

08 April 2015

Year: 2015 Week: 14

**In This Issue:**

- Key messages.
- Diagnostic indicators at a glance.
- GP practices and denominator population.
- National syndromic indicators.
- Notes and further information.
- Appendix.

## Key messages

Data to: 06 April 2015

GP consultation rates for scarlet fever decreased during week 14 but remain elevated (figure 4). There were decreases across the <1, 1-4 and 5-14 years age groups; rates remain highest in the 1-4 years age group (figure 4a).

Please note that week 14 includes a public holiday when GP surgeries would normally be closed. 7 day moving averages presented in this bulletin have been adjusted to account for the reduced rates.

## Diagnostic indicators at a glance:

Indicator	Trend	Level
Upper respiratory tract infection	decreasing	similar to baseline levels
Influenza-like illness	decreasing	above baseline levels
Pharyngitis	decreasing	above baseline levels
Scarlet fever	decreasing	above baseline levels
Lower respiratory tract infection	no trend	similar to baseline levels
Pneumonia	no trend	above baseline levels
Gastroenteritis	decreasing	below baseline levels
Vomiting	decreasing	below baseline levels
Diarrhoea	decreasing	below baseline levels
Severe asthma	no trend	similar to baseline levels
Wheeze	decreasing	similar to baseline levels
Allergic rhinitis	no trend	below baseline levels
Conjunctivitis	no trend	below baseline levels
Mumps	no trend	below baseline levels
Measles	no trend	below baseline levels
Rubella	no trend	similar to baseline levels
Pertussis	no trend	above baseline levels
Chickenpox	no trend	below baseline levels
Herpes zoster	no trend	similar to baseline levels
Cellulitis	no trend	similar to baseline levels
Impetigo	no trend	similar to baseline levels

## GP practices and denominator population:

Year	Week	GP Practices Reporting**	Population size**
2015	14	4005	29.3 million

\*\*based on the average number of practices and denominator population in the reporting working week.

