To whom it might concern,

I am an editorial and commercial photographer and I have worked in my industry for over 8 years.

In my opinion the introduction of Section 52 - Industrial design copyright, will have a hugely negative impact in my industry and my career.

It is through printed and online media that design and architecture are shown to the public. The introducing of a license agreement from the creator of furniture/decoration will effectively stop these creations being showcased. It will also limit my industry and therefore my work making it almost impossible to produce a photograph that does not involve the reproduction of materials created by designers/decorators/etc.

Seeking licensing agreements from all the parties involved would be such a difficult task that it will eventually make many publications collapse in the world of interior design, fashion, lifestyle, etc.

I hope the government can change their minds about the implementation of these changes to the law.

Your sincerely,
Juan Trujillo Andrades
