiday total calls weekend 2: Cold/flu Daily 'cold/flu' calls as a percentage of total calls. Baselines are constructed from Percentage of total calls (%) historical data since 2010, including data from NHS 111 and NHS Direct. 11/01/15 08/02/15 08/03/15 05/04/15 03/05/15 31/05/15 28/06/15 26/07/15 23/08/15 20/09/15 18/10/15 15/11/15 13/12/15 10/01/16 bank holiday --- baseline 2010-2014 7 day average (adjusted for bank holidays) 3: Fever Daily 'fever' calls as a percentage of total calls. Baselines are Percentage of total calls (%) constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

2

12 January 2016 Year: 2016 Week: 1

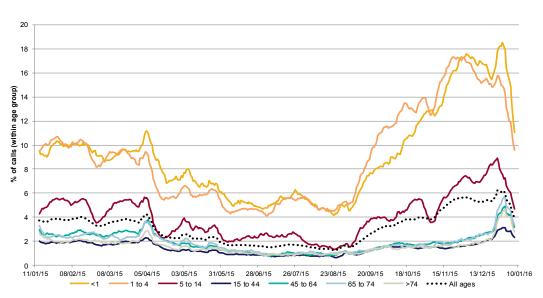

4: Cough

Daily 'cough' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

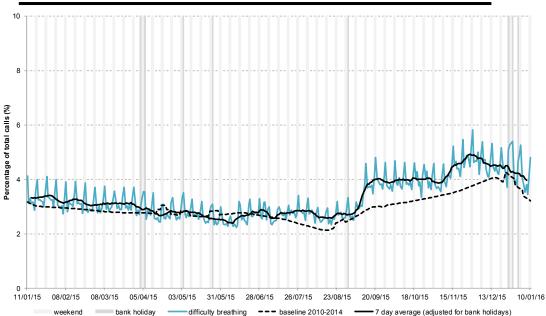

4a: Cough calls by age group

Cough calls as a percentage of total calls within each age group, shown as a 7 day moving average.

5: Difficulty breathing

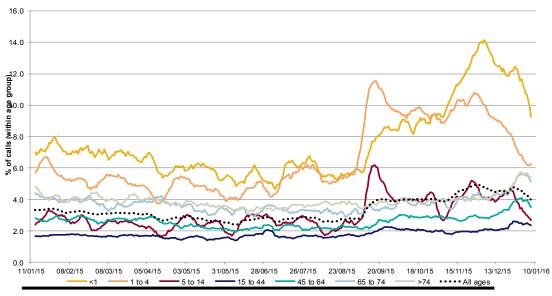

Daily 'difficulty breathing' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

12 January 2016 Year: 2016 Week: 1

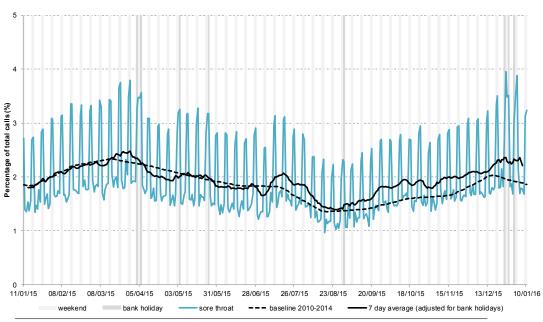

5a: Difficulty breathing calls by age group

Difficulty breathing calls as a percentage of total calls within each age group, shown as a 7 day moving average.

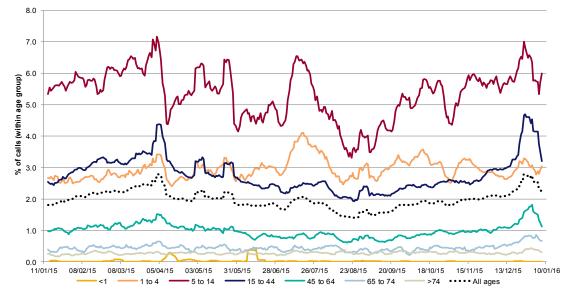

6: Sore throat

Daily 'sore throat' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

6a: Sore throat by age group

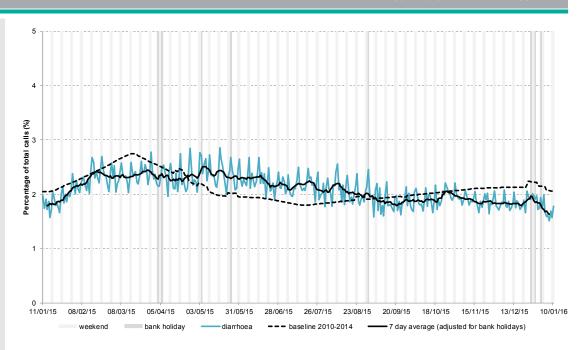

Sore throat calls as a percentage of total calls within each age group, shown as a 7 day moving average.

