Note 1
Capability developed through the Royal Signals by trialling various commercially available components, these were subsequently taken through the codification process but this was not completed in time to support this buy therefore MPN's were used instead.

Note 2
Obsolete: Where NSN identified as obsolete when purchase request made, a suitable alternative MPN identified and procured the Tech specs to be updated

Note 3
New product reqt - equivalent not identified in existing METS Catalogue, so user identified a fit for purpose part and MOD requested MPN from supplier (B&H)

Note 4
Where identified that NSN and tech spec description did not match, user contacted to confirm actual requirement, MPN identified and requestd for purchase