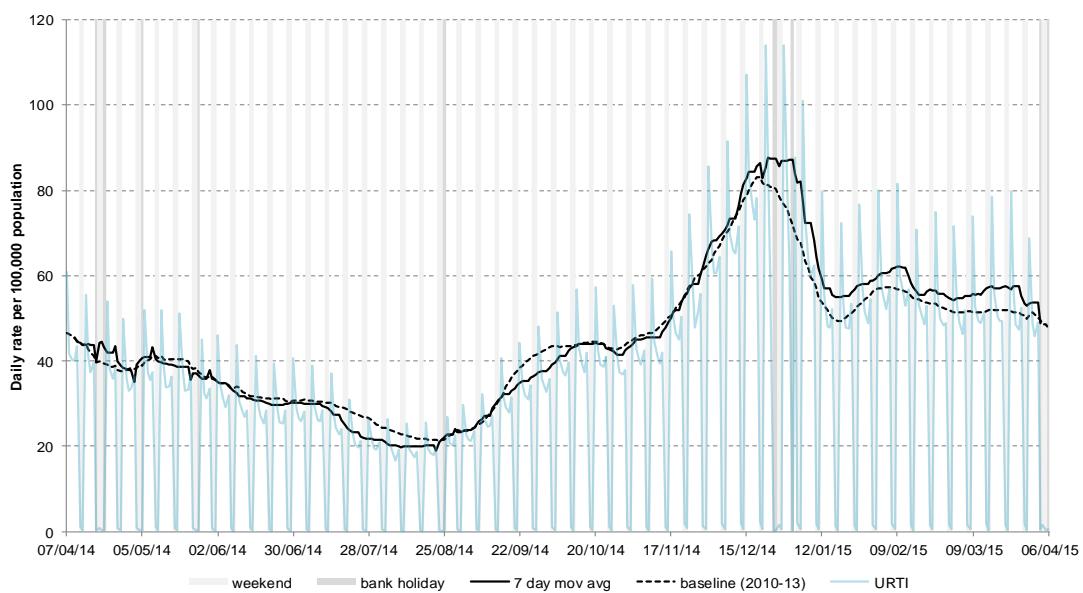

08 April 2015

Year: 2015 Week: 14

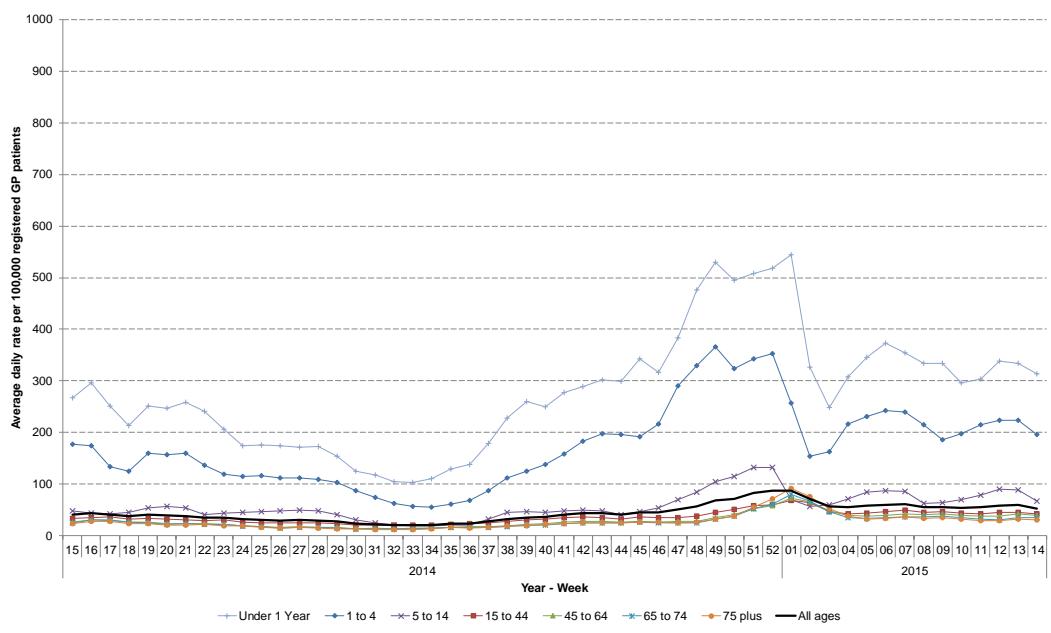

## 1: Upper respiratory tract infection (URTI)

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

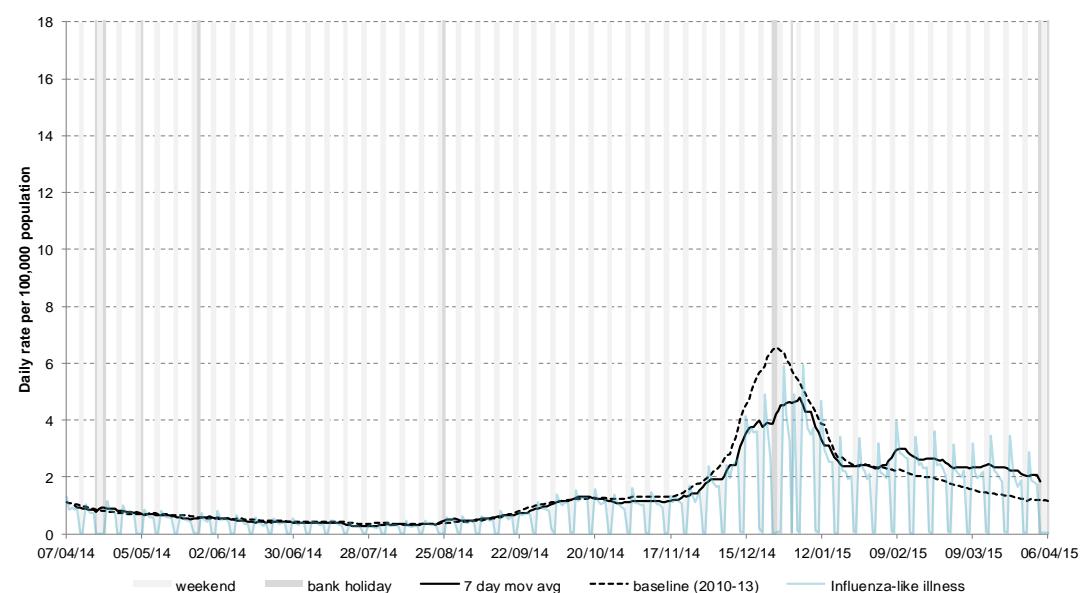

### 1a: Upper respiratory tract infection (URTI) by age

Average daily incidence rate by week per 100,000 population (all England)

## 2: Influenza-like illness (ILI)

Daily incidence rates (and 7-day moving average\*) per 100,000 population (all England, all ages).

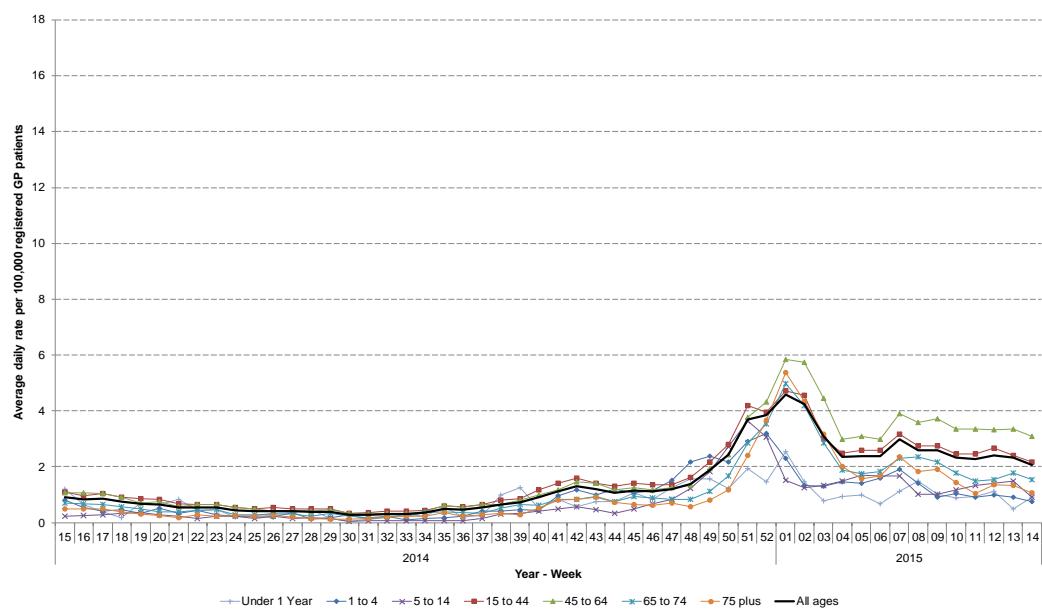

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

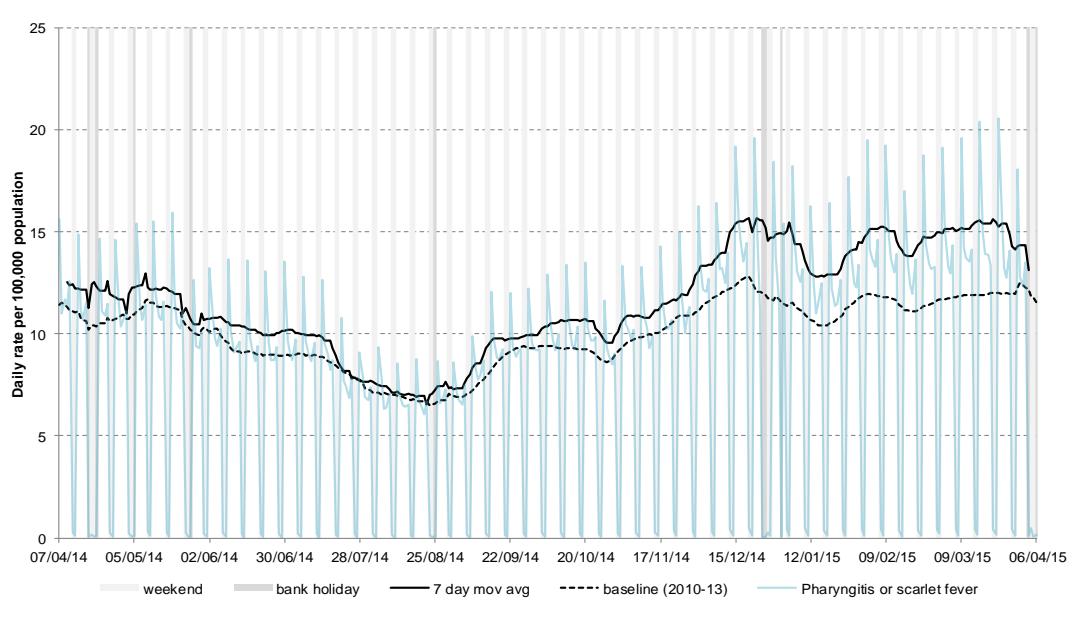

## 2a: Influenza-like illness (ILI) by age

Average daily incidence rate by week per 100,000 population (all England)

## 3: Pharyngitis or scarlet fever

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 4: Scarlet fever

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages, based on a population denominator of approximately 5.5 million patients).

