

28 February 2017

Year: 2017 Week: 08

In This Issue:

- Key Messages.
- Weekly summary.
- Total contacts.
- Syndromic indicators.
- Notes and caveats.
- Further information.
- Acknowledgements.

Syndromic indicators at a glance:

Number of contacts and percentage of Read coded contacts.

1: Total out-of-hours contacts:

Daily total number of out-of-hours and unscheduled contacts and 7 day average (adjusted for bank holidays).

Key messages

Data to: 26 February 2017

GP out of hours consultations for respiratory conditions continued to decrease during week 8.

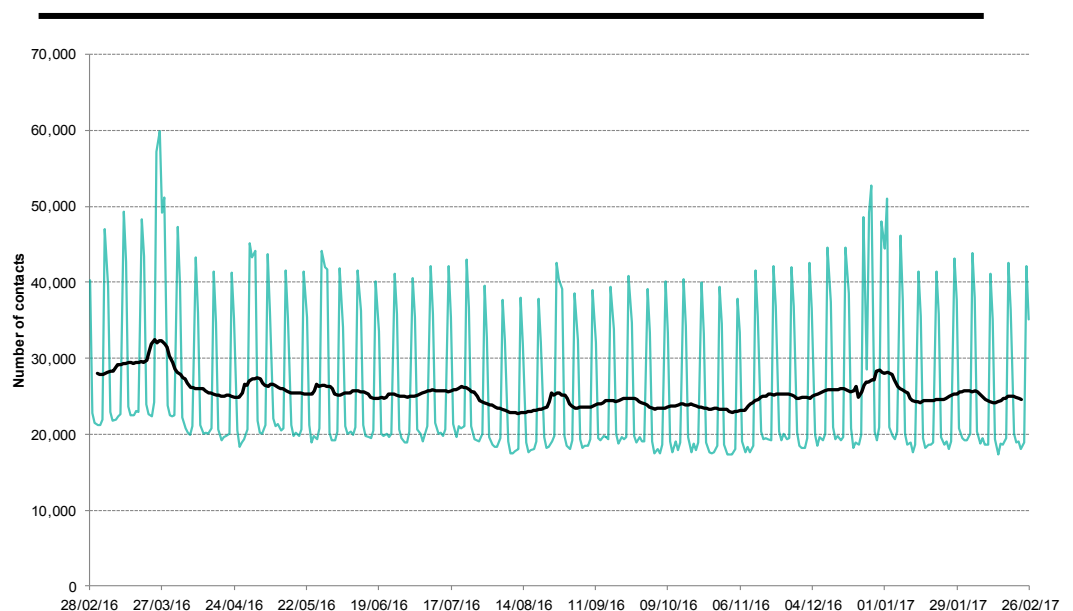

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance Team will be monitoring the impact of cold weather on syndromic surveillance data during this period.

Cold weather alert level (current reporting week): **Level 1 Winter preparedness - 2 Alert and readiness**

