

Annex B: Impact Assessment - Channeling Positivity

We have looked at the 9 existing Pupil Referral Units and AP free schools within a 15 mile radius from the site of the Channeling Positivity free school. None of the existing providers are within 1.5 miles of the proposed site for the Channeling Positivity free school. The nearest provider Stone Soup Academy serves schools within the city of Nottingham. Channeling Positivity will not serve the city schools as the distance to travel for students is too great and highly inappropriate. Channeling Positivity's curriculum focus is much broader than the offer at Stone Soup Academy and based on this we consider the new Channeling Positivity free school will have only a minimal impact on existing provision.