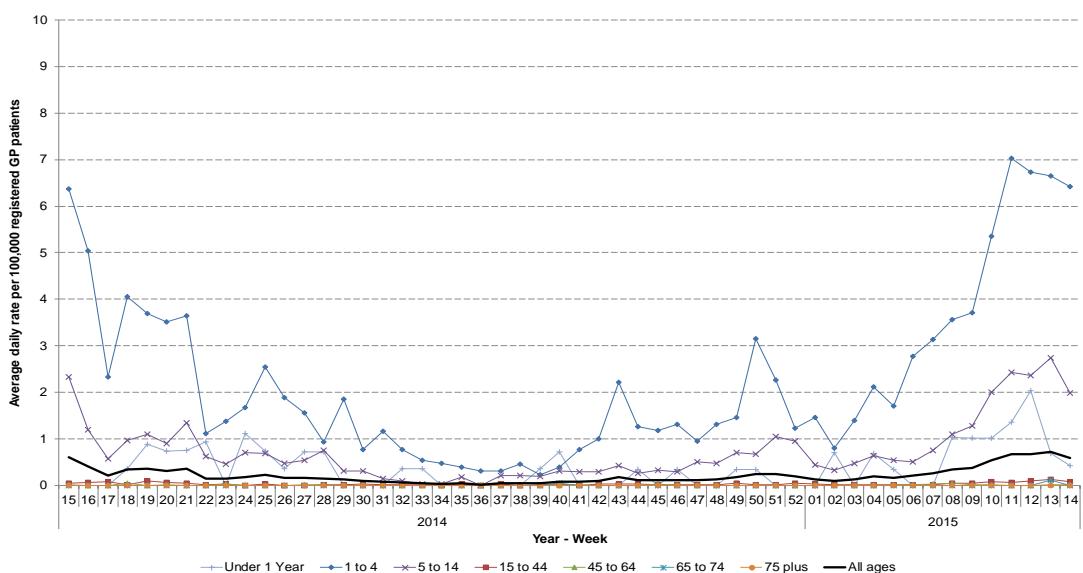

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

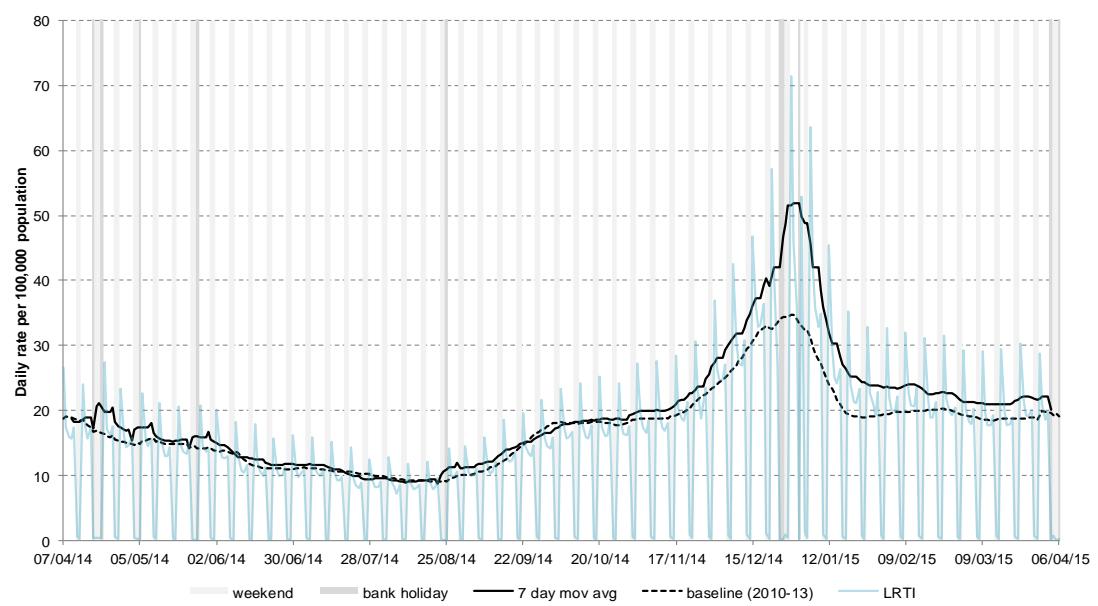

## 4a: Scarlet fever by age

Average daily incidence rate by week per 100,000 population (all England, based on a population denominator of approximately 5.5 million patients).

## 5: Lower respiratory tract infection (LRTI)

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

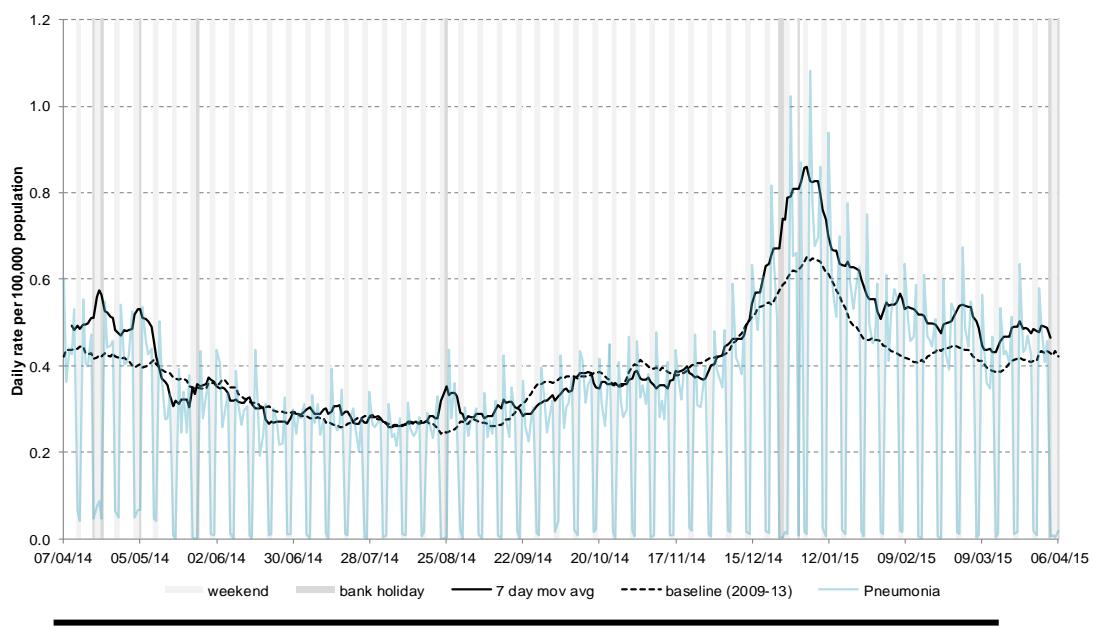

08 April 2015

Year: 2015 Week: 14

## 6: Pneumonia

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

Intentionally left blank

Intentionally left blank

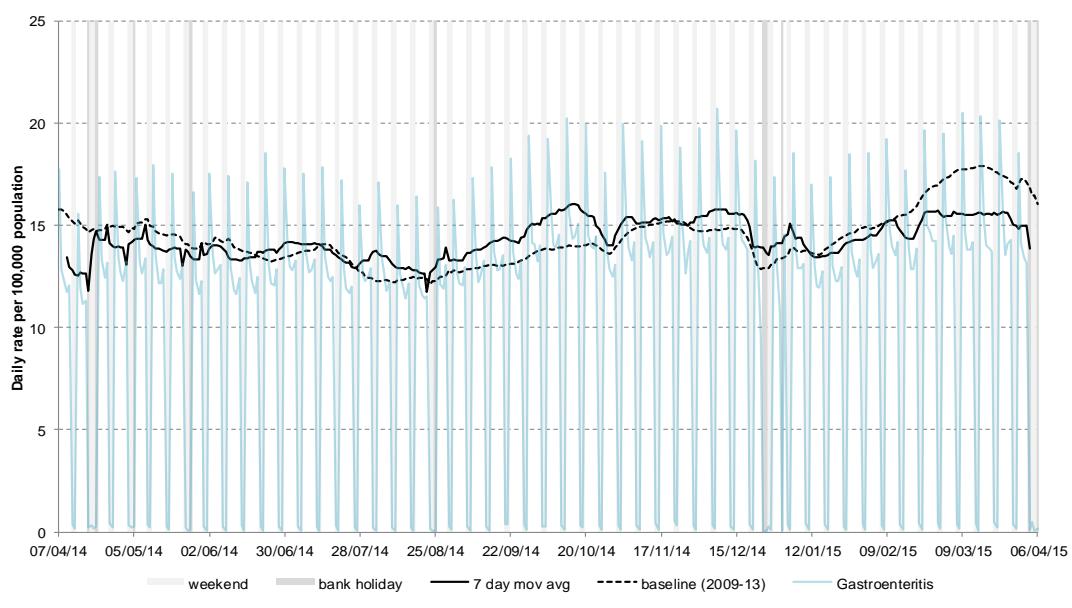

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

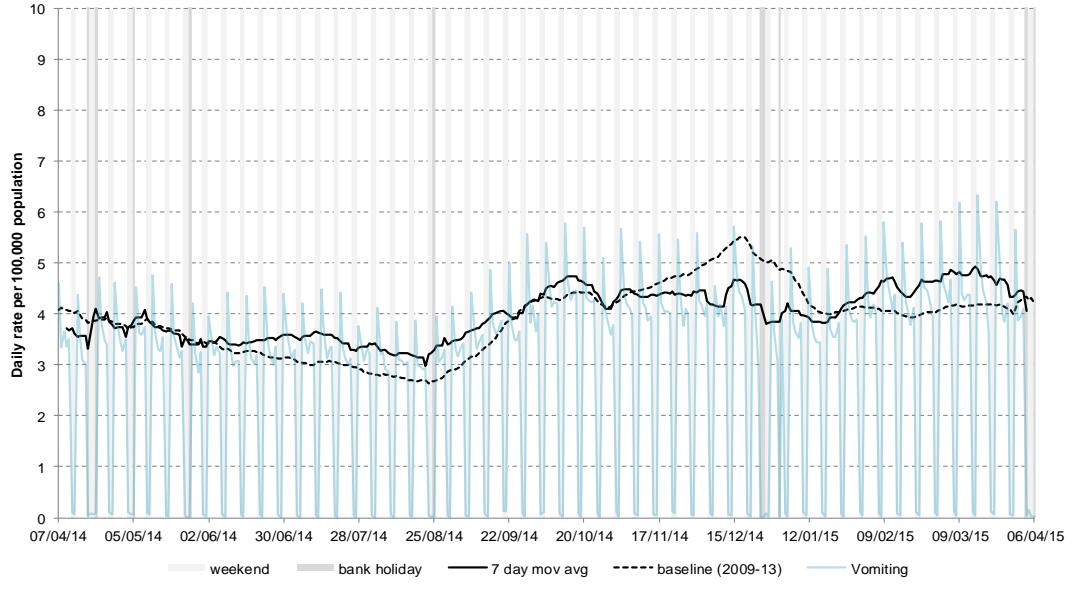

## 7: Gastroenteritis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

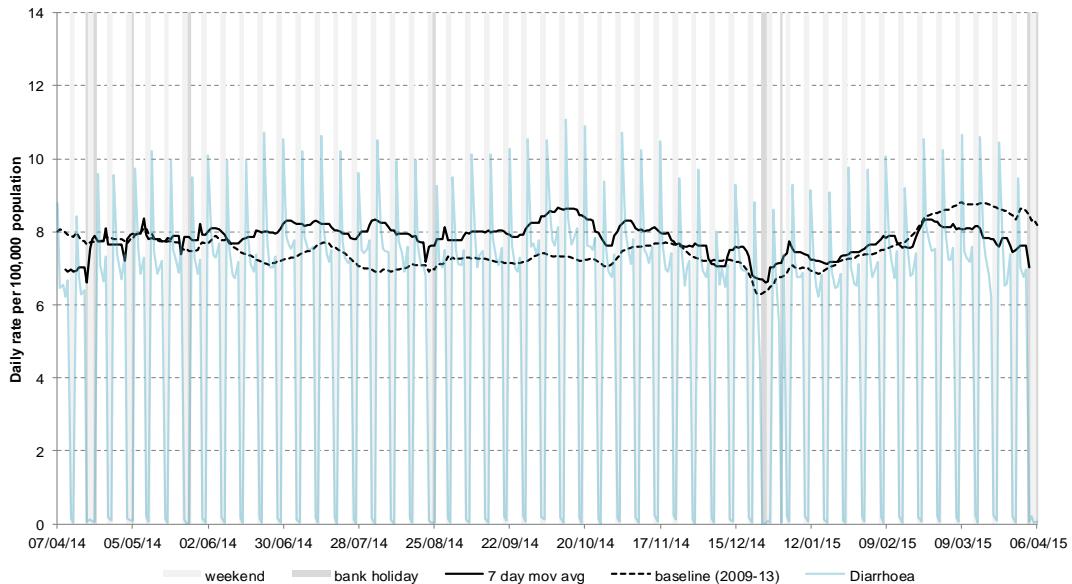

## 8: Vomiting

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 9: Diarrhoea

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

\* 7-day moving average adjusted for bank holidays.