<http://www.metoffice.gov.uk/weather/uk/coldweatheralert/>

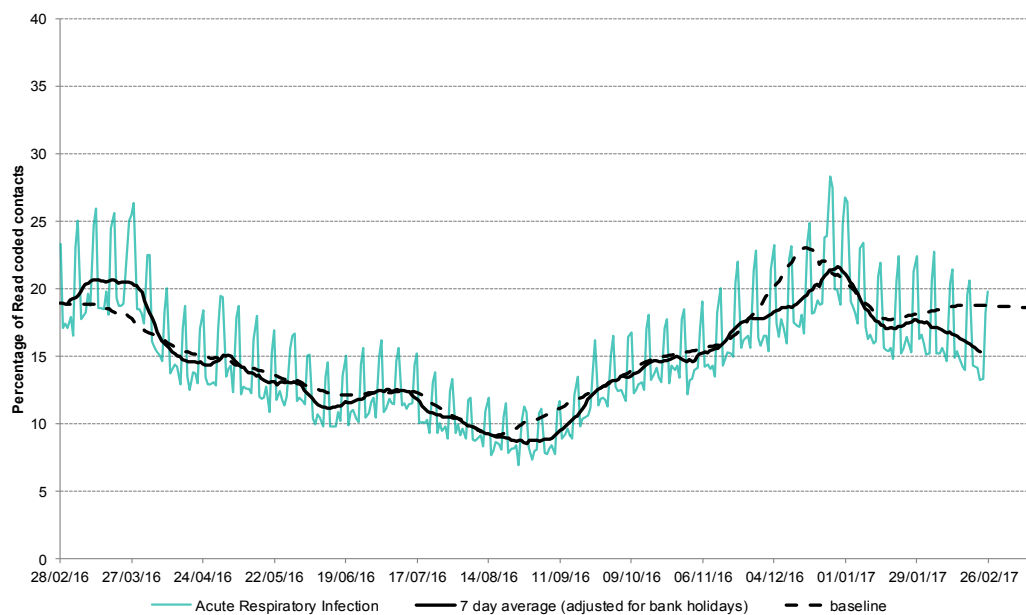

Key indicator	No. of contacts	% Week 08	% Week 07	Trend*
All OOH contacts, all causes	171,977			
Acute respiratory infection	13,864	16.32	17.32	↓
Influenza-like illness	193	0.23	0.26	↓
Bronchitis/bronchiolitis	203	0.24	0.25	↓
Difficulty breathing/wheeze/asthma	1,659	1.95	2.08	↓
Pharyngitis	95	0.11	0.11	↔
Gastroenteritis	3,972	4.68	4.74	↑
Diarrhoea	976	1.15	1.07	↑
Vomiting	1,301	1.53	1.59	↔
Myocardial infarction	948	1.12	1.01	↔

*Trend: reports on the trend seen over previous weeks in the percentage of Read coded contacts.

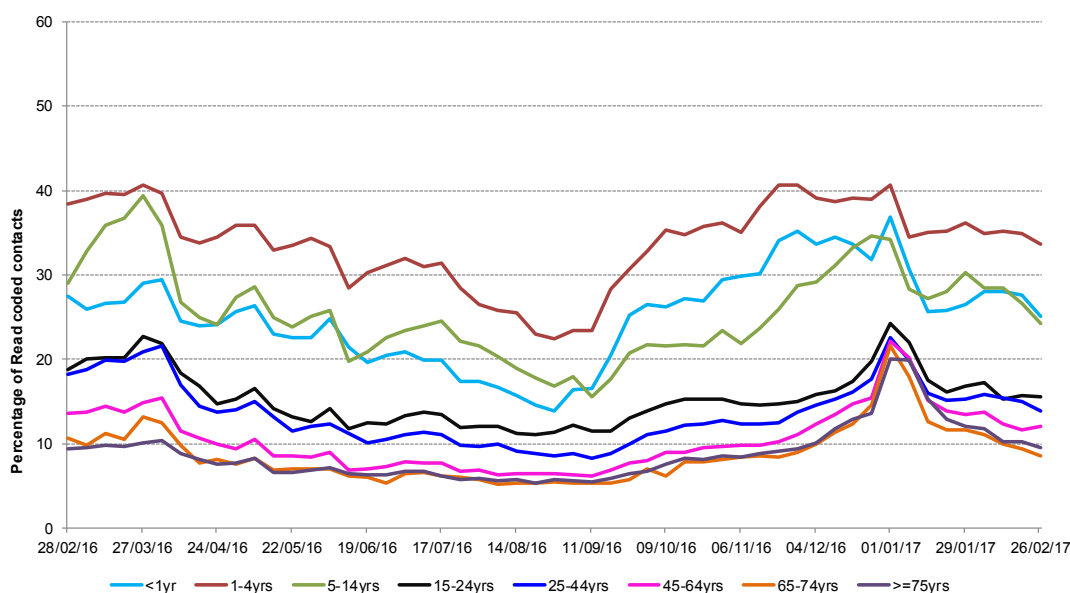

2: Acute Respiratory Infection daily contacts.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

