Variation application number

EPR/QP3733RZ/V002

Permit number

EPR/QP3733RZ

Enstone Farm Poultry Unit

Permit number EPR/QP3733RZ

Introductory note

This introductory note does not form a part of the notice.

Under the Environmental Permitting (England & Wales) Regulations 2010 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made. All the conditions of the permit have been varied and are subject to the right of appeal.

This variation is for:

- an increase in broiler numbers from 327,600 to 462,000. This will be achieved by building an additional three houses (9 to 11) to make a total of 11 at the site and increasing the installation site area
- the addition of a 1,765kWth poultry manure boiler to burn poultry manure for site heat and electricity and associated manure store capable of holding 850 tonnes of poultry manure. About 80% to 85% of the manure will be used in the boiler with the remaining manure removed from site for land spreading by local farmers. Any additional electricity will be put into the National Grid.

The site is operated by Faccenda Farms (Enstone) Limited solely for the production of poultry meat. Day old chicks are introduced into pre-warmed (34°C) poultry sheds bedded with wood shavings or straw and grown on for a maximum of 43 days. The birds are then removed for processing as an 'all in-all out' process and the sheds emptied of poultry manure which is placed in a locked negative pressure manure store. The sheds are washed and disinfected over five to seven days before stocking with the next crop, cropping averaging 7.5 cycles per annum. Wash water for sheds 5 to 8 is collected into one 16,000 litre dirty water holding tank. For each pair of sheds (2 and 9, 3 and 10, 4 and 11) a shared 8,000 litre dirty water tank captures wash waters as well as separate 8,000 litre dirty water tanks each for shed 1 and the poultry manure store area. The collected dirty water is tankered off of site for land spreading.

Ventilation is by side fans drawing air in via roof inlets for sheds 1 to 8 and side wall inlets with ridge extraction fans for sheds 9 to 11. Gas boilers provide back-up heating for the sheds. The temperature in the sheds is maintained with a Reventa heat exchanger. The manure storage barn and adjoining energy centre are sealed to run at a negative pressure. The air from manure store is drawn through the combustion boiler at a minimum of 850°C for two seconds to kill all airborne pathogens and to destroy the ammonia. Carcasses are removed daily from sheds, numbers recorded, bagged and stored appropriately for weekly collection by a suitable haulier in accordance with current Animal By-products Regulations. Feed is delivered from Faccenda's UKAS Accredited feed mill at Banbury and stored in 18 or 24 tonne steel feed bins. Roof water from poultry sheds 1 to 8 goes to soakaways inbetween each of the sheds. Roof water from the new sheds (9 to 11) and poultry manure store is collected by adjacent clean water drains and piped to two soakaways purpose built in the south-western corner of the site by sheds 9 to 11.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application received EPR/SP3337MH/A001	Duly made 23/01/2007	
Permit determined EPR/SP3337MH	27/07/2007	
Variation EPR/SP3337MH/V002 (PAS – EP3031TT)	07/07/2010	Withdrawn by the operator.
Variation EPR/SP3337MH/V003 (PAS – NP3836VJ)	Duly made 29/04/2014	Company name changed from Faccenda Group Limited to Faccenda Foods Limited.
Permit determined EPR/SP3337MH	23/06/2014	Varied permit issued to Faccenda Foods Limited.
Application EPR/QP3733RZ/T001 (full transfer of permit EPR/SP3337MH)	Duly Made 12/08/2015	Application to transfer the permit in full to Faccenda Farms (Enstone) Limited.
Transfer determined EPR/QP3733RZ	19/08/2015	Full transfer of permit complete.
Application EPR/QP3733RZ/V002 (variation and consolidation)	Duly made 04/06/2015	Application to increase place numbers, add a poultry manure fuelled burner, add three new poultry houses with an associated change to the installation boundary and vary and update the permit to modern conditions.
Additional information received	23/06/2015	Clarification of ABPR requirements, use of heat exchangers and poultry manure burner modelling data.
Variation determined EPR/QP3733RZ	21/08/2015	Varied and consolidated permit issued in modern condition format.

End of introductory note

Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2010

The Environment Agency in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2010 varies and consolidates

Permit number

EPR/QP3733RZ

Issued to

Faccenda Farms (Enstone) Limited ("the operator")

whose registered office is

1 Willow Road

Brackley

Northamptonshire

NN13 7EX

company registration number 09439994

to operate a regulated facility at

Enstone Farm Poultry Unit

Enstone Farm

Enstone Airfield

Enstone

Chipping Norton

Oxfordshire

OX7 4NS

to the extent set out in the schedules.