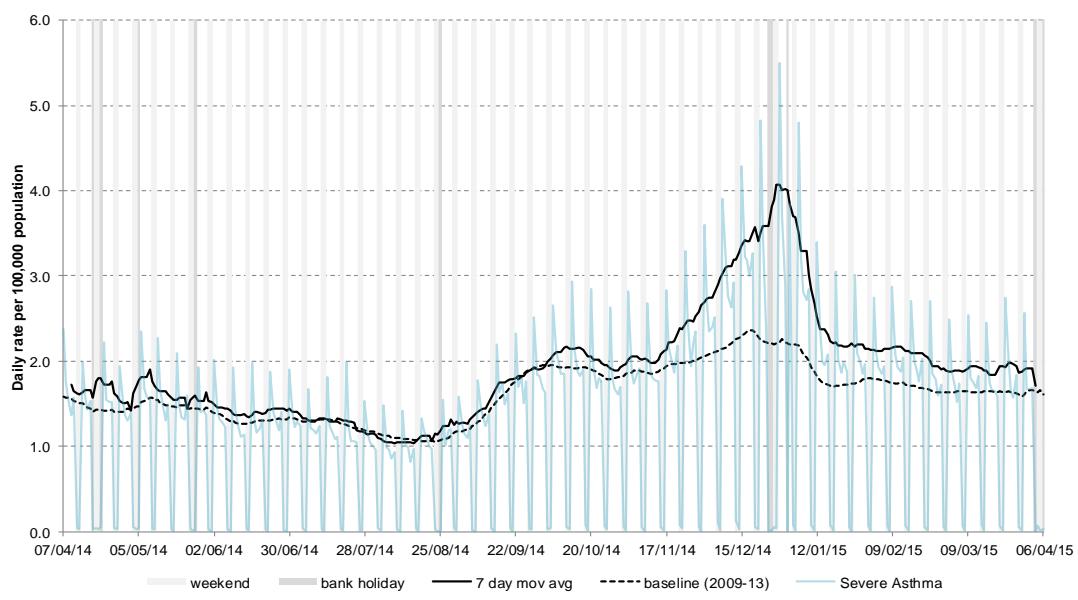

08 April 2015

Year: 2015 Week: 14

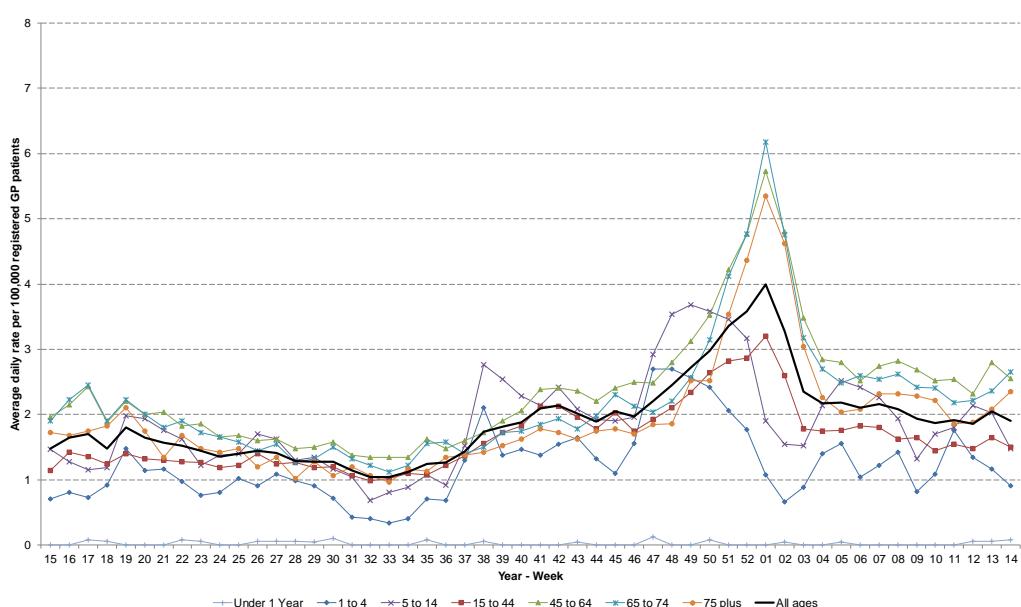

## 10: Severe asthma

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

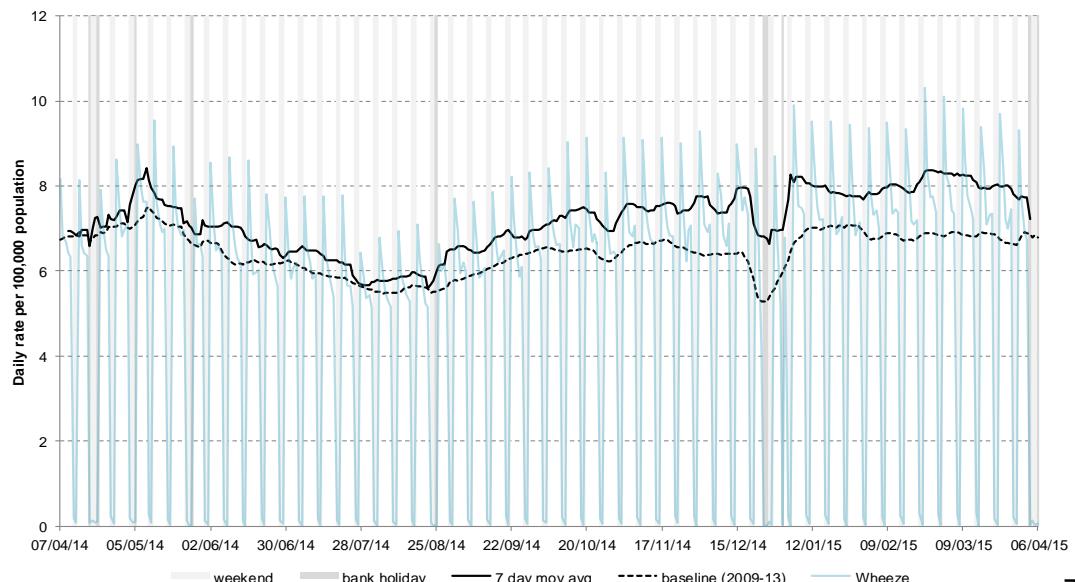

## 10a: Severe asthma by age

Average daily incidence rate by week per 100,000 population (all England)