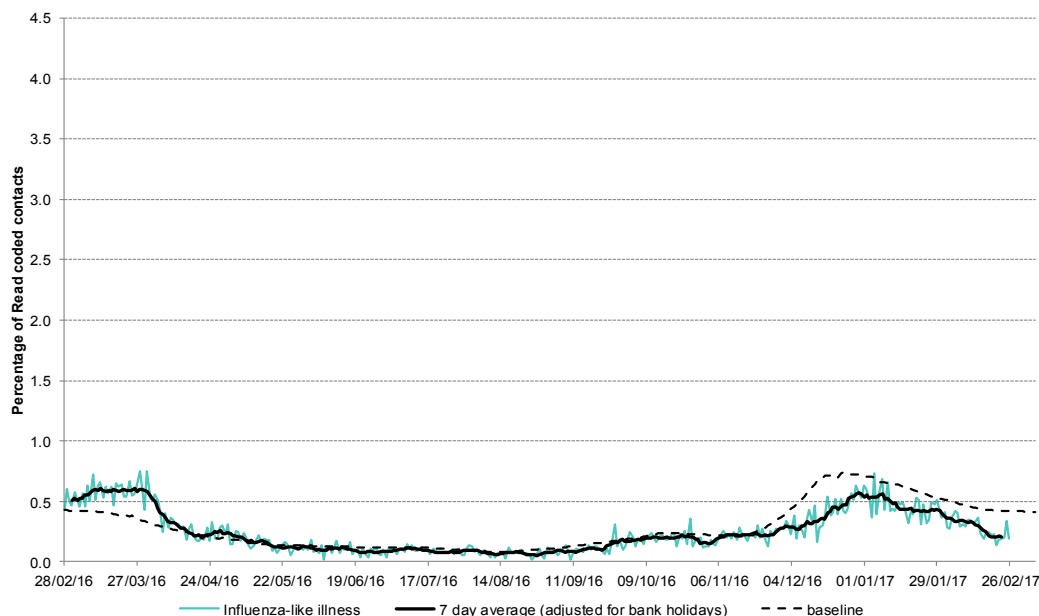

2a: Acute respiratory infection weekly contacts by age group.

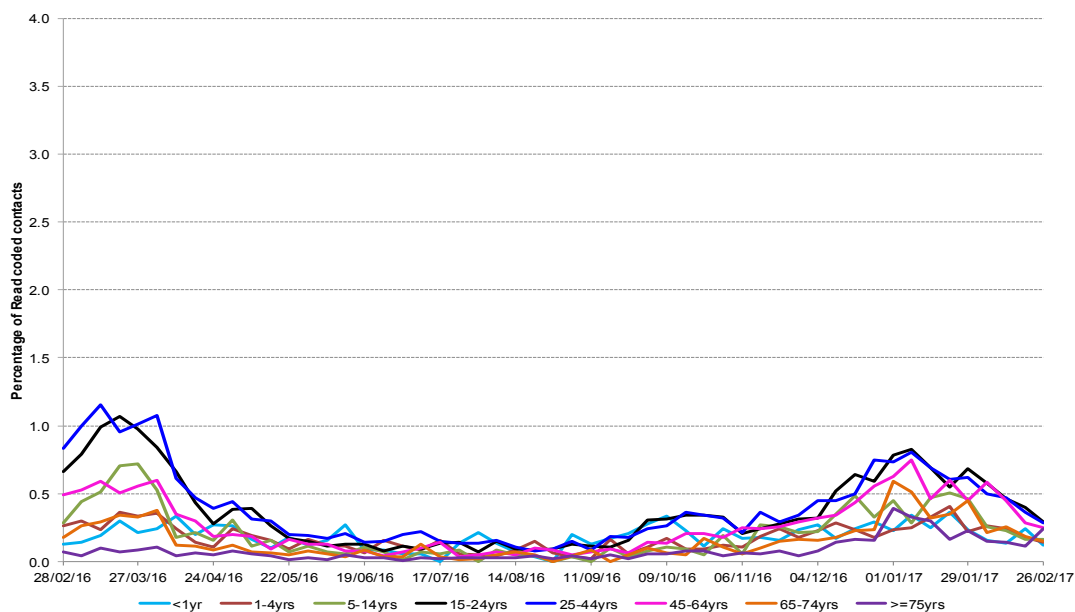

3: Influenza-like illness daily contacts.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

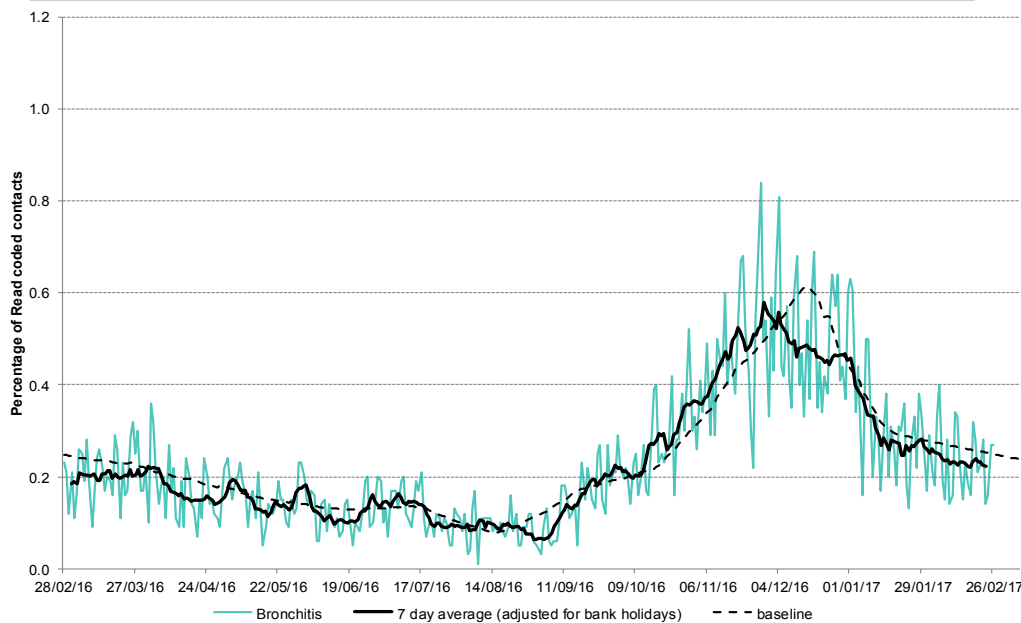

*7-day moving average adjusted for bank holidays.

