

River Thames – river closure

Shiplake Lock, head and tail gates

Monday 27 June 2016 – 7:30am to 10am

Diving Works

Between 7:30am to 10am boats will be unable to travel through Shiplake Lock. This is due to essential maintenance work being carried out by our diving team. This will prevent an unplanned breakdown and closure at a more inconvenient time which could result in a longer obstruction to passage.

Please keep clear of any safety boats until the lock reopens.