## 11: Wheeze

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

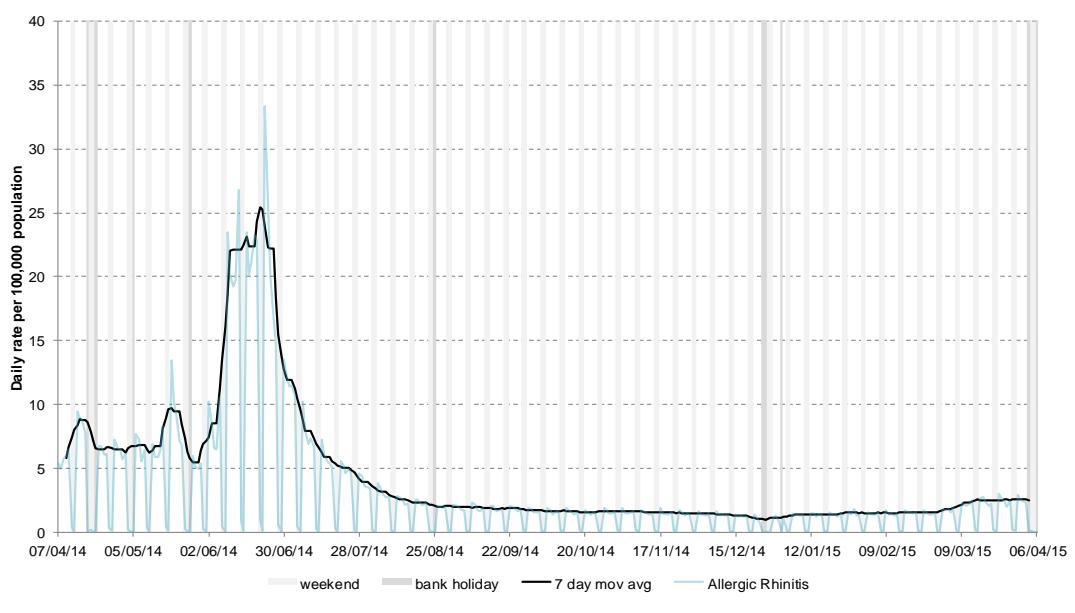

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

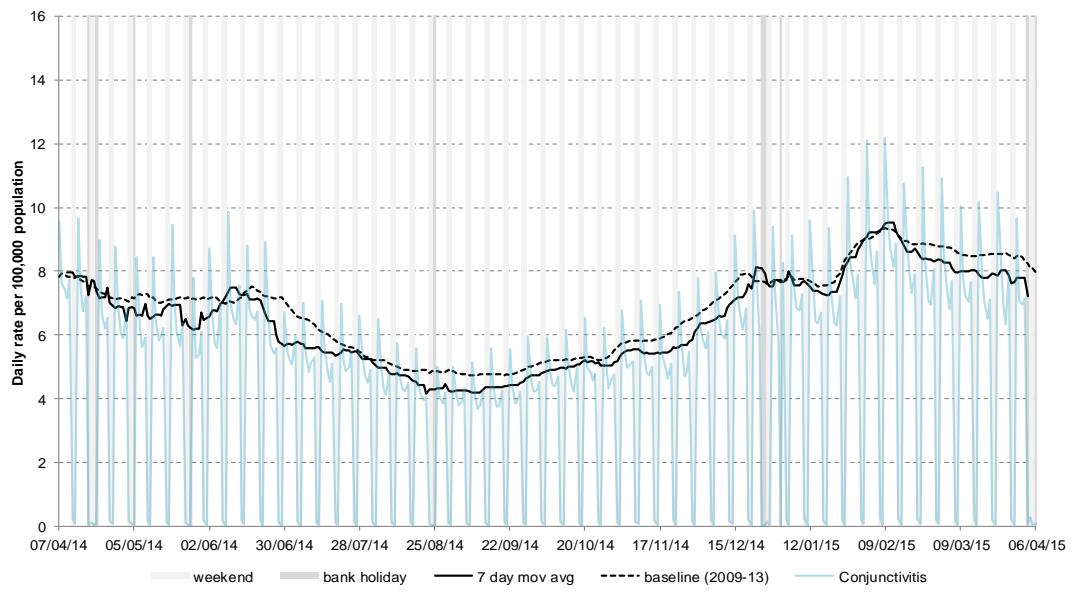

## 12: Allergic rhinitis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 13: Conjunctivitis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