4a: Influenza-like illness weekly contacts by age group.

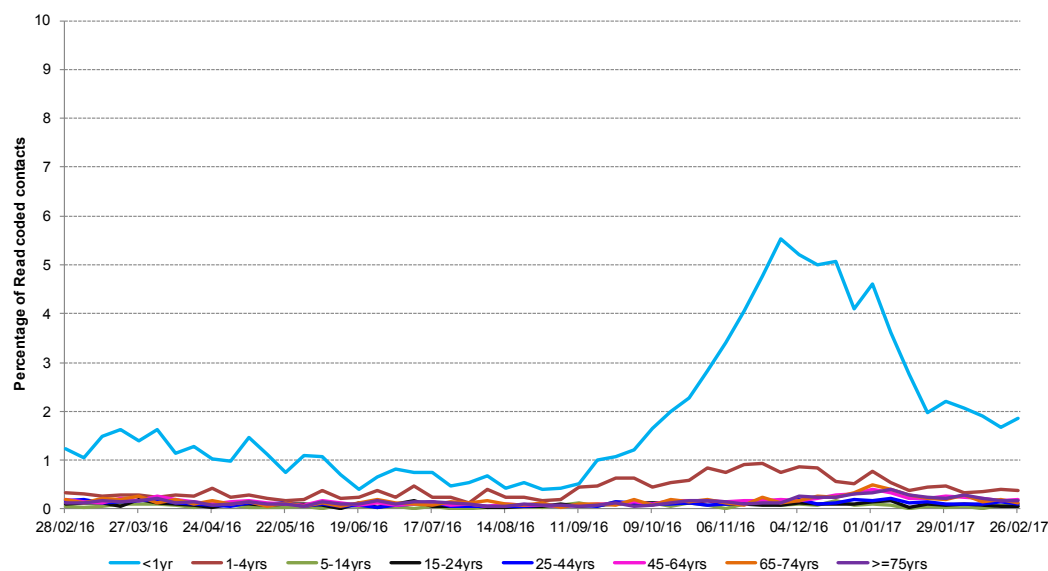

4: Bronchitis/ bronchiolitis daily contacts.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

4a: Bronchitis/ bronchiolitis weekly contacts by age group.

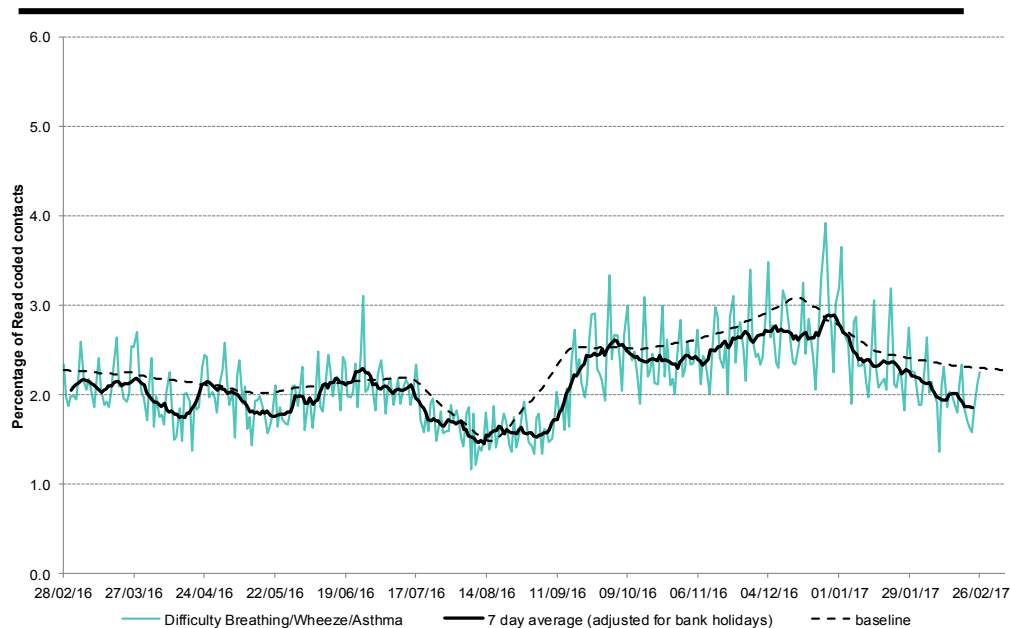

*7-day moving average adjusted for bank holidays.