12 January 2016 Year: 2016 Week: 1

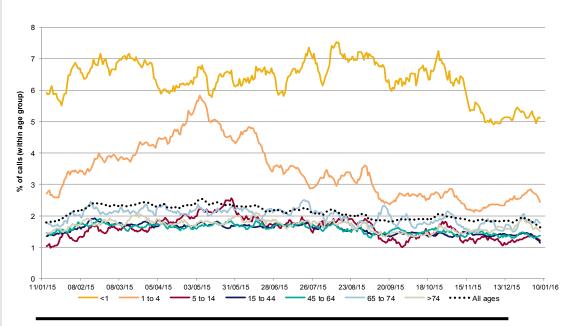

7: Diarrhoea

Daily 'diarrhoea' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

7a: Diarrhoea by age group

Diarrhoea calls as a percentage of total calls within each age group, shown as a 7 day moving average.

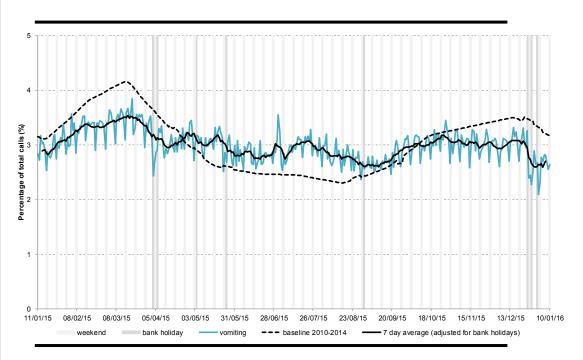

Intentionally blank

12 January 2016 Year: 2016 Week: 1

Intentionally blank

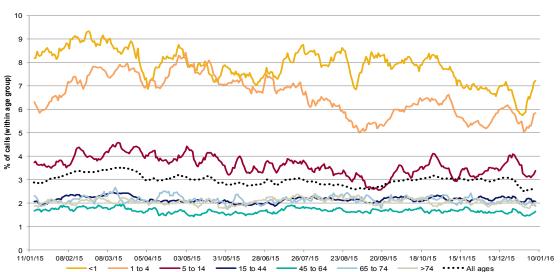

8: Vomiting

Daily 'vomiting' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

8a: Vomiting by age group

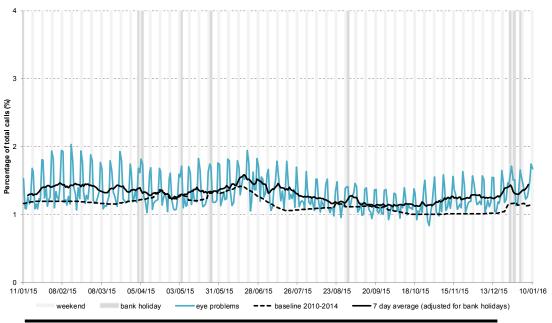

Vomiting calls as a percentage of total calls within each age group, shown as a 7 day moving average.

12 January 2016 Year: 2016 Week: 1

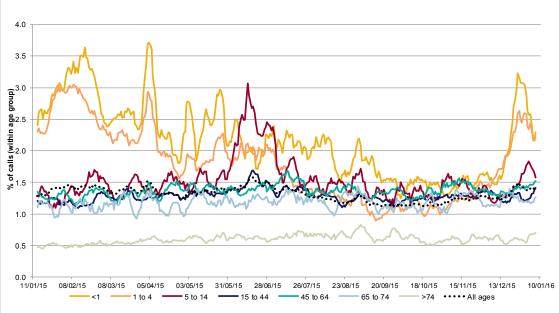

9: Eye problems

Daily 'eye problems' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

9a: Eye problems by age group

Eye problems calls as a percentage of total calls within each age group, shown as a 7 day moving average.

Intentionally blank

12 January 2016 Year: 2016 Week: 1

Introduction to charts:

- Weekends and bank holidays are marked by vertical grey lines (bank) holidays darker grey).
- A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.
- Baselines are constructed using historical data, including data from both NHS111 and the NHS Direct syndromic system (which was replaced by NHS 111 data in September 2013). Seasonal trends reflect the average over past years, with levels adjusted to reflect differences between NHS 111 and NHS Direct data.
- This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins.
- NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.

Notes and further information:

Further information about NHS 111 can be found at:

http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx

The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:
