

	Core Defra	Environment Agency	Natural England	Total
1. Number of people working in water-related areas	125	1,200	111	1,436
2. Number of people working in flood risk management	41	3,300	4	3,345
3. Number of people covered by both 1 and 2	-	-	-	-

Notes

Figures are FTE (Full Time Equivalents), rounded

These figures exclude people who work in support services

Environment Agency – In addition to the figures, there are 1,800 FTE in teams which work on both water related and non-water regulated industry activities, delivering these in an integrated manner. Separately, there are 1,500 FTE in teams which deliver a range of activities, for example responding to Local Planning Authorities, covering water related activities, non-water regulated industries, and Flood Risk Management activities

Natural England – In addition to the figures, there are staff in teams who deal with work affecting Sites of Special Scientific Interest (such as planning applications and advice to owner-occupiers). These staff cover a range of sites including some with wetland features.