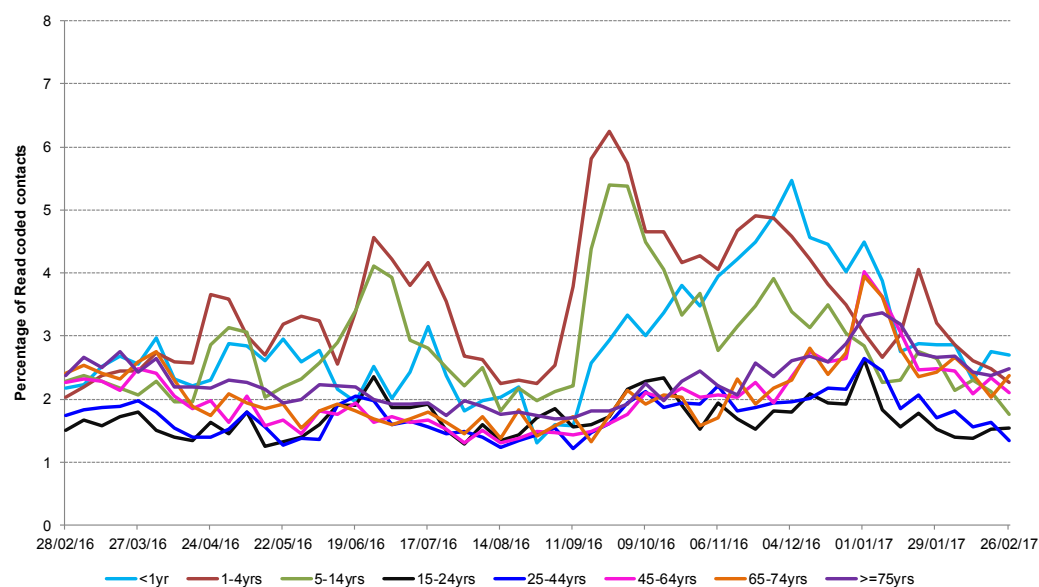

Intentionally left blank.

**5: Difficulty breathing/
wheeze/asthma daily
contacts.**

Shown as a percentage
of the total contacts with
a Read code and as a 7
day average*.

**5a: Difficulty
breathing/wheeze/
asthma weekly
contacts by age
group.**

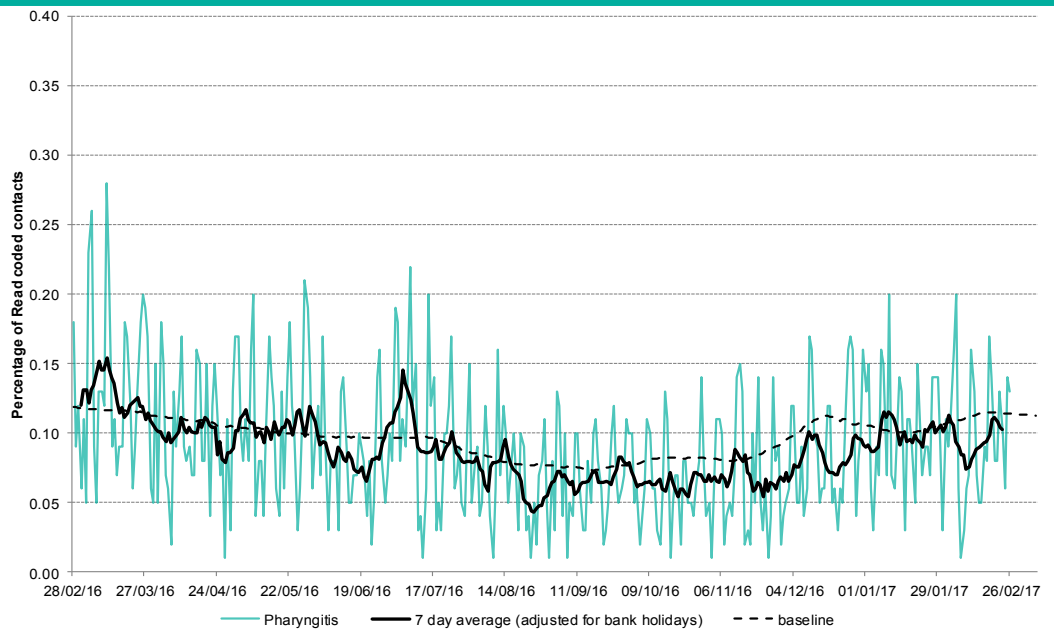

*7-day moving average
adjusted for bank
holidays.

