

15 September 2015

Year: 2015 Week: 37

## In This Issue:

- Key messages.
- Diagnostic indicators at a glance.
- GP practices and denominator population.
- National syndromic indicators.
- Notes and further information.
- Appendix.

## Key messages

Data to: 13 September 2015

There continue to be slight increases in selected respiratory indicators during week 37 including upper respiratory tract infection, pharyngitis, asthma and wheeze consultations (figures 1, 3, 10,11).

A Heat-Health Watch system operates in England from 1 June to 15 September each year. As part of the Heatwave Plan for England, the PHE Real-time Syndromic Surveillance team will be routinely monitoring the public health impact of hot weather using syndromic surveillance system during this period.

Heat-health watch level (current reporting week): level 1 [Summer preparedness](http://www.metoffice.gov.uk/weather/uk/heathealth/)  
<http://www.metoffice.gov.uk/weather/uk/heathealth/>

## Diagnostic indicators at a glance:

Indicator	Trend	Level
Upper respiratory tract infection	increasing	below baseline levels
Influenza-like illness	no trend	similar to baseline levels
Pharyngitis	increasing	similar to baseline levels
Scarlet fever	no trend	similar to baseline levels
Lower respiratory tract infection	no trend	similar to baseline levels
Pneumonia	no trend	similar to baseline levels
Gastroenteritis	no trend	similar to baseline levels
Vomiting	increasing	similar to baseline levels
Diarrhoea	no trend	above baseline levels
Severe asthma	increasing	similar to baseline levels
Wheeze	increasing	above baseline levels
Allergic rhinitis	no trend	
Conjunctivitis	no trend	below baseline levels
Mumps	no trend	below baseline levels
Measles	no trend	similar to baseline levels
Rubella	no trend	similar to baseline levels
Pertussis	increasing	above baseline levels
Chickenpox	no trend	similar to baseline levels
Herpes zoster	no trend	similar to baseline levels
Cellulitis	no trend	above baseline levels
Impetigo	no trend	similar to baseline levels
Heat/sunstroke	no trend	similar to baseline levels
Insect Bites	decreasing	above baseline levels

## GP practices and denominator population:

Year	Week	GP Practices Reporting**	Population size**
2015	37	4364	32.8 million

\*\*based on the average number of practices and denominator population in the reporting working week.

## 1: Upper respiratory tract infection (URTI)

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 1a: Upper respiratory tract infection (URTI) by age

Average daily incidence rate by week per 100,000 population (all England)

Intentionally left blank

\* 7-day moving average adjusted for bank holidays.

Intentionally left blank

## 2: Influenza-like illness (ILI)

Daily incidence rates (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 3: Pharyngitis or scarlet fever

Daily incidence rates (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

## 4: Scarlet fever

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, based on a population denominator of approximately 5.5 million patients).

Intentionally left blank

Intentionally left blank

## 5: Lower respiratory tract infection (LRTI)

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

## 6: Pneumonia

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 6a: Pneumonia by age

Average daily incidence rate by week per 100,000 population (all England)

Intentionally left blank

\* 7-day moving average adjusted for bank holidays.

Intentionally left blank

## 7: Gastroenteritis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 8: Vomiting

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

15 September 2015

Year: 2015 Week: 37

## 8a: Vomiting by age

Average daily incidence rate by week per 100,000 population (all England)

## 9: Diarrhoea

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 9a. Diarrhoea by age

Average daily incidence rate by week per 100,000 population (all England)

\* 7-day moving average adjusted for bank holidays.

## 10: Severe asthma

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 10a: Severe asthma by age

Average daily incidence rate by week per 100,000 population (all England)

## 11: Wheeze

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

15 September 2015

Year: 2015 Week: 37

## 12: Allergic rhinitis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

Intentionally left blank

Intentionally left blank

## 13: Conjunctivitis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

## 14: Mumps

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 15: Measles

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 16: Rubella

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

## 17: Pertussis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 18: Chickenpox

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 19: Herpes zoster

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

## 20: Cellulitis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 21: Impetigo

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 22: Intentionally left blank

Intentionally left blank.

\* 7-day moving average adjusted for bank holidays.

## 23: Heat/sunstroke

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 24: Insect Bites

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 25: Intentionally left blank

Intentionally left blank.

\* 7-day moving average adjusted for bank holidays.

## Notes and further information

- The Public Health England GP in hours surveillance system is a syndromic surveillance system monitoring community-based morbidity recorded by GP practices.
- GP consultation data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.
- This system captures anonymised GP morbidity data from two GP clinical software systems, EMIS, from version 1 of the QSurveillance® database, and TPP SystemOne.
- Historic baselines are smoothed to remove bank holiday effects. Data from 2009 has been excluded for selected indicators which were affected by the H1N1 influenza pandemic. No baseline is currently included for allergic rhinitis.
- The appendix illustrates weekly GP in hours consultation data for influenza-like illness (ILI). Each PHE Centre is represented by a thematic map showing its constituent local authorities (LA) coloured according to the weekly consultation rate of ILI per 100,000 population. LAs where less than 5 cases of ILI have been reported are suppressed and illustrated as no data.
- The maps on the following pages contains Ordnance Survey data © Crown copyright and database right 2014. Contains National Statistics data © Crown copyright and database right 2014.

## Acknowledgements:

---

We thank and acknowledge the University of Nottingham, ClinRisk® and the contribution of EMIS and EMIS practices. Data source: version 1 of the QSurveillance® database.

We thank TPP, ResearchOne and the SystemOne GP practices contributing to this surveillance system.
