Charles

Thanks for the comments re the water supply section of the Posford report. I am pleased Mr Little found a few useful points too. Do send any more as and when they arrive as time is short.

Re the meeting on Friday week: up to you of course, but I wonder if you had considered asking your conservation adviser John Topp to attend. I don't know if you showed him the report (or will show him the revised one when it comes, which might be more useful) but he commonly has some sensible comments to make too. With the main aim being to make a scientifically 'bullet-proof' report to issue at the end of it all, he might have a sensible suggestion or two for you?

Best wishes