Year: 2017 Week: 08

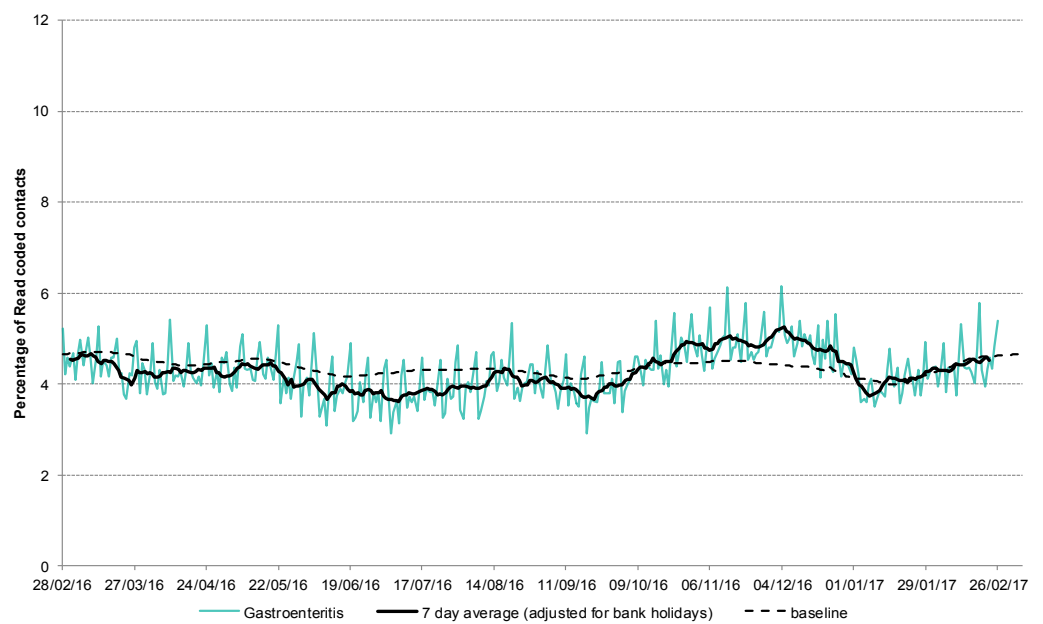

6: Acute pharyngitis and persistent sore throat.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

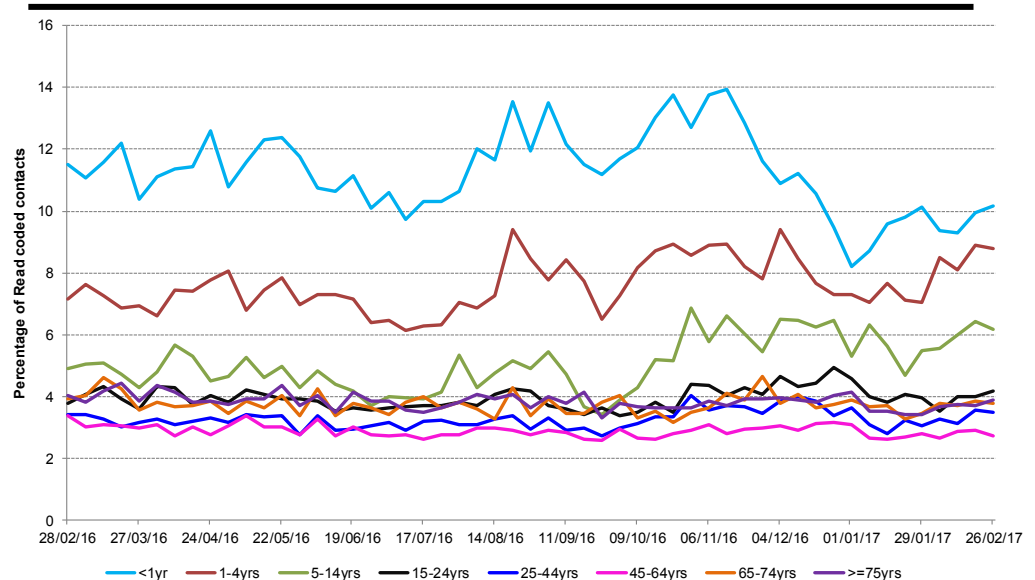

7: Gastroenteritis daily contacts

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

7a: Gastroenteritis weekly contacts by age group.

