

**Department for Environment, Food and Rural Affairs**

## **North West of Jones Bank MCZ**

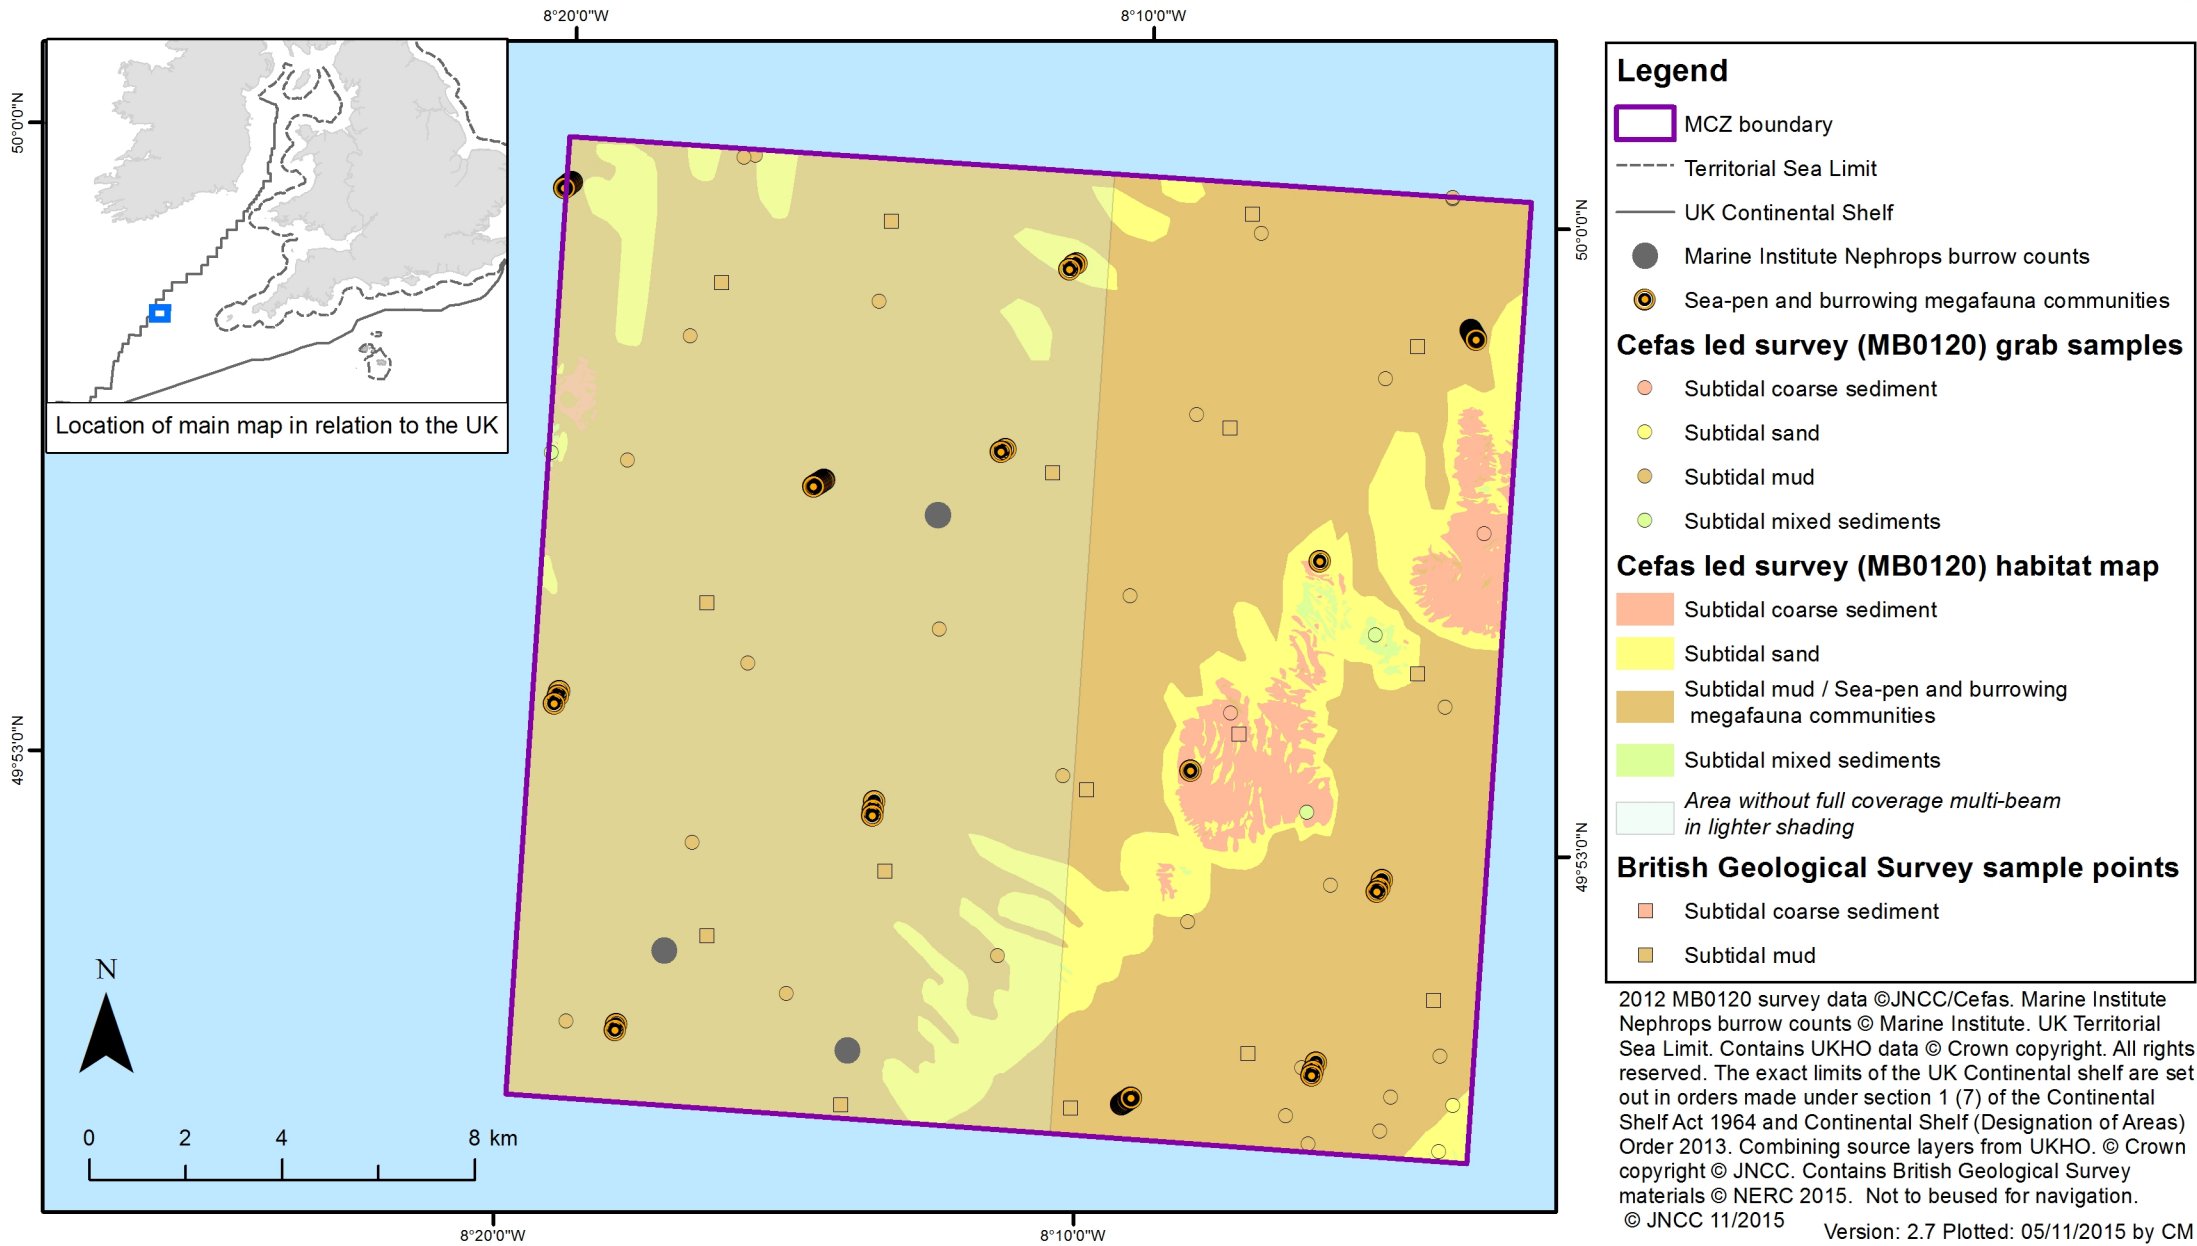

### **Feature Map**

**17 January 2016**

The following map shows where the features protected by this Marine Conservation Zone (MCZ) are located. A range of different types of surveys have been used to create this map. More detailed information on the techniques used and the features themselves can be found here: <http://jncc.defra.gov.uk/page-6658>

The colour tone changes on this map. This is because part of the site was not fully surveyed with the same range of techniques as part of the Defra funded site survey. The lighter section on the left of the map has fewer data collected as part of this survey, and as a result the habitat map in this area has been developed using expert judgement based on other data gathered through the Defra funded survey and other data sources.

# North-West of Jones Bank MCZ

Sea-pen and burrowing megafauna communities data points were taken on the Cefas survey in 2012 using video and still images. Nephrops burrow counts were taken by Marine Institute Nephrops surveys in 2012-2014. The British Geological Survey PSA data were downloaded from [http://mapapps2.bgs.ac.uk/geoindex\\_offshore/home.html](http://mapapps2.bgs.ac.uk/geoindex_offshore/home.html) and translated into EUNIS. The Cefas led survey grab samples were taken during the Cefas survey in 2012. The habitat map has been derived from acoustic data and multiple ground-truthing data from the Cefas survey in 2012. Acoustic data do not cover the entirety of the site and some habitat extents have been extrapolated (area with lighter shading on map). Detailed advice available from the JNCC advice documents found here: <http://jncc.defra.gov.uk/page-6658>
