1. About this document

This document contains both the validation and business rules, which will form part of the Validation, checks that will need to be undertaken by both the HMRC 'e' portal or that developed by third party software suppliers.

Section 3 of this document outlines the general validation rules that should be applied to data or groups of data (for example it defines alpha/numeric fields) across all input forms.

Section 4 describes, in tabular form, the data requirements for each field within the specified form. . The columns in this section contain the following information:

Column	Rule Type
Pre-condition & Post-Condition	Schema Validation Rules
Validation / Processing	Business Validation Rules applied after the schema validation rules have been passed

2. Pension Scheme System Acceptable Characters
