Dover to Folkestone MCZ

Feature Maps

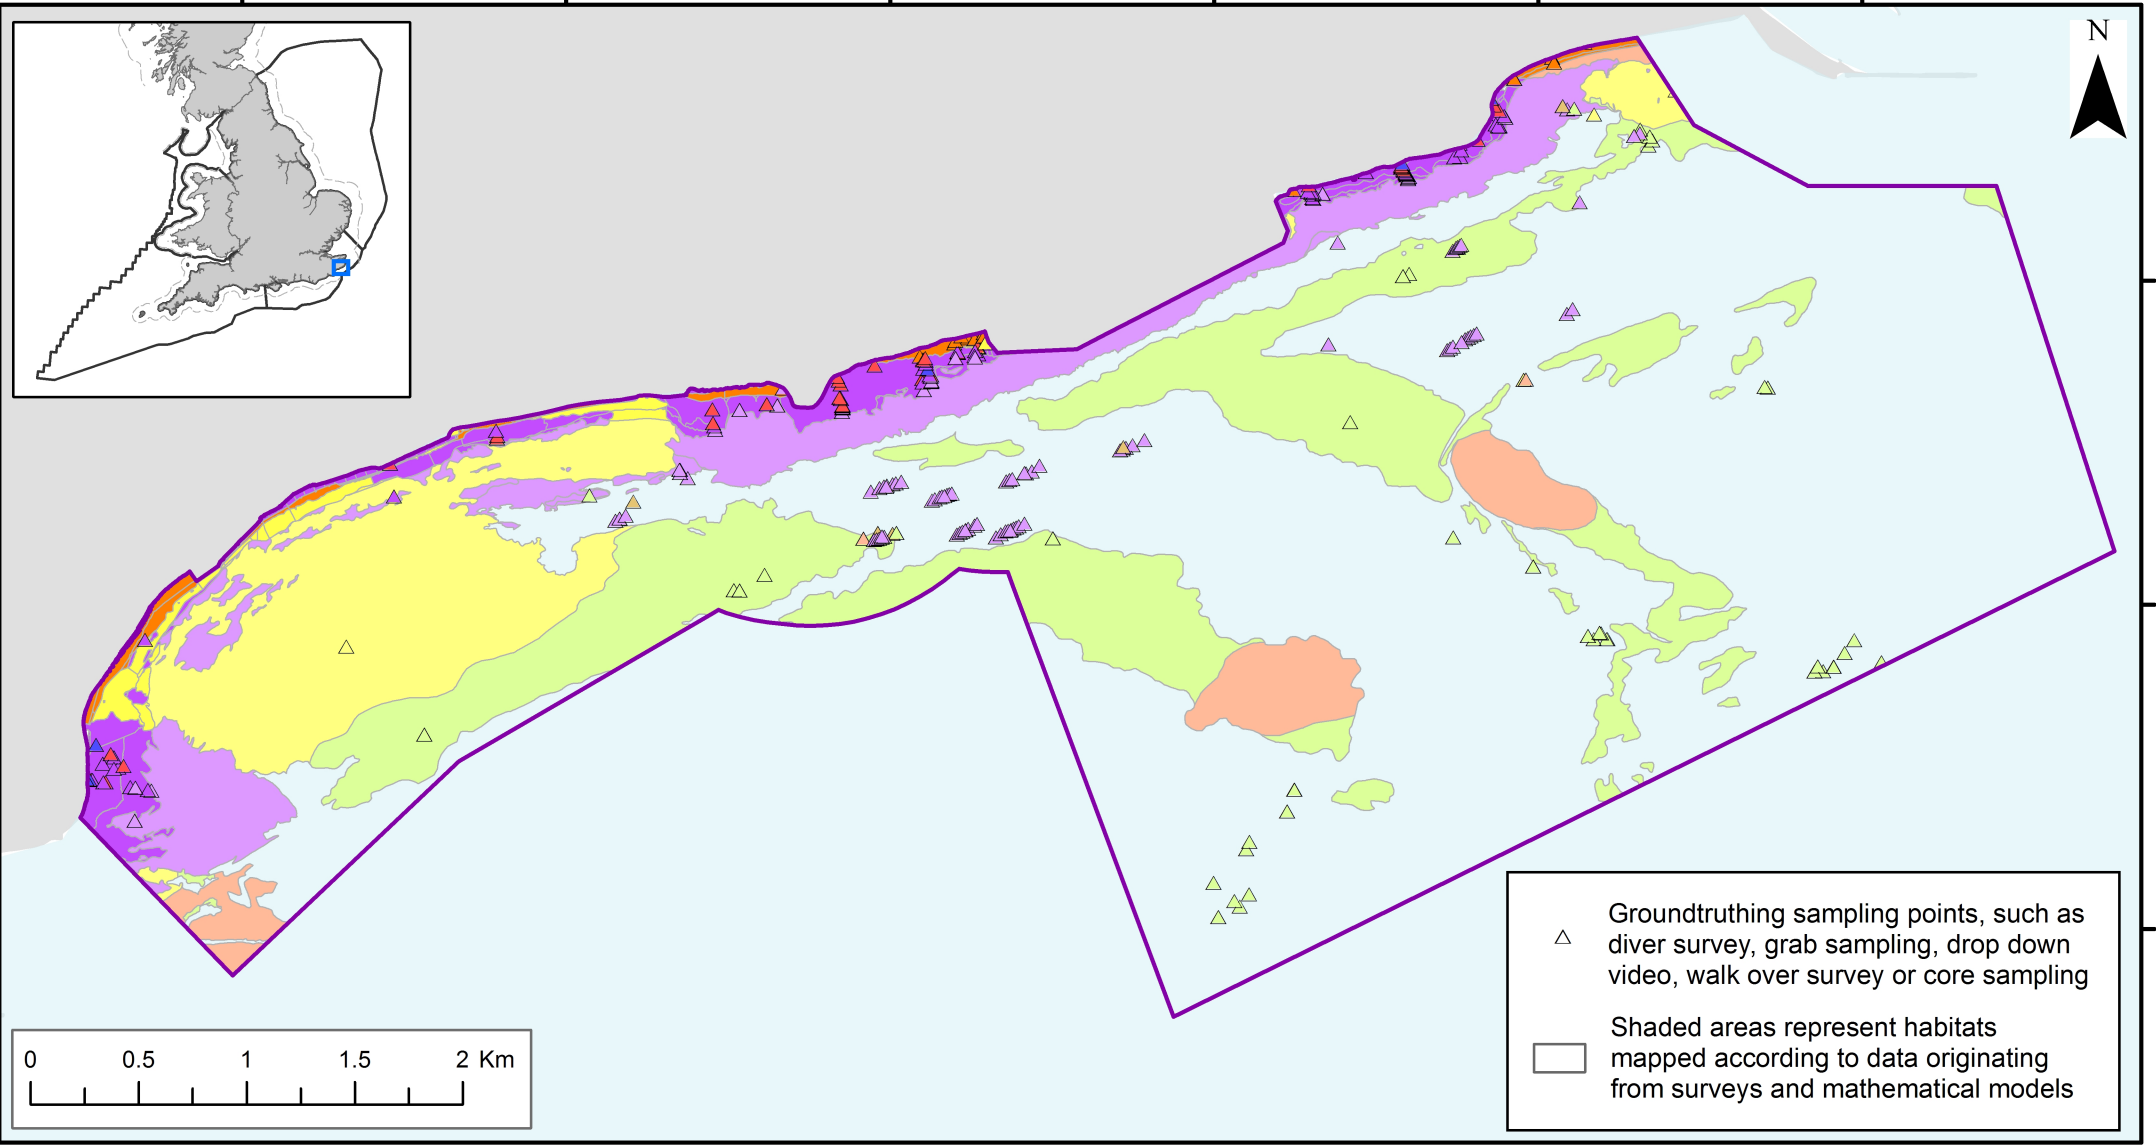

17 January 2016

The following maps show where the features protected by this Marine Conservation Zone (MCZ) are located.

There are two separate maps, to make it easier to see the locations of features. One map shows the broad-scale habitats, and the second shows features of conservation importance. Broad scale habitats represents habitats, and associated species that live on and in the habitat. Features of conservation importance are specific habitats and species that are known to be rare, threatened or declining in our seas.

A range of different types of surveys have been used to create these maps. More detailed information on the techniques used and the features themselves can be found here: <http://nepubprod.appspot.com/publication/4594304593952768>
