Application SCR evaluation template

Name of activity, address and NGR	Staples Disposables Limited Hurlingham Business Park, Fulbeck Heath, Grantham, Lincolnshire, NG32 3HL SK 98382 50152
Document reference of application SCR	HBPSC 14.10.15 Entitled: 'Site Condition Report: Staples Disposables Ltd, Hurlingham Business Park'.
Date and version of application SCR	4 August 2008 V2.0

1.0 Site details

Has the applicant provided the following information as required by the application SCR template?

Site plans showing site layout, drainage, surfacing, receptors, sources of emissions/releases and monitoring points

Provided in support of Environmental Permit application EPR/XP3130TM; accepted and determined on 17/03/2010.

Reviewed as part of the surrender application and accepted on 24/11/2015.

2.0 Condition of the land at permit issue

To be completed by GWCL officers (Receptor)

Has the applicant provided the following information as required by the application SCR template?

- a) Environmental setting including geology, hydrogeology and surface waters
- b) Pollution history including:
- pollution incidents that may have affected land
- historical land-uses and associated contaminants
- visual/olfactory evidence of existing contamination
- evidence of damage to existing pollution prevention measures
- c) Evidence of historic contamination (i.e. historical site investigation, assessment, remediation and verification reports (where available)
- d) Has the applicant chosen to collect baseline reference data?

Provided in support of Environmental Permit application EPR/XP3130TM; accepted and determined on 17/03/2010.

3.0 Permitted activities (Source)		
Has the applicant provided the following information as required by the application SCR template?	Response (Specify what information is needed from the applicant, if any)	
a) Permitted activities		
b) Non-permitted activities undertaken at the site		
The site was permitted under SR2009 No2 – Low impact Part A installation. The permitted site was a chemical mixing and wet wipe production facility		

3.0(a) Environmental Risk Assessment

(Source)

The H1 environmental risk assessment should identify elements that could impact on land and waters, cross- referenced back to documents and plans provided as part of the wider permit application.

Risk assessment provided in support of Environmental Permit application EPR/XP3130TM; accepted and determined on 17/03/2010.

3.0(b) Will the pollution prevention measures protect land and groundwater? (Conceptual model)

Are the activities likely to result in pollution of land?

The site was regulated as a low impact installation and demonstrated through evidence that it met the criteria required for this application type; accepted and determined on 17/03/2010.

For dangerous and/or hazardous substances only, are the pollution prevention measures for the relevant activities to a standard that is likely to prevent pollution of land?

The site was regulated as a low impact installation and demonstrated through evidence that it met the criteria required for this application type; accepted and determined on 17/03/2010.

Application SCR decision summary	Tick relevant decision
Sufficient information has been supplied to describe the condition of the site at permit issue	Accepted at permit determination of EPR/XP3130TM on 17/03/2010
Pollution of land and water is unlikely	Accepted at permit determination of EPR/XP3130TM on 17/03/2010
Date and name of reviewer: (24/11/2015)	Kirsty Hobbs

Operational phase SCR evaluation template

Sections 4.0 to 7.0 may be completed annually in line with normal record checks.

Have there been any changes to the following during the operation of the site?	Response (Specify what information is needed from the applicant, if any)
a) Activity boundaries	
b) Permitted activities	
c) "Dangerous substances" used or produced	

5.0 Measures taken to protect land

To be completed by EM/PPC officers (Pathway)

Has the applicant provided evidence from records collated during the lifetime of the permit, to show that the pollution prevention measures have worked?

The site was regulated as a low impact installation and demonstrated through evidence that it met the criteria required for this application type; accepted and determined on 17/03/2010.

6.0 Pollution incidents that may have impacted on land and their remediation

To be completed by EM/PPC officers

(Sources)

Has the applicant provided evidence to show that any pollution incidents which have taken place during the life of the permit and which may have impacted on land or water have been investigated and remediated (where necessary)?

There was an incident reported anomalously to the Environment Agency on 1 October 2014, where it was alleged that a leak of hydraulic oil from a compactor located at the premises had entered the sites drainage system. A site visit was undertaken by the Environment Agency on 3 October 2014 and it was found that there was a leak from the compactor, however, there was no evidence that the oil had entered into a drain system. The operator completed a Corrective Action Report, which was submitted to the Environment Agency. No further action was taken.

No other environmental incidents identified during the operation of the site that could have caused harm to land or groundwater.

7.0 Soil gas and water quality monitoring (where relevant)

Where soil gas and/or water quality monitoring has been undertaken, does this demonstrate that there has been no change in the condition of the land? Has any change that has occurred been investigated and remediated?

N/A

EPR/XP3130TM/S002 Page 3 of 4

Surrender SCR Evaluation Template

If you haven't already completed previous sections 4.0 to 7.0, do so now before assessing the surrender.

8.0 Decommissioning and removal of pollution risk

To be completed by EM/PPC officers

Has the applicant demonstrated that decommissioning works have been undertaken and that all pollution risks associated with the site have been removed? Has any contamination of land that has occurred during these activities been investigated and remediated?

All permitted activities have ceased and all sources of pollution risk removed.

9.0 Reference data and remediation (where relevant)

To be completed by GWCL officers

Has the applicant provided details of any surrender reference data that they have collected and any remediation that they have undertaken?

(Reference data for soils must meet the requirements of policy 307_03 Chemical test data on contaminated soils – quantification requirements). If the surrender reference data shows that the condition of the land has changed as a result of the permitted activities, the applicant will need to undertake remediation to return the condition of the land back to that at permit issue. You should not require remediation of historic contamination or contamination arising from non-permitted activities as part of the permit surrender.

No baseline data requested during determination, therefore no data is required for the surrender.

10.0 Statement of site condition

To be completed by EM/PPC officers

Has the applicant provided a statement, backed up with evidence, confirming that the permitted activities have ceased, decommissioning works are complete and that pollution risk has been removed and that the land and waters at the site are in a satisfactory state?

All permitted activities have ceased and the site has been decommissioned as far as is practicable; the equipment has been disconnected but is still assembled due to awaiting sale. The operator has confirmed that all pollution risks have been removed and the site has been returned in a satisfactory state.

We the Environment Agency have reviewed the application for surrender made by the Operator and accept the statement of site condition and view it as being returned in a satisfactory state.

Surrender SCR decision summary To be completed by GWCL officers and returned to NPS	Tick relevant decision
Sufficient information has been supplied to show that pollution risk has been removed and that the site is in a satisfactory state – accept the application to surrender the permit; or	✓