The notice shall take effect from 21/08/2015

Name	Date
J Linton	21/08/2015

Authorised on behalf of the Environment Agency

Schedule 1

All conditions have been varied by the consolidated permit as a result of the application made by the operator.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document EPR/QP3733RZ.

Permit

The Environmental Permitting (England and Wales) Regulations 2010

Permit number

EPR/QP3733RZ

This is the consolidated permit referred to in the variation and consolidation notice for application EPR/QP3733RZ/V002 authorising,

Faccenda Farms (Enstone) Limited ("the operator"),

whose registered office is

**1 Willow Road
Brackley
Northamptonshire
NN13 7EX**

company registration number 09439994

to operate an installation at

**Enstone Farm Poultry Unit
Enstone Farm
Enstone Airfield
Enstone
Chipping Norton
Oxfordshire
OX7 4NS**

to the extent authorised by and subject to the conditions of this permit.

Name	Date
J Linton	21/08/2015

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
 - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

- 1.2.1 The operator shall:
- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
 - (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
 - (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

- 1.3.1 The operator shall:
- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
 - (b) maintain records of raw materials and water used in the activities;
 - (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
 - (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

- 1.4.1 The operator shall take appropriate measures to ensure that:
- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities;
 - (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.
- 1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.
- 2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 2.3.3 The operator shall maintain and implement a system to record the number of animal places and animal movements.
- 2.3.4 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.5 The operator shall take appropriate measures in off-site disposal or recovery of solid manure or slurry to prevent, or where this is not practicable, to minimise pollution.
- 2.3.6 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
- (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.
- 2.3.7 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.
- 2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

2.5 Pre-operational conditions

- 2.5.1 The operations specified in schedule 1 table S1.4 shall not commence until the measures specified in that table have been completed.

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1 and S3.2.
- 3.1.2 The limits given in schedule 3 shall not be exceeded.
- 3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits; and
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

- 3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

- 3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.5 Monitoring

- 3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:

- (a) point source emissions specified in tables S3.1 and S3.2.

3.6 Pests

- 3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.
- 3.6.2 The operator shall:
 - (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;
 - (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

- 4.1.1 All records required to be made by this permit shall:
 - (a) be legible;
 - (b) be made as soon as reasonably practicable;
 - (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
 - (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.
- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by the Environment Agency.

4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.
- 4.2.2 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

- 4.3.1 In the event:
 - (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
 - (i) inform the Environment Agency,

- (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) of a breach of any permit condition the operator must immediately—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

4.3.2 Any information provided under condition 4.3.1 shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.

4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and
- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (a) the Environment Agency shall be notified at least 14 days before making the change; and
- (b) the notification shall contain a description of the proposed change in operation.

4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.3.7 Where the operator has entered into a climate change agreement with the Government, the Environment Agency shall be notified within one month of:

- (a) a decision by the Secretary of State not to re-certify the agreement;

- (b) a decision by either the operator or the Secretary of State to terminate the agreement; and
- (c) any subsequent decision by the Secretary of State to re-certify such an agreement.

4.4 Interpretation

- 4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.
- 4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made “immediately”, in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 Activities		
Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
Section 6.9 A(1)(a)(i) - rearing of poultry intensively in an installation with more than 40,000 places.	The rearing of poultry in a facility with a capacity for 462,000 broiler places.	From receipt of birds, raw materials and fuels onto the site to removal of birds and associated wastes from site.
Directly Associated Activity	Description of specified activity	Limits of specified activity
Heat and power generation	Operation of one on farm combustion unit with a thermal rated input not exceeding 1,765kWth. Burning unprocessed poultry manure generated on site.	From poultry manure storage on site to the release of combustion products to air and removal of associated wastes from site.