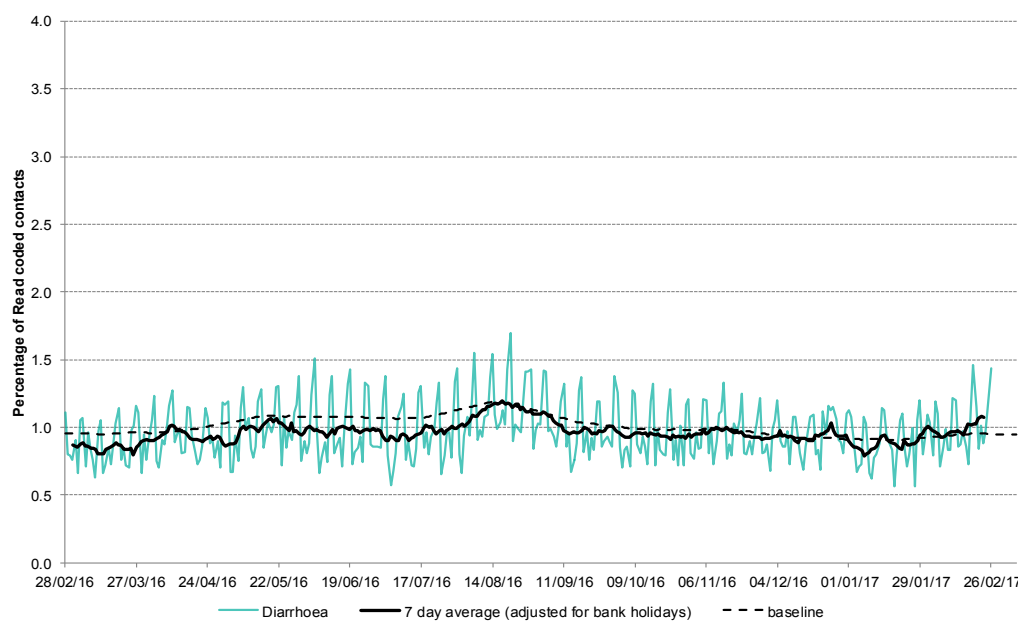

*7-day moving average adjusted for bank holidays.

28 February 2017

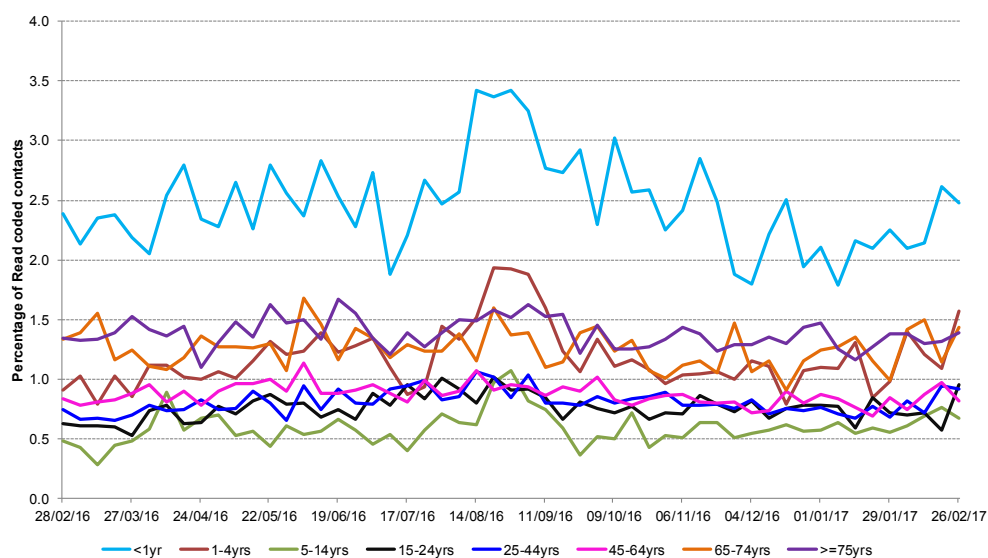

Year: 2017 Week: 08

8: Diarrhoea daily contacts.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

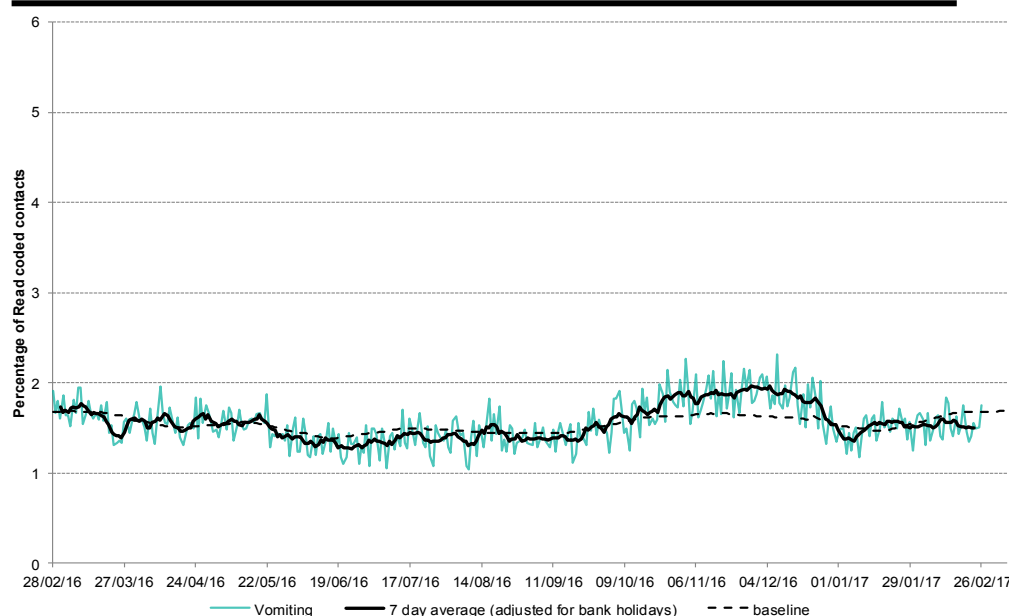

8a: Diarrhoea weekly contacts by age group.

9: Vomiting daily contacts.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

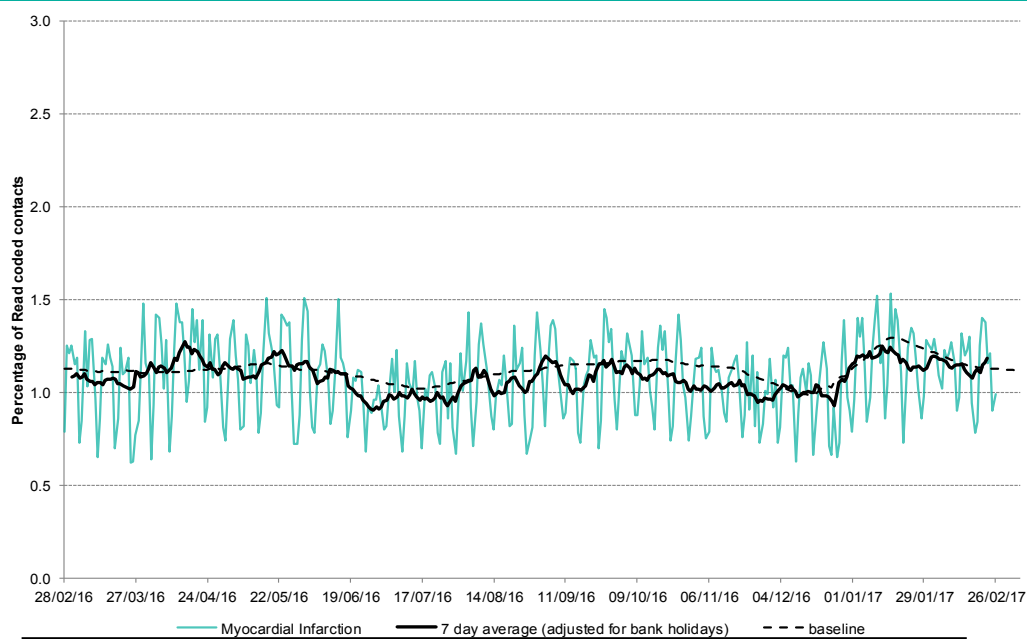

*7-day moving average adjusted for bank holidays.

28 February 2017

Year: 2017 Week: 08

10: Myocardial Infarction daily contacts.

Shown as a percentage of the total contacts with a Read code and as a 7 day average*.

Intentionally left blank.

Intentionally left blank.

*7-day moving average adjusted for bank holidays.

Notes and caveats:

- This bulletin presents data from the Public Health England (PHE) GP Out-of-hours\Unscheduled Care Surveillance System (GP OOHSS).
- Fully anonymised data from GP out-of-hours (OOH) and unscheduled care service providers in England are being transferred to the PHE for analysis and interpretation by the PHE Real-time Syndromic Surveillance Team (ReSST).
- This system supplements existing PHE syndromic surveillance systems by monitoring data on general practitioner consultations outside of routine surgery opening times (evenings, weekends and bank holidays) and unplanned contacts within NHS primary care.
- The key indicators presented within this bulletin are derived by grouping selected Read coded consultations.
- GP OOH consultation data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.
- Baselines represent seasonally expected levels of activity and are constructed from historical data. Furthermore, they take into account any known substantial changes in data collection, population coverage or reporting practices. Baselines are refreshed using the latest data on a regular basis.

Further information:

The GP Out-of-Hours Surveillance System Bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:
