

## Local Summary of Legionnaires' disease in Residents of England and Wales, 2015

### South East

This report provides a short summary of Legionella activity in residents of South East, in individuals with onset of symptoms during 2015. This report should be read in conjunction with either the 2015 official statistics which provides data on Legionella activity across the whole of England and Wales during 2015.

It can be found at the following location on the Public Health England (PHE) website:

[www.gov.uk/government/statistics/legionnaires-disease-in-england-and-wales-2015](http://www.gov.uk/government/statistics/legionnaires-disease-in-england-and-wales-2015).

Or the 2015 annual report for Legionnaires' disease in residents of England and Wales:

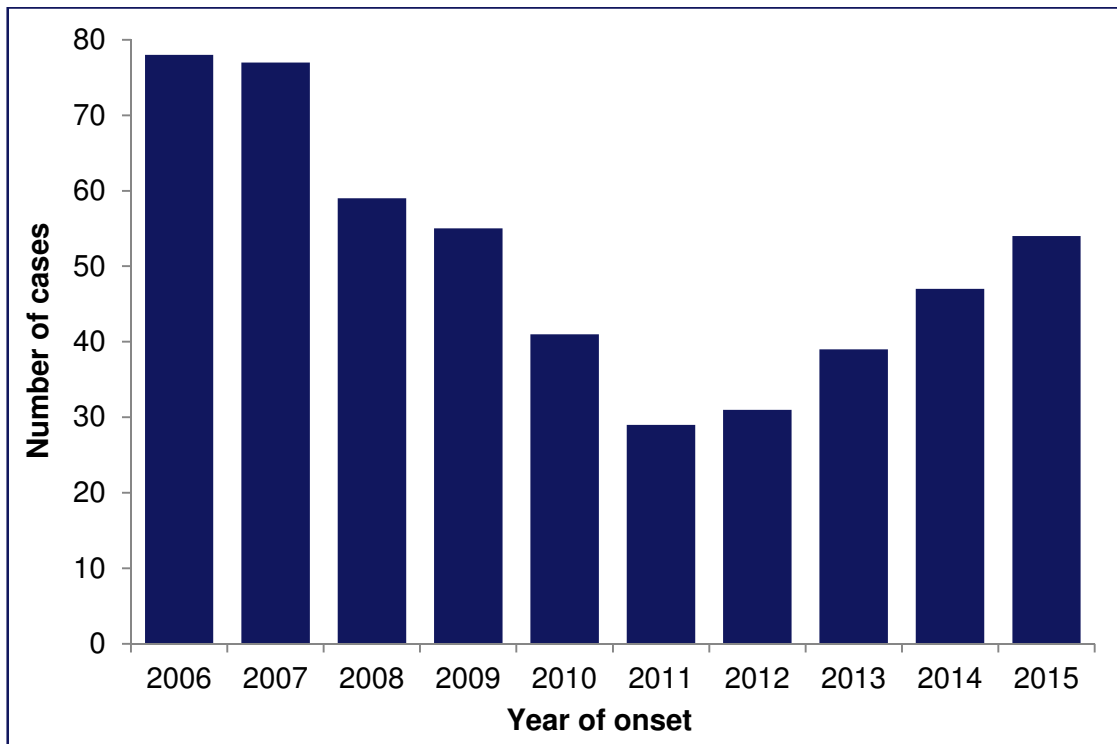

[www.gov.uk/government/publications/legionnaires-disease-in-england-and-wales-report-2015](http://www.gov.uk/government/publications/legionnaires-disease-in-england-and-wales-report-2015).

The annual report provides wider analysis of Legionella activity across England and Wales along with case definitions, detailed methodology and discussion on key aspects of Legionella activity.

The data in this report primarily focuses on cases with onset of symptoms during 2015 but data for years 2013 and 2014, and in some tables and figures for years 2006 to 2014, are presented for comparative purposes.

All data presented in this report are based on cases of legionellosis reported to the National Surveillance Scheme for Legionnaires' disease in Residents of England and Wales which is managed by the Respiratory Diseases Department, National Infection Service, Public Health England.