Table S1.2 Operating techniques		
Description	Parts	Date Received
Application EPR/SP3337MW/A001	The responses to sections B2.3.1, B2.3.2, B2.3.3, B2.6.1, B2.6.2, B2.6.3, B2.7.1 and B2.7.2 in the Application.	23/01/2007
Application EPR/QP3733RZ/V002	Faccenda Enstone Litter Store and Energy Centre: General Specification.	12/05/2015
Application EPR/QP3733RZ/V002	Summary of Biomass Boiler Management Systems for Faccenda Enstone Poultry Farm.	12/05/2015
Application EPR/QP3733RZ/V002	Updated Site Drainage Plan: Map 1.3c drawing No. 267_018-3, Revision D dated 06/05/2015.	13/08/2015

Table S1.3 Improvement programme requirements		
Reference	Requirement	Date
IC1	The operator shall bund the agricultural fuel oil storage facilities to comply with the requirements of S3.2 of SGN How to Comply – Intensive Farming, Version 2.	Completed
IC2	A written plan shall be submitted to the Environment Agency for approval, following a review of all site drainage at the installation. The plan should take into account the appropriate measures for the management of drainage systems and run-off in S3.2 of SGN How to Comply – Intensive Farming, Version 2, including specific reference to drainage from yards contaminated by manures or slurries and include a timetable for any improvements to the drainage system. The notification requirements of condition 2.4.2 shall be deemed to have been complied with on submission of the plan. The plan shall be implemented by the operator from the date of approval in writing by the Environment Agency subject to such amendments or additions as notified by the Environment Agency.	Completed
IC3	A written plan shall be submitted to the Environment Agency for approval following a review of existing poultry housing and management practices at the installation. The plan shall take into account the appropriate measures in S2.3 of SGN How to Comply – Intensive Farming, Version 2. The plan shall identify measures to reduce emissions to all media, the likely cost of such measures and a proposed timetable for their	Completed

Table S1.3 Improvement programme requirements		
Reference	Requirement	Date
	<p>implementation. The notification requirements of condition 2.4.2 shall be deemed to have been complied with on submission of the plan.</p> <p>The plan shall be implemented by the operator from the date of approval in writing by the Environment Agency subject to such amendments or additions as notified by the Environment Agency.</p>	

Table S1.4 Pre-operational measures for future development		
Reference	Operation	Pre-operational measures
1	Scheduled heat and power generation activity.	<p>At least two weeks before, the operator shall submit a report summarising the necessary procedures, and accident and emergency plans in place for the operation of the poultry manure fuelled burner. The report shall also summarise the specific training given to all relevant staff for the use and management of the poultry manure fuelled boiler from the supplier of the unit.</p> <p>The report shall be submitted to the Environment Agency in writing for approval.</p>
2	Scheduled heat and power generation activity.	<p>At least two weeks before, the operator shall submit a report summarising that the operation, installation and specification of the poultry manure fuelled boiler is as per the document 'Faccenda Enstone Litter Store and Energy Centre' by Energy Innovations originally submitted as application EPR/SP3337MH/V004 but amended to EPR/QP3733RZ/V002.</p> <p>The report shall be submitted to the Environment Agency in writing for approval.</p>

Schedule 2 – Waste types, raw materials and fuels

Table S2.1 Raw materials and fuels	
Raw materials and fuel description	Specification
Fuel for on farm combustion unit.	Unprocessed poultry manure generated on site.

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Side wall mounted extraction fans with roof mounted inlets shown on plan 'Appendix 1 1.3b' in EPR/SP3337MH/A001	Poultry sheds 1 to 8	---	---	---	---	---
Roof mounted high velocity extraction fans with side wall mounted inlets as per site drainage plan (EPR/QP3733RZ/V002)	Poultry sheds 9 to 11	---	---	---	---	---
Vent shown on plan 'Appendix 1 1.3b' in EPR/SP3337MH/A001	Diesel tank	---	---	---	---	---
Outlet from a heat exchanger as per EPR/SP3337MH/A001	Poultry sheds 1 to 11	---	---	---	---	---
Exhaust shown on site plan in Schedule 7	Standby Generator	---	---	---	---	---
Emissions from a poultry manure fuelled boiler shown on site plan in Schedule 7	One 1,765kWth boiler	---	---	---	---	---

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements						
Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Soakaways inbetween each shed as per site drainage plan (EPR/QP3733RZ/V002)	Roof water from poultry sheds 1 to 8	---	---	---	---	---
Roof water piped to soakaways in south-western corner of site as per site drainage plan (EPR/QP3733RZ/V002)	Poultry sheds 9 to 11 and poultry manure store	---	---	---	---	---
Outlet to soakaways as per site drainage plan (EPR/QP3733RZ/V002)	Water draining from yard areas (excluding poultry house wash out periods)	---	---	---	---	---

Schedule 4 – Reporting

There is no reporting under this schedule.