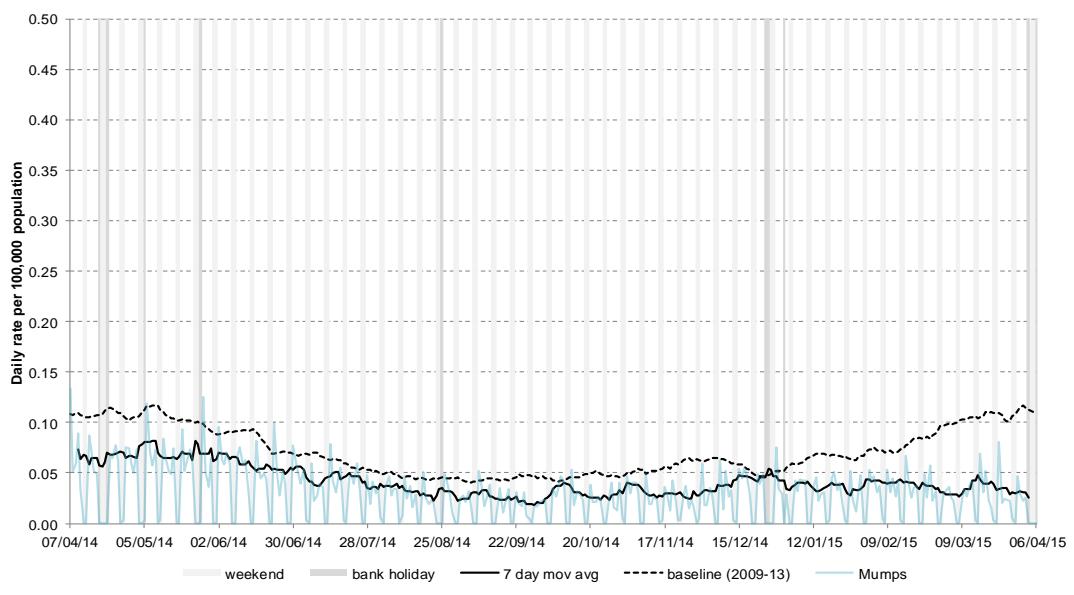

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

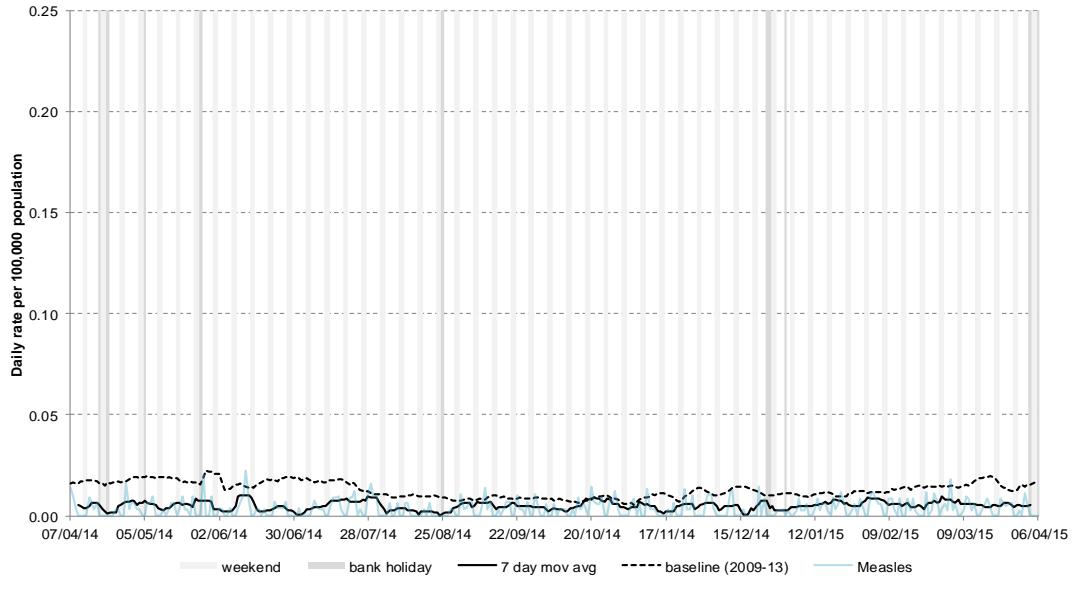

## 14: Mumps

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

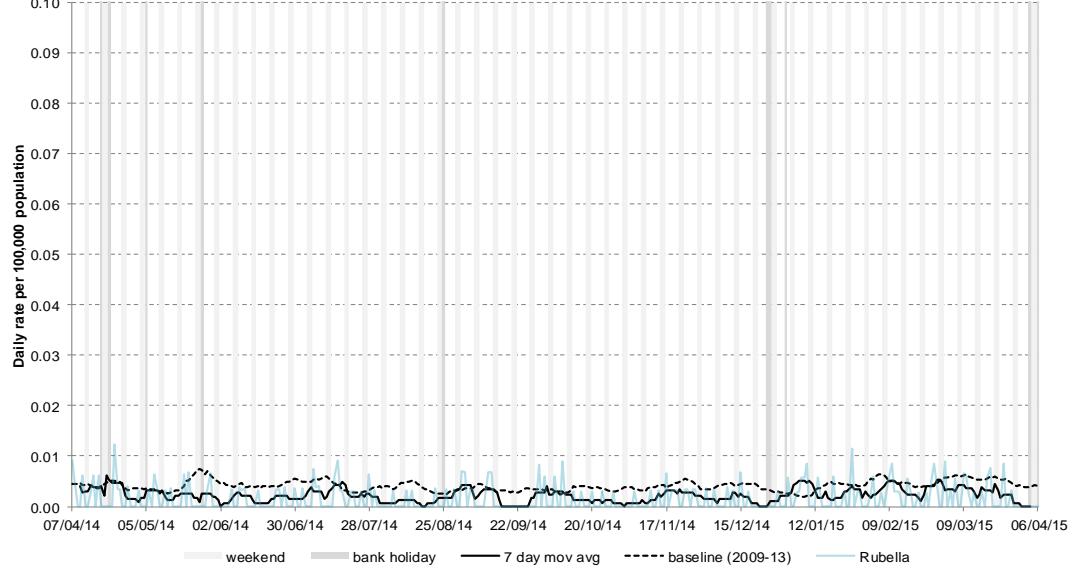

## 15: Measles

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 16: Rubella

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

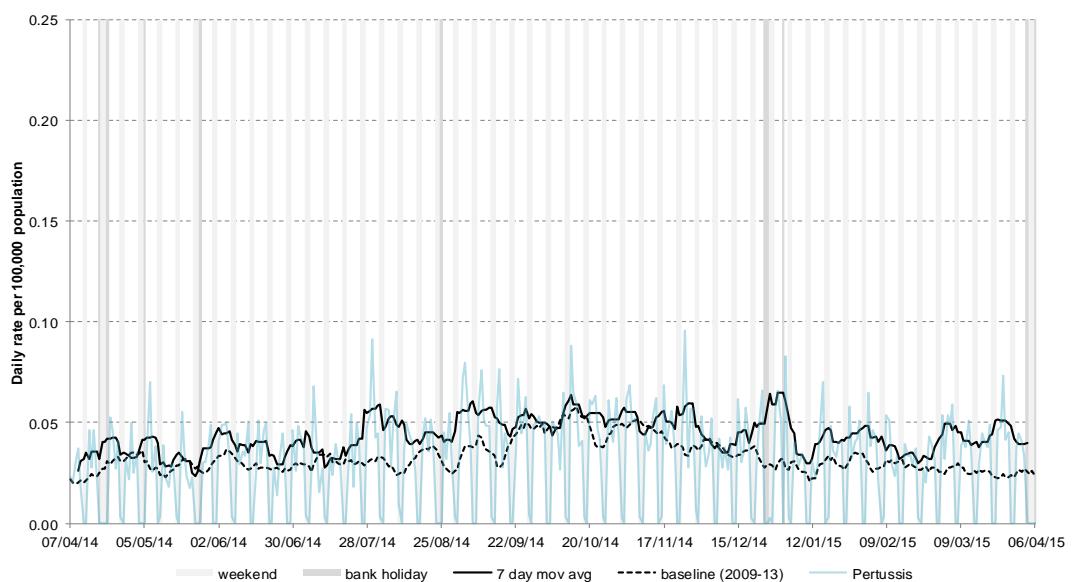

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

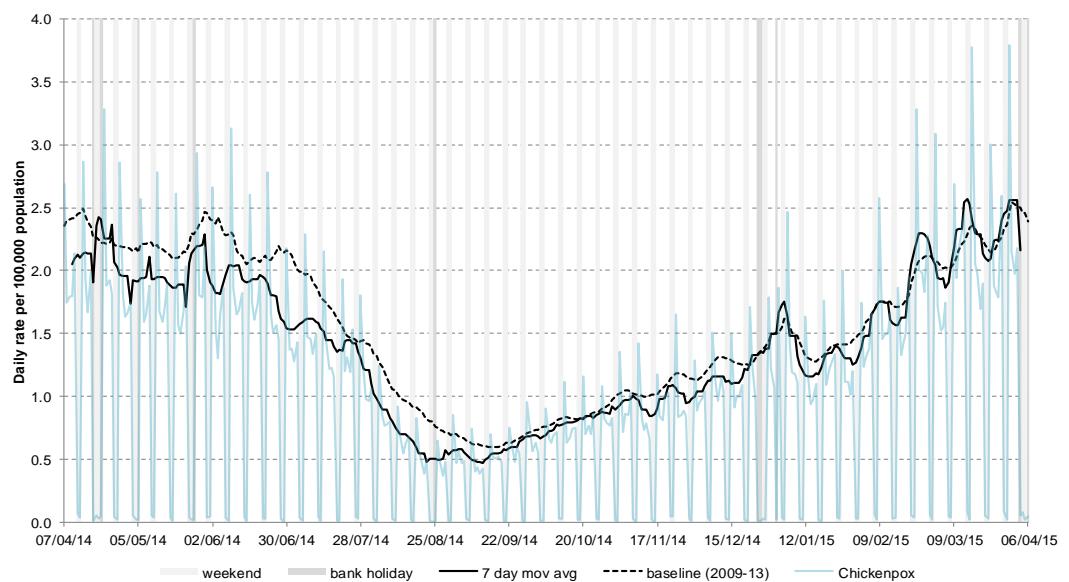

## 17: Pertussis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

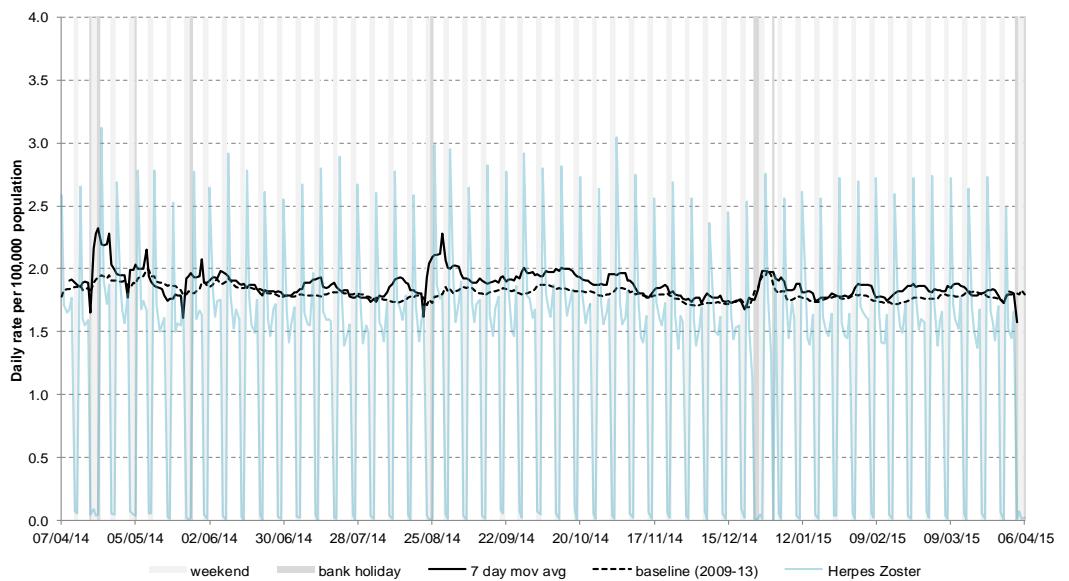

## 18: Chickenpox

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 19: Herpes zoster

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

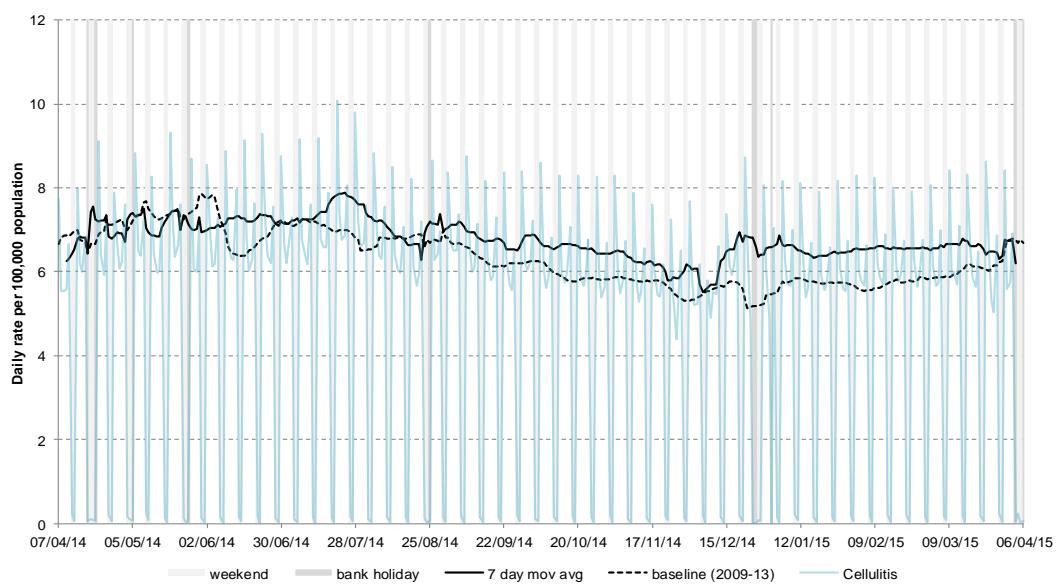

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

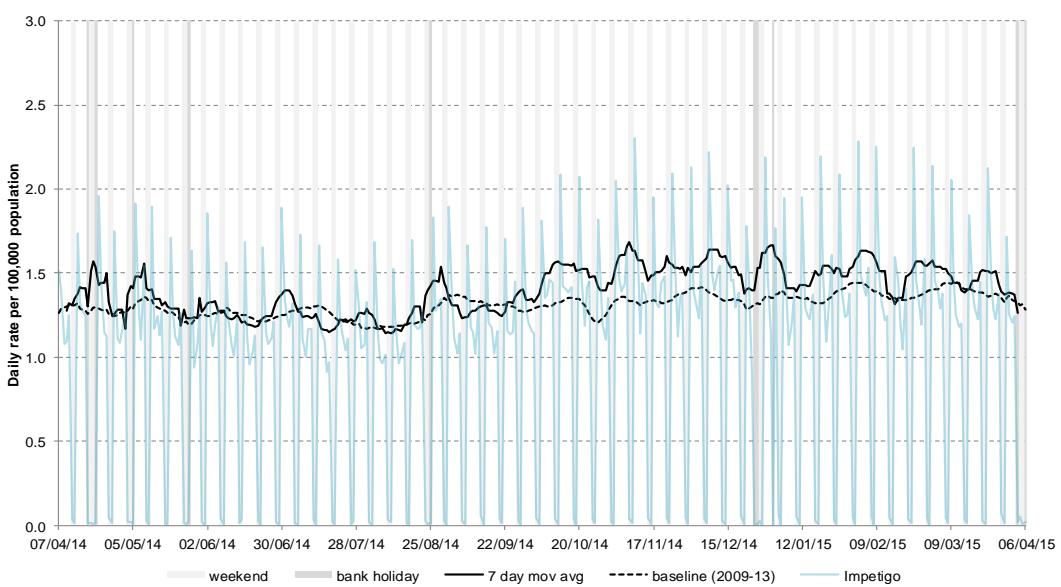

## 20: Cellulitis

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 21: Impetigo

Daily incidence rate (and 7-day moving average\*) per 100,000 population (all England, all ages).

## 22: Intentionally left blank

Intentionally left blank.

\* 7-day moving average adjusted for bank holidays.

08 April 2015

Year: 2015 Week: 14

## Notes and further information

- The Public Health England GP in hours surveillance system is a syndromic surveillance system monitoring community-based morbidity recorded by GP practices.
- This system captures anonymised GP morbidity data from two GP clinical software systems, EMIS, from version 1 of the QSurveillance® database, and TPP SystmOne.
- Historic baselines are smoothed to remove bank holiday effects. Data from 2009 has been excluded for selected indicators which were affected by the H1N1 influenza pandemic. No baseline is currently included for allergic rhinitis.
- The appendix illustrates weekly GP in hours consultation data for influenza-like illness (ILI). Each PHE Centre is represented by a thematic map showing its constituent local authorities (LA) coloured according to the weekly consultation rate of ILI per 100,000 population. LAs where less than 5 cases of ILI have been reported are suppressed and illustrated as no data.
- The maps on the following pages contains Ordnance Survey data © Crown copyright and database right 2014. Contains National Statistics data © Crown copyright and database right 2014.

## Acknowledgements:

We thank and acknowledge the University of Nottingham, ClinRisk® and the contribution of EMIS and EMIS practices. Data source: version 1 of the QSurveillance® database.

We thank TPP, ResearchOne and the SystmOne GP practices contributing to this surveillance system.
