Subject: Phase 2B of the feasibility study

Charles

I need to talk to you at some convenient time about the draft of the feasibility study which I have now received.

I need someone to review in strictest confidence the draft to check whether the science is sufficiently robust to support its conclusions. If we are going to base future policy on the study we need to be sure of this in our own minds.

Would you be prepared to do this for me against payment of an appropriate fee?

Perhaps we could have a word about it.

Regards

Charles