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution	
To be notified within 24 hours of detection	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection unless otherwise specified below	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	

Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the operator

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“Animal and Plant Health Agency (APHA)” is the government agency that licences small on farm incinerators and poultry manure burners; formerly known as the State Veterinary Service.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“building” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“emissions to land” includes emissions to groundwater.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission limit.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2010 No.675 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

“Hazardous property” has the meaning in Annex III of the Waste Framework Directive.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions.

“Manure and slurry” have the following meaning:

- Manures may be either slurries or solid manures.
- Slurries consist of excreta produced by livestock whilst in a yard or building mixed with rainwater and wash water and, in some cases, waste bedding and feed. Slurries can be pumped or discharged by gravity.
- Slurry includes duck effluent, seepage from manure and wash water.
- Solid manures include farmyard manure (FYM) and comprise material from straw-based housing systems, excreta with lots of straw/sawdust/woodchips in it, or solids from mechanical separators.
- Most poultry systems produce solid manure (litter).
- Solid manure can generally be stacked.

“manure management plan” means the requirements described in Section 2.3 of SGN 6.09 How to Comply – Intensive Farming.

“pests” means Birds, Vermin and Insects.

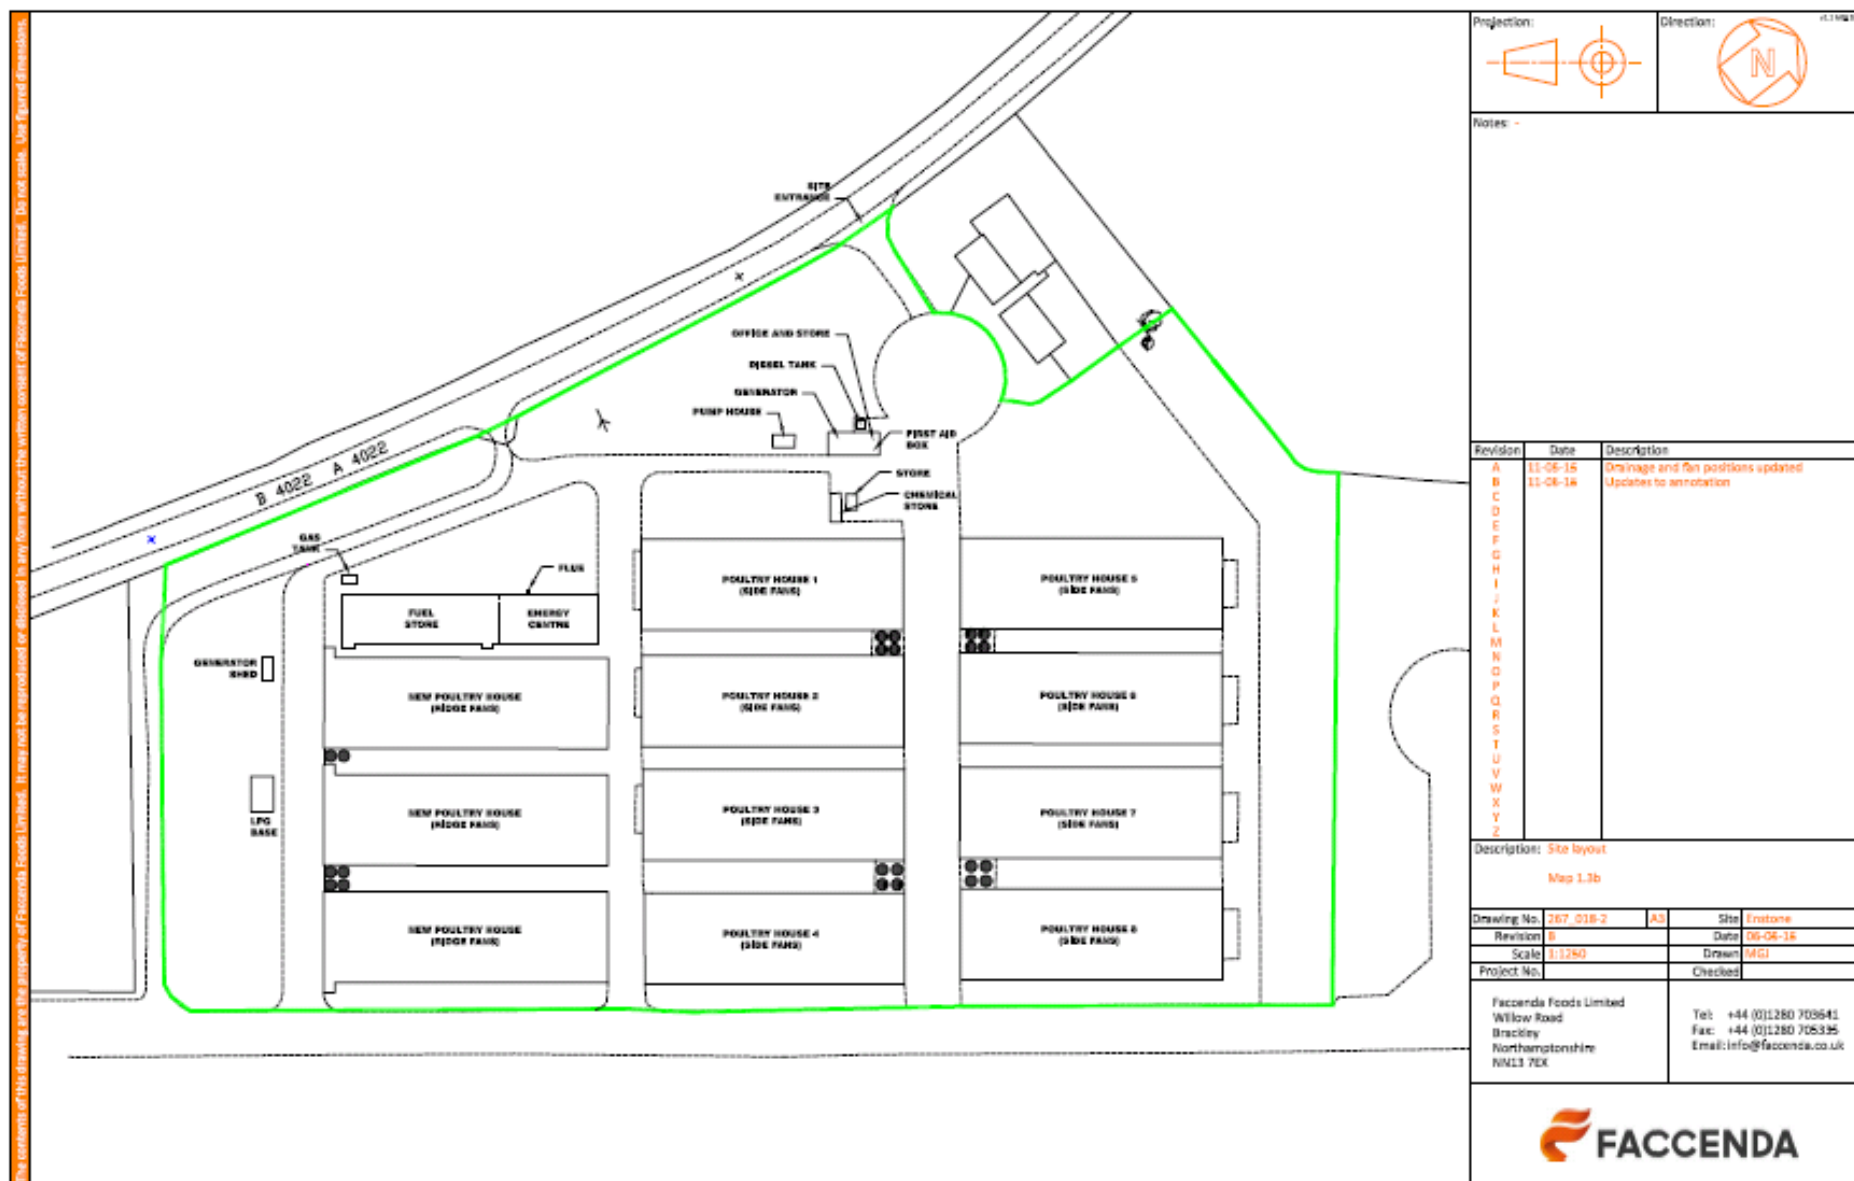

“SGN How to comply – Intensive Farming” The EPR Sector Guidance Note 6.09 for intensive pig and poultry farmers, Version 2 published January 2010.

“Waste code” means the six digit code referable to a type of waste in accordance with the List of Wastes and in relation to hazardous waste, includes the asterisk.

“Waste Framework Directive” or “WFD” means Waste Framework Directive 2008/98/EC of the European Parliament and of the Council on waste.

“year” means calendar year ending 31 December.

Schedule 7 – Site plan

END OF PERMIT
