## FOI Release
### *Information released under the Freedom of Information Act*

**Title:** IPO trade mark dataset

**Date of release:** 19 November 2015

**Information request:**
Is it possible to get bulk data access to the UK IPO's trade mark dataset? I noticed something like that for patents referred to in the FOI Q&A, so thought it may also be available for trademarks.

**Information released:**
The IPO has published a trade mark dataset, but because the amount of data is very much greater in comparison with patents you will need to import the file into an analysis package in order to read it.

You can find the file at:  https://www.gov.uk/government/publications/ipo-trade-mark-data-release .
