

03 November 2015

Update of the online Health Profiles

Users of PHE's local authority Health Profiles have asked for the data to be as up to date as possible. Therefore the indicators in the online Health Profiles (<http://fingertips.phe.org.uk/profile/health-profiles>) are now being updated quarterly at the same time as the Public Health Outcomes Framework (PHOF) indicators. This will improve the timeliness of the Health Profiles indicators, and will also increase their consistency with PHOF and other PHE products.

Indicators updated in the online Health Profiles on 3rd November 2015 are as follows:

- Violent crime (violence offences)
- Smoking status at time of delivery
- Breastfeeding initiation
- Smoking prevalence
- Obese adults
- Excess weight in adults
- Incidence of TB
- Suicide rate
- Under 75 mortality rate: cardiovascular
- Under 75 mortality rate: cancer
- Killed and seriously injured on roads

See Table 1 for further details on the indicators being updated.

If you have any questions about the Health Profiles please contact healthprofiles@phe.gov.uk.

Table 1
Data to be included in 03 November online Health Profiles update

Data for the indicators listed below will be added to the Health Profiles data tool as part of the November update - see <http://fingertips.phe.org.uk/profile/health-profiles>.

All indicators are provided for both tiers of Local Authorities unless otherwise stated.

Health Profiles indicator number	Health Profiles indicator name	Time period added	Updated specifically for HP?	Already in public domain in exact format?
5	Violent crime (violence offences)	2014/15	Updated data, also published in PHOF	No, produced by PHE
