Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

The Industrial Emissions Directive (IED) was transposed in England on 27 February 2013 by the Environmental Permitting (England and Wales)(Amendment) Regulations (EPR) 2013. This variation implements changes brought about by the IED into this permit.

This facility, centred at NGR SP 53424 25527, treats non-hazardous waste with a capacity exceeding 75 tonnes per day involving biological treatment. The facility now needs to be permitted as an installation. This variation therefore changes the standard rules set that form the conditions of this permit from Standard Rules SR2008 No17 composting in closed systems to Standard Rules SR2012 No4 composting in closed systems.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
